**Corporate Aviation Management** Raoul Castro, 2011-03-22 In this comprehensive aviation manual Raoul Castro provides a source of invaluable corporate aviation management information. He begins by giving an overview of corporate aviation from its inception then focuses on the management principles and functions that specifically target corporate aviation. Through the utilization of these sound management principles, Castro facilitates the acceptance of corporate aircraft as indispensable tools of industry. As Castro notes, few companies know how to use corporate aircraft to maximum advantage. Drawing on his expertise and experience, Castro designs a plan by which a company can achieve maximum utilization of an airplane or helicopter fleet. He gives specific instructions on how to facilitate the efficient use of the aviation department of a company, select appropriate aircraft, plan for disasters, and establish security measures. He fulfills legal requirements of the governmental agencies that regulate the use of aircraft and manage the maintenance and repair of aircraft. Castro also discusses the scores of details involved in the management of a professional corporate aviation branch and how these details can be handled in a positive productive manner. After thoroughly examining the overall managerial functions involved in planning, organizing, controlling, and implementing an aviation arm, Castro concludes by discussing the future of corporate aviation. This book is a practical and valuable guide for the executive in charge of an aviation department, an aviation department manager, or chief pilot aspirants to aviation management positions and both students and teachers of aviation management.
