**Competition Law** Richard Whish, David Bailey, 2012-01-12 The authors describes the potential scope and application of the various legal provisions which regulate competition in the UK This book also examines the results of the convergence of UK and EC law with regard to competition in business

**Competition Law and Consumer Protection** Katalin Judit Cseres, 2005-01-01 The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged The theory seems uncontroversial However because a positive interaction between the two is presumed to be self evident the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis with no overarching legal authority There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist Dr Cseres in depth analysis provides that understanding Proceeding from the dual perspective of law and economics that is of justice fairness and reasonableness on the one hand and of efficiency of the other she fully considers such underlying issues as the following the role of competition law and consumer law in a free market economy the notion of consumer welfare the effect of the modernisation of EC competition law for consumers economics theories of information bounded rationality and transaction costs the special significance of vertical agreements and merger control and how consumers are affected by information asymmetries The ultimate focus of the book is on current and emerging EC law in which a rapprochement between the two areas seems to be under way Dr Cseres provides a knowledgeable guide to the various strands of theory policy and jurisprudence that she shows ought to be taken into account in the process including schools of thought and law and policy experience in both Europe and the United States A special chapter on Hungary where post 1989 law and practice reveal a fresh and distinctly forward looking understanding of the matter is one of the book s most extraordinary features Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily It will be of immeasurable value to a wide range of professionals from academics and researchers to officials policymakers and practitioners in competition law consumer protection advocacy economic theory and planning business administration and various pertinent government authorities

**The Design of Competition Law Institutions** Eleanor M Fox, Michael J Trebilcock, 2013 Significant power is exercised through webs created between different systems of national law influenced by governments but also by transnational actors such as global corporations and transnational NGOs and often with an overlay of formal international law or of substantial influence from international institutions Studying the procedures used by competition institutions dealing with specific cases concerning monopolies mergers anti competitive practices this volumes uses a template to study practices of many national institutions and the EU and examines the interactions among these and with prescriptions of influential international bodies Together these form a web with existing procedural rules and practices in a particular institution criticized and alternatives championed and transmitted partly by prescription and partly by arguments of major global law firms of global corporations

and of consultants dispatched by the ICN and other agencies This whole process examined for the first time in this book is the real global governance of the procedural law and practices of market supervision under competition rules Delving deeply into their jurisdictions and internationally the contributors illuminate the inner workings of the systems and expose the procedure process and performance norms embedded within Case studies are drawn from Australia Canada Chile China Japan South Africa the USA and the EU as well as four leading international institutions involved in antitrust the World Trade Organization the Organization for Economic Cooperation and Development the United Nations Conference on Trade and Development and the International Competition Network The results reveal a convergence of these norms across the very different systems a procedural norms convergence that offers a necessary counterpart to studies on substantive rule convergence These results provide benchmarks for the field suggest possibilities for future development and offer lessons for all interested in competition law and global governance

*Competition Law* Rosa Greaves, 2017-11-30 This book was published in 2003 Competition anti trust law as a separate body of law is very much a creation of the 20th century and grew only in maturity in the latter half of that century As developments in US anti trust law have had and continue to have an important influence on the development of competition law in Europe and worldwide articles have been selected for this collection from both sides of the Atlantic The volume focuses on the following aspects the objectives and nature of competition law the scope of competition law selected legal concepts and challenges in competition law and the global application of competition law

*Competition Law* Eugène Buttigieg, 2009-01-01 Although it is commonly assumed that consumers benefit from the application of competition law this is not necessarily always the case Economic efficiency is paramount thus competition law in Europe and antitrust law in the United States are designed primarily to protect business competitors and in Europe to promote market integration and it is only incidentally that such law may also serve to protect consumers That is the essential starting point of this penetrating critique The author explores the extent to which US antitrust law and EC competition law adequately safeguard consumer interests Specifically he shows how the two jurisdictions have gone about evaluating collusive practices abusive conduct by dominant firms and merger activity and how the policies thus formed have impacted upon the promotion of consumer interests He argues that unless consumer interests are directly and specifically addressed in the assessment process maximization of consumer welfare is not sufficiently achieved Using rigorous analysis he develops legal arguments that can accomplish such goals as the following replace the economic theory of consumer welfare with a principle of consumer well being build consumer benefits into specific areas of competition policy assess competition cases so that income distribution effects are more beneficial to consumers and control mergers in such a way that efficiencies are passed directly to consumers The author argues that in the last analysis the promotion of consumer well being should be the sole or at least the primary goal of any antitrust regime Lawyers and scholars interested in the application and development and reform of competition law and policy will welcome this book They

will find not only a fresh approach to interpretation and practice in their field comparing and contrasting two major systems of competition law but also an extremely lucid analysis of the various economic arguments used to highlight the consumer welfare enhancing or welfare reducing effects of business practices

*Landmark Cases in Competition Law* Barry Rodger, 2012-12-01 It is the thesis of this fascinating and highly instructive book on competition law that an examination of one landmark case scenario or saga each from a range of legal systems leads to a thorough understanding of the issues informing and arising from competition policy law and legal practice To that end leading scholars from 14 jurisdictions enhance their academic authority and rigour with an element of panache to describe a particularly salient case in each of their countries commenting in depth on the contribution of the case to the development of their particular competition law culture and to the case's enduring significance for competition law and its enforcement from a global perspective There are chapters for each of thirteen countries as well as the European Union preceded by an informative and thoughtful introduction For each landmark case selected the legislative background the case facts and the legal ruling and reasoning are all minutely described along with commentary critique and assessment of the case's impact and contemporary significance The cases cover vast swathes of the competition law territory in terms of substance and procedure dealing with cartels abuse of dominance mergers and vertical restraints and involving diverse forms of public and private enforcement processes Aspects covered include the following the public interest test bid rigging in public procurement the entitlement of dominant companies to compete on a level footing with other companies the hard to draw line between legitimate competition and unlawful monopolizing conduct the dangers of eclectic borrowing in the development and interpretation of competition law rules horizontal price fixing collusion hub and spoke cartels resale price maintenance agreements and the U S rule of reason the increasing use of private enforcement and the right for victims of a competition law infringement to seek compensation merger control in energy markets and the political use of merger review rules to benefit domestic firms cooperation with criminal enforcement agencies and prosecutors the role courts play in undertaking adequate legal supervision of competition authorities leniency processes and obtaining access to confidential whistleblowing documentation imposition of administrative fines and other deterrence based sanctions and how the consumer welfare standard is interpreted More than a set of landmark case descriptions this book in which many chapters reflect upon recent and consider further future significant reforms demonstrates that competition law and its enforcement processes form part of a chronological narrative and that it is important to understand the broader legal social and economic context within which competition law and policy develop This wider perspective will prove immeasurably valuable to the many practitioners business people jurists and policy makers engaged in the shaping of competition law in any jurisdiction and will moreover be essential reading for postgraduate students studying any aspects of comparative competition law enforcement
