 - b. To calculate what percent of each monthly payment is interest, divide the total interest paid by the number of payments, then divide by the total monthly payment and multiply by 100.
 - c. To calculate what percent of the total payments is interest, divide the total interest paid by the total payments and multiply by 100.
4. Be able to calculate interest, proceeds, and finance charges on discount loans.
 - a. **Discount loans** are loans in which the interest is paid in advance for the amount of money loaned.
 - b. **Proceeds** are the amount of money received when money is borrowed. This amount is less than the principal.
 - c. A **finance charge** is the price paid to use someone else's money to make purchase.
 - d. To calculate the interest, use the formula $I = PRT$, where I is the interest, P is the principal (amount borrowed), R is the rate of interest as a decimal, and T is the time in years. If the time is a part of a year, use an exact fraction not a rounded decimal.
 - e. To calculate the proceeds, subtract the interest from the principal.
