Consumer Culture History Theory And Politics:

Consumer Culture Roberta Sassatelli, 2007-04-30 A thorough and wide ranging synthetic account of social scientific research on consumption which will set the standard for the second generation of textbooks on cultures of consumption Alan Warde University of Manchester The multi disciplinary nature of the book provides new and revealing insights and Sassatelli conveys brilliantly the heterogeneity and ambivalent nature of consumer identities consumer practices and consumer cultures Newcomers to consumer culture will find this an invaluable primer and introduction to the major concepts and ideas while those familiar with the field will find Sassatelli's sharp analysis and discussion both refreshing and inspiring James Skinner Journal of Sociology This is a model of what a text book ought to be Over the past decade the original debates about consumption have been overlaid by a vast amount of detailed research and it seems unimaginable that a single text could do justice to all of these To do so would involve as much a commitment to depth as to breadth I was quite astonished at how well Sassatelli succeeds in balancing the two Ultimately it is the book that I would trust to help people digest what we now have discovered about consumption and start from a much more mature and reflective foundation to consider what more we might yet do Daniel Miller Material World Showing the cultural and institutional processes that have brought the notion of the consumer to life this book guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within While rooted in sociology Sassatelli draws on the traditions of history anthropology geography and economics to provide a history of the rise of consumer culture around the world a richly illustrated analysis of theory from neo classical economics to critical theory to theories of practice and ritual de commoditization a compelling discussion of the politics underlying our consumption practices An exemplary introduction to the history and theory of consumer culture this book provides nuanced answers to some of the most central questions of our time *Consumer Culture* Roberta Sassatelli, 2007 Showing the cultural and institutional processes that have brought the notion of the consumer to life this work guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within **Consumer Culture** Roberta Sassatelli, 2007 Showing the cultural and institutional processes that have brought the notion of the consumer to life this work guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within *Consumer Culture*, 1983 **Routledge Handbook on Consumption** Margit Keller, Bente Halkier, Terhi-Anna Wilska, Monica Truninger, 2017-02-10 Consumption research is burgeoning across a wide range of disciplines The Routledge Handbook on Consumption gathers experts from around the world to provide a nuanced overview of the latest scholarship in this expanding field At once ambitious and timely the volume provides an ideal map for those looking to position their work find

new analytic insights and identify research gaps With an intuitive thematic structure and resolutely international outlook it engages with theory and methodology markets and businesses policies politics and the state and culture and everyday life It will be essential reading for students and scholars across the social and economic sciences New Perspectives on Consumer Culture Theory and Research Renáta Sedláková,Pavel Zahrádka,2013-02-21 In the post socialist countries the subject of consumption has not received sufficient attention from the perspective of Consumer Culture Theory The opinion has long prevailed among the majority of social scientists from this region that consumer society and consumptive behaviour is a socially destructive phenomenon and one of the main causes of problems in contemporary society This impression has prevented them from scrutinizing the symbolic dimension of consumption and led them to a critical analysis of the social causes and environmental consequences of excessive consumption The examination of symbolic aspects of consumer culture or the mutual interaction of culture and marketing communication for example have remained outside the realm of academic interest The absence of comprehensive academic interest in the topic of consumer culture does not however mean that consumer culture is not a subject of research Such research instead takes place outside of the sphere of the university in the commercial sector and is primarily focused on issues of how to successfully sell products and services Due to competitive concerns commercial research into consumer culture has led to the privatization of its results which runs contrary to the ideal of science as an open and critical project The goal of this book is to create a counterbalance to this science in the shadows and overcome the mutual distrust between the academic and commercial spheres and make possible the transfer of recent discoveries between the two parties This publication is dedicated to the exploration of three areas of consumer culture research on consumer culture and consumer behaviour in post socialist countries especially in the Czech Republic new developments in the theory of consumer culture and innovative methodological approaches to its research and finally to recent criticism of consumer culture and consumerism It emerged from the collaboration of a team of authors made up of leading European researchers in the field of consumer culture such as Kate Soper London Metropolitan University Franz Liebl Berlin University of the Arts and Rainer Gries University of Vienna as well as promising young scholars from the Czech Republic Great Britain Sweden Serbia Poland and Portugal This book will be of great interest to students and scholars of sociology cultural studies marketing and market research Consumer Culture Roberta Sassatelli,2007-05-17 Roberta Sassatelli has written a thorough and wide ranging synthetic account of social scientific research on consumption which will set the standard for the second generation of textbooks on cultures of consumption Consumer Culture is an appealing and lucid introduction to the major themes historical and contemporary theoretical and empirical surrounding the growth nature and consequences of consumer culture It will be of professional interest as well as serving a student audience Alan Warde University of Manchester Showing the cultural and institutional processes that have brought the notion of the consumer to life this book guides the reader on a comprehensive journey through the history of how we have come to understand

ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within While rooted in sociology Sassatelli draws on the traditions of history anthropology geography and economics to give A history of the rise of consumer culture around the world A richly illustrated analysis of theory from neo classical economics to critical theory to theories of practice and ritual de commoditization and A compelling discussion of the politics underlying our consumption practices An exemplary introduction to the history and theory of consumer culture this book provides nuanced answers to some of the most central questions of our time **Encyclopedia of Consumer Culture** Dale

Identity and Capitalism Marie Moran,2014-11-13 This is a splendid book that dispels myths about identity and presents a cultural materialist case for the study of such keywords and their preoccupations under the hegemony of neoliberal capitalism Professor Jim McGuigan Loughborough University Identity particularly as it is elaborated in the associated categories of

personal and social identity is a relatively novel concept in western thought politics and culture The explosion of interest in the notion of identity across popular political and academic domains of practice since the 1960s does not represent the simple popularisation of an older term as is widely assumed but rather the invention of an idea Identity and Capitalism explores the emergence and evolution of the idea of identity in the cultural political and social contexts of contemporary capitalist societies Against the common supposition that identity always mattered this book shows that what we now think of routinely as personal identity actually only emerged with the explosion of consumption in the late twentieth century It also makes the case that what we now think of as different social and political identities only came to be framed as such with the emergence of identity politics and new social movements in the political landscapes of capitalist societies in the 60s and 70s Marie Moran provides an important new exploration of the articulation of the idea of identity to the social logic of capitalism from the organised capitalism of the mid twentieth century up to and including the neoliberal capitalism that prevails today Drawing on the work of Raymond Williams the cultural materialist approach developed here provides an original means of addressing the political debates about the value of identity in contemporary capitalist societies

consumption retail and production *Why Feminism Matters* K. Mediating Politics: Newspapers, Radio, Television And The Internet Washbourne, Neil, 2010-04-01 The book explores the complex interconnections between media political organisation and society This is particularly important in a period when politics seems to be in crisis This crisis can be seen in problems of trust affecting political institutions and politicians the apparently widespread political cynicism and apathy of audiences and citizens and the perception that processes of globalisation are undermining the bases of contemporary democracy and public discussion Old cherished views and ideals seem dead and there appears to be no clear vision of the future This pessimistic view has been expressed most cogently and explicitly in the end of politics thesis Rather than taking this view the book investigates in detail how the use of media and new technology affects politics and how the consequences vary across national societies and regions It focuses in particular on the way new technology poses problems but also offers potentialities and solutions for political actors of all sorts To this end particular attention is paid to various political uses of the internet The book closely analyses how political parties pressure groups governments and social movements explore and develop the range of media forms and rhetorics and assesses the aggregate consequences this has for political life The book argues that key versions of the end of politics thesis are simply too pessimistic about what we can hope for from the future and imply an unrealistic nostalgia about the past Rather it puts the media politics relationship into the broader context of a culturally complex and changing contemporary information society

Ageing, Corporeality and Embodiment Chris Gilleard, Paul Higgs, 2014-11-01 Ageing Corporeality and Embodiment outlines and develops an argument about the emergence of a new ageing during the second half of the twentieth century and its realisation through the processes of embodiment The authors argue that ageing as a unitary social process and agedness as a distinct social location have lost much of their purchase on the social imagination Instead this work asserts that later life has become as much a field for not becoming old as of old age The volume locates the origins of this transformation in the cultural ferment of the 1960s when new forms of embodiment concerned with identity and the care of the self arose as mass phenomena Over time these new forms of embodiment have been extended changing the traditional relationship between body age and society by making struggles over the care of the self central to the cultures of later life
