experiences or ideas to satisfy needs and the impacts that these processes have on the consumer and society. Although it is not necessary to memorize this definition, it brings up some useful points. Behavior occurs either for the individual or in the context of a group, e.g., friends influence what kinds of clothes a person wears or an organization's people on the job make decisions as to which products the firm should use. Consumer behavior within the European Community involves the use and disposal of products as well as the study of how they are purchased. Product use is often of great interest to the marketer because this may influence how a product is best positioned or how we can encourage increased consumption. Since many environmental problems result from product disposal, e.g., motor oil being sent into sewage systems to save the recycling fee or garbage piling up at landfills, this is also an area of interest. Nowadays, consumer behavior in the EU involves services and ideas as well as tangible products. The impact of consumer behavior on society is also of relevance. For example, aggressive marketing of high fat foods or aggressive marketing of easy credit may have serious repercussions for the national health and economy. With the unifying of the EU, the impact is even bigger.

The authors provide greater insight for readers by examining both the determinants and the consequences of consumer decision making. Antonides and Van Raaij include numerous examples, cases and sociodemographic data and provide complete coverage of core topics together with important new ones. Innovative chapters are included on financial behaviour, welfare, wellbeing and property, families and household production, consumption and the environment, shopping behaviour. The authors explore the full consumption cycle, not only the first stages of orientation and procurement but also the usage and disposal of products. Consumer Behaviour is ideal for both undergraduate and postgraduate students. It will also benefit non-European students who need to gain a wider understanding of consumer behaviour. Marketers, market researchers, public relations officers and government officials dealing with consumer policy will also find it extremely useful.
