Consumption Challenged Consumption Challenged:

Consumption Challenged Bente Halkier, 2016-05-23 In public debates communication campaigns and public policies it is increasingly common to attribute to consumers and their agency an ability to help solve a broad array of societal problems This tendency is particularly clear in the field of food consumption owing to the fact that food is both materially and symbolically central for consumers in everyday life as well as for large scale institutionalized dynamics In order to shed light on the challenges facing food consumption this volume takes an innovative theoretical approach presenting four empirical Danish case studies which are compared with other analyses drawn from the wider international context Consumption Challenged will appeal not only to sociologists of consumption risk and the environment but also to policy makers and researchers in the fields of geography communication media governance and social psychology **Challenging**

Consumption Anna R. Davies, Frances Fahy, Henrike Rau, 2014-05-16 Sustainable consumption is a central research topic in academic discourses of sustainable development and global environmental change Informed by a number of disciplinary perspectives this book is structured around four key themes in sustainable consumption research Living Moving Dwelling and Futures The collection successfully balances theoretical insights with grounded case studies on mobility heating washing and eating practices and concludes by exploring future sustainable consumption research pathways and policy recommendations Theoretical frameworks are advanced throughout the volume especially in relation to social practice theory theories of behavioural change and innovative visioning and backcasting methodologies This groundbreaking book draws on some conceptual approaches which move beyond the responsibility of the individual consumer to take into account wider social economic and political structures and processes in order to highlight both possibilities for and challenges to sustainable consumption This approach enables students and policy makers alike to easily recognise the applicability of social science theories *China: Tackle the Challenge of Global Climate Change* Angang Hu, Qingyou Guan, 2017-05-18

Global climate change is one of the challenges ever to confront humanity with the largest scale widest scope and most far reaching influence As the biggest developing country with the largest population China is the world's leading consumer of coal and energy and one of the worst hit victims of global warming Consequently China should assume its responsibility in making contributions to global sustainable development Based on the principles of fairness and efficiency this study creatively puts forward two principles of global governance on climate change The first entails replacement of the two group schema of developed and developing countries with a four group model based on the Human Development Index HDI The second entails application of the resulting model to specify the major emitters as principal contributors to emission reduction In addition it proposes a two step strategy for China to tackle the issue of climate change This book makes it clear that China should proactively engage in relevant international cooperation actively participate in international climate negotiations make clear commitments to reduce emissions and assume the obligations of a responsible power to achieve sustainable and
