Teaching-Learning Contemporary Physics Beata Jarosievitz, Csaba Sükösd, 2021-09-15 This book presents research contributions focussing on the introduction of contemporary physics topics mainly but not exclusively quantum physics into high school curricula. Despite the important advances and discoveries in quantum physics and relativity which have revolutionized our views of nature and our everyday lives the presence of these topics in high school physics education is still lacking. In this book physics education researchers report on the teaching and learning of quantum physics from different perspectives and discuss the design and use of different pedagogical approaches and educational pathways. There is still much debate as to what content is appropriate at high school level as well what pedagogical approaches and strategies should be adopted to support student learning. Currently there is a greater focus on how to teach modern physics at the high school level rather than classical physics. However teachers still lack experience and availability of appropriate teaching and learning materials to support the coherent integration of Quantum Physics in high school curricula. All of the 19 papers presented in this book discuss innovative approaches for enhancing physics education in schools.

Medicina del dolor y cuidado paliativo Moreno-Serrano, Nancy, Lucía Ruiz, Franklin, Arenas L., Felipe A., Borda-Restrepo, Diana Catalina, Camacho-Echeverri, Rogelio Eduardo, Castro-Ossa, Wilson, Ciro-Aguirre, Martha Soledad, Chaparro-Díaz, Lorena, Galvis-López, Gladys, Giraldo-Carrillo, Lucía Inés, Gómez-Córdoba, Ana Isabel, Gómez-Díaz, Mateo, González Puche, Ángela Carmela, Holguín-Capera, Zulma Milena, Isaza-Narváez, Ana Milena, Jaramillo-Caballero, María Paulina, Jaramillo-Mejía, Jaime, León Delgado, Marta Ximena, Nava-Mesa, Mauricio Orlando, Palacios-Espinosa, Ximena, Pardo-Oviedo, Juan Mauricio, Pedraza-López, Natalia Andrea, Rodríguez-Martínez, Carlos, Salazar-Arias, Ricardo Emilio, Sánchez-Cárdenas, Miguel Antonio, Valbuena-Castiblanco, Cindy Lorena, Velilla-Echeverri, Diana Catalina, 2022-05-30

En las carreras del área de la salud tanto en Colombia como en Latinoamérica hay muy poca formación acerca de la evaluación y el manejo de pacientes en medicina del dolor y cuidado paliativo pese a su amplia prevalencia en la población general. De ahí que la concepción de este libro sea interdisciplinaria pues se considera que el foco de atención es la unidad paciente-familia-cuidador. Así se contextualiza respecto a la situación de los cuidados paliativos en la región y en el mundo se abordan aspectos básicos de neurobiología, farmacología y evaluación integral y se ofrecen pautas de manejo sobre las patologías más prevalentes en dolor crónico, el manejo de síntomas en cuidado paliativo en problemáticas específicas y el abordaje psicosocial de pacientes, familias y cuidadores. También y muy relevante en estos días se tocan temas sobre la toma de decisiones en cuidado paliativo así como sobre sus implicaciones éticas y jurídicas. La esperanza del grupo de autores es animar y apoyar la creación de equipos interdisciplinarios de intervención de medicina del dolor y cuidado paliativo en las regiones más

desprovistas de estos recursos al igual que ofrecerles a los comités de bioética las áreas jurídicas de la salud y asociaciones de pacientes una perspectiva en relación con esta temática tan fundamental en el quehacer diario Intervención psicológica en emergencias María Dolores Pujadas Sánchez, 2022-01-27 En este libro se plantean cuestiones como el profesional de emergencias nace o se hace con qué recursos cuenta la población para afrontar situaciones que ponen en riesgo su integridad física y física tenemos la capacidad y las habilidades físicas y emocionales necesarias para sobrellevar una desgracia sobrevenida La primera cuestión implica el aprendizaje previo y la psicopedagogía en situaciones de emergencia Si bien el profesional de la psicología de emergencias es fundamental en los primeros auxilios psicológicos PAP la educación en emergencias por parte de la población general puede salvar vidas cuando los recursos humanos o materiales no son suficientes o no están al alcance de las personas afectadas Esta obra es una guía de intervención en emergencias tanto para profesionales como para el público general ya que se presenta toda la casuística de la emergencia y casos reales que muestran con un lenguaje sencillo y coloquial cómo se puede llevar a cabo la intervención con los medios a nuestro alcance De este modo desde el más profundo sentido común y con los conocimientos básicos presentados en esta obra todos podemos aportar ayuda a los demás en situaciones críticas Aunque la aplicación de técnicas específicas queda reservada a los profesionales de la psicología de emergencias la ayuda humanitaria y el conocimiento de las respuestas emocionales que se pueden dar en situaciones extremas son de gran utilidad para redefinir la solidaridad la compasión la empatía con el sufrimiento ajeno y el crecimiento personal o la resiliencia que supone la capacidad de aprender y salir reforzado de situaciones traumáticas **Variables Psicológicas y Educativas para intervención en el ámbito escolar: Nuevos retos**

la vida **Neuropsicología escolar** Jéssica Marcela Arévalo Parra, 2022-07-19 En la actualidad el estudio de la neuropsicología en el campo escolar es de gran importancia para los profesionales que se especializan en el análisis del comportamiento, el desarrollo y el proceso de aprendizaje tales como psicólogos, educadores, pedagogos, terapeutas y los mismos padres de familia, especialmente si se refiere al bajo rendimiento académico, es decir, cuando no se alcanza el nivel escolar esperado para la edad. En algunos casos, relacionado con el proceso de maduración del estudiante, lo anterior como veremos puede explicarse ampliamente por sus estados emocionales, cognitivos y físicos. Neuropsicología escolar está enfocada en el mejoramiento de las relaciones pedagógicas y educativas desarrolladas en el ambiente escolar entre las diferentes figuras que forman parte de las instituciones: estudiantes, docentes y profesionales del campo de la educación y de las ciencias de la salud. Para dar respuesta a esta necesidad y contribuir de manera sistemática al bienestar social, es necesario asegurar el impacto efectivo de la aplicación del conocimiento científico sobre los individuos, retomando las bases que nos ofrecen la neurociencia, la psicología y la educación, considerando los aportes de los procesos de desarrollo sobre el funcionamiento del sistema nervioso central y las áreas relacionadas con los procesos de aprendizaje. En este sentido, Neuropsicología escolar logra crear un diálogo a través del saber disciplinario y científico entre la educación y la salud, de tal forma que todo agente involucrado en los procesos de enseñanza-aprendizaje en la escuela domine las teorías, modelos y principios explicativos del comportamiento y desarrollo propios de las interacciones entre el estudiante y el docente.
