criminal law principles has emerged and been interpreted in each jurisdiction's proceedings freedom from self incrimination non bis in idem burden and standard of proof legality and legal certainty and proportionality of sanctions The author offers proposals involving both legislative and judicial actions with examples of judges invoking criminal law principles to develop an appropriate level of safeguards in competition law proceedings The book shows that criminal law can provide a rich source of inspiration for the judiciary on the appropriate level of legal safeguards in competition law proceedings As such it provides an important source of information and guidance for lawyers and judges dealing with competition law matters

Competition Law 2021 Roxburgh, 2021-01-18 Competition or anti trust law concerns the regulation of competition and is designed to ensure that the competitive dynamic on a market is maintained Given the rise in market based economies the jurisdictions which have adopted competition law regimes have expanded significantly over the last decade In this way competition law can be seen as the combination of law policy and economics This book considers the competition regimes operated by the European Union the United States and the United Kingdom It focuses on three broad areas of regulation within these jurisdictions anti competitive agreements abuse of dominance and merger control Within these broad categories other important issues are considered such as the enforcement of competition rules the relationship with intellectual property rights and the underlying economic and commercial considerations on which the law is based The Concept of Abuse in EU Competition Law Pinar Akman, 2012-02-03 The objective s of Article 102 TFEU what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled This lack of clarity creates uncertainty for businesses and coupled with the current state of economics in this area raises an important question of legitimacy Using law and economic approaches this book inquires into the possible objectives of Article 102 TFEU and proposes a modern approach to interpreting abuse In doing so this book establishes an overarching concept of abuse that conforms to the historical roots of the provision to the text of the provision itself and to modern economic thinking on unilateral conduct This book therefore inquires into what Article 102 TFEU is about what it can be about and what it should be about regarding both objectives and scope The book demonstrates that the separation of exploitative abuse from exclusionary abuse is artificial and unsound It examines the roots of Article 102 TFEU and the historical context of the adoption of the Treaty the case law policy and literature on exploitative abuses and where relevant on exclusionary abuses The book investigates potential objectives such as fairness and welfare as well as the potential conflict between such objectives Finally it critically assesses the European Commission's modernisation of Article 102 TFEU before proposing a reformed approach to abuse which is centred on three necessary and sufficient conditions exploitation exclusion and a lack of an increase in efficiency
