Contemporary Drug Policy New Directions In Critical Criminology:

Contemporary Drug Policy Henry Brownstein, 2013-02-11 This book focuses on the use of drugs in our lives and how we respond to them Whereas drug policy typically centres on the problems of illicit drugs or licit drugs used in illicit ways or circumstances Contemporary Drug Policy instead considers the wide variety of substances we call drugs as a normal part of our personal and social experience and asks how and when drugs benefit us as well as how and when they are harmful The evidence is clear that at some times in some circumstances and in some places drugs are a problem This book does not ignore these issues but shifts our attention to making policies that also recognize their legitimate and constructive place in society It focuses on asking questions challenging assumptions and developing responses to drugs based on evidence from scientific study as directed by critical criminological theory rather than mainstream theory or unfounded assumptions Different from other books on drug policy this book does not offer answers or solutions Rather it shows how critical criminological theories can lead scientific research in new directions supportive of policies that offer both solutions to problems that are found to be related to drugs and an appreciation for the benefits that drugs can bring to people and society This book will be of interest to those studying or researching drug policy as well as professionals involved in policy making processes

Revitalizing Criminological Theory: Steve Hall, Simon Winlow, 2015-05-22 This book provides a short comprehensive and accessible introduction to Ultra Realism a unique and radical school of criminological thought that

has been developed by the authors over a number of years After first outlining existing schools of thought their major intellectual flaws and their underlying politics in a condensed guide that will be invaluable to all undergraduate and postgraduate students Hall and Winlow introduce a number of important new concepts to criminology and suggest a new philosophical foundation theoretical framework and research programme These developments will enhance the discipline's ability to explain human motivations construct insightful representations of reality and answer the fundamental question of why some human beings risk inflicting harm on others to further their own interests or achieve various ends Combining new philosophical and psychosocial approaches with a clear understanding of the shape of contemporary global crime this book presents an intellectual alternative to the currently dominant paradigms of conservatism neoclassicism and left liberalism In using an advanced conception of harm Hall and Winlow provide original explanations of criminal motivations and make the first steps towards a paradigm shift that will help criminology to illuminate the reality of our times This book is essential reading for academics and students engaged in the study of criminology sociology criminological theory social theory the philosophy of social sciences and the history of crime Contradictions of Terrorism Sandra Walklate, Gabe

Mythen, 2014-09-15 Over the last fifteen years there has been a significant growth in literature dealing with terrorism Nevertheless scholars within mainstream criminology have only recently begun to grapple with the problem of terrorism in a sustained fashion In this provocative book the authors provide both an exposition of the contradictions that have emerged around the regulation of terrorism and an incisive analysis of the questions that the management of terrorism poses for the discipline Focusing primarily on the processes and practices that have emerged in the United States and the United Kingdom the book provides a critical account of the political construction mediation and regulation of terrorist threat since the events of 9 11 The authors explore the ways in which new institutional modes of risk assessment based on the principle of pre-emption have impacted on individuals targeted by them Noting the dilemmas produced by the pre-emptive turn the authors also elucidate more recent moves to develop the idea of resilience in counter terrorism and security policy This book will be suitable for academics and students interested in political violence terrorism geopolitics and risk as well as for practitioners and experts working in the security industries **Green Cultural Criminology** Avi Brisman, Nigel South, 2014-06-05 Over

the last two decades green criminology has emerged as a unique area of study bringing together criminologists and sociologists from a wide range of research backgrounds and varying theoretical orientations It spans the micro to the macro from individual level environmental crimes and victimization to business corporate violations and state transgressions There have been few attempts however to explicitly or implicitly integrate cultural criminology into green criminology or vice versa This book moves towards articulating a green cultural criminological perspective Brisman and South examine existing overlapping research and offer a platform to support future excursions by green criminologists into cultural criminology's concern with media images and representations consumerism and consumption and resistance At the same time they offer an

invitation to cultural criminologists to adopt a green view of the consumption landscape and the growth and depictions of environmental harms Green Cultural Criminology is aimed at students academics criminologists and sociologists with an interest in green criminology and cultural criminology two of the most exciting new areas in criminology today Routledge Handbook of Critical Criminology Walter S. DeKeseredy, Molly Dragiewicz, 2018-04-09 The main objective of the second edition of the Routledge Handbook of Critical Criminology is twofold 1 to provide original chapters that cover contemporary critical criminological theoretical offerings generated over the past five years and 2 to provide chapters on important new substantive topics that are currently being studied and theorized by progressive criminologists Special attention is devoted to new theoretical directions in the field such as southern criminology queer criminology and green criminology The diverse chapters cover not only cutting edge theories but also the variety of research methods used by leading scholars in the field and the rich data generated by their rigorous empirical work In addition some of the chapters suggest innovative and realistic short and long term policy proposals that are typically ignored by mainstream criminology These progressive strategies address some of the most pressing social problems facing contemporary society today which generate much pain and suffering for socially and economically disenfranchised people The new edition of the Handbook is a major work in redefining areas within the context of international multidisciplinary critical research and in highlighting emerging areas such as human trafficking Internet pornography and image based sexual abuse It is specifically designed to be a comprehensive resource for undergraduate and postgraduate students researchers and policymakers Intersectionality and Criminology Hillary Potter, 2015-05-15 The use of intersectionality theory in the social sciences has proliferated in the past several years putting forward the argument that the interconnected identities of individuals and the way these identities are perceived and responded to by others must be a necessary part of any analysis Fundamentally intersectionality claims that not only are people's lived experiences affected by their racial identity and by their gender identity but that these identities and others continually operate together and affect each other With official statistical data that indicate people of Color have higher offending and victimization rates than White people and with the overrepresentation of men and people of Color in the criminal legal system new theories are required that address these phenomena and that are devoid of stereotypical or debasing underpinnings Intersectionality and Criminology provides a comprehensive review of the need for and use of intersectionality in the study of crime criminality and the criminal legal system This is essential reading for academics and students researching and studying in the fields of crime criminal justice theoretical criminology and gender race and socioeconomic class **Policing and Media** Murray Lee, Alyce McGovern, 2013-11-26 This book examines the relationship between police media and the public and analyses the shifting techniques and technologies through which they communicate In a critical discussion of contemporary and emerging modes of mediatized police work Lee and McGovern demonstrate how the police engage with the public through a fluid and quickly expanding assemblage of communications and

information technologies Policing and Media explores the rationalities that are driving police media relations and asks how these relationships differ or not from the ways they have operated historically what new technologies are influencing and being deployed by policing organizations and police public relations professionals and why how operational policing is shaping and being shaped by new technologies of communication and what forms of resistance are evident to the manufacture of preferred images of police The authors suggest that new forms of simulated and hyper real policing using platforms such as social media and reality television are increasingly positioning police organisations as media organisations and in some cases enabling police to bypass the traditional media altogether The book is informed by empirical research spanning ten years in this field and includes chapters on journalism and police policing and social media policing and reality television and policing resistances It will be of interest to those researching and teaching in the fields of Criminology Policing and Media as well as police and media professionals Rural Criminology Joseph Donnermeyer, Walter

DeKeseredy, 2013-10-15 Rural crime is a fast growing area of interest among scholars in criminology From studies of agricultural crime in Australia to violence against women in Appalachia America to poaching in Uganda to land theft in Brazil the criminology community has come to recognize that crime manifests itself in rural localities in ways that both conform to and challenge conventional theory and research For the first time Rural Criminology brings together contemporary research and conceptual considerations to synthesize rural crime studies from a critical perspective This book dispels four rural crime myths challenging conventional criminological theories about crime in general It also examines both the historical development of rural crime scholarship recent research and conceptual developments The third chapter recreates the critical in the rural criminology literature through discussions of three important topics community characteristics and rural crime drug use production and trafficking in the rural context and agricultural crime Never before has rural crime been examined comprehensively using any kind of theoretical approach whether critical or otherwise Rural Criminology does both pulling together in one short volume the diverse array of empirical research under the theoretical umbrella of a critical perspective This book will be of interest to those studying or researching in the fields of rural crime critical criminology and sociology

provides an analysis of the two concepts of power and crime and posits that criminologists can learn more about these concepts by incorporating ideas from disciplines outside of criminology Although arguably a rendezvous discipline Vincenzo Ruggiero argues that criminology can gain much insight from other fields such as the political sciences ethics social theory critical legal studies economic theory and classical literature In this book Ruggiero offers an authoritative synthesis of a range of intellectual conceptions of crime and power drawing on the works and theories of classical as well as contemporary thinkers in the above fields of knowledge arguing that criminology can humbly renounce claims to intellectual independence and adopt notions and perspectives from other disciplines The theories presented locate the crimes of the powerful in different disciplinary contexts and make the book essential reading for academics and students involved in the study of criminology sociology law politics and philosophy

Youth Street Gangs David C. Brotherton, 2015-04-24 Gangs have been heavily pathologized in the last several decades In comparison to the pioneering Chicago School's work on gangs in the 1920s we have moved away from a humanistic appraisal of and sensitivity toward the phenomenon and have allowed the gang to become a highly plastic folk devil outside of history This pathologization of the gang has particularly negative consequences for democracy in an age of punishment cruelty and coercive social control This is the central thesis of David Brotherton's new and highly contentious book on street gangs Drawing on a wealth of highly acclaimed original research Brotherton explores the socially layered practices of street gangs including community movements cultural projects and sites of social resistance The book also critically reviews gang theory and the geographical trajectories of streets gangs from New York and Puerto Rico to Europe the Caribbean and South America as well as state sponsored reactions and the enabling role of orthodox criminology In opposition to the dominant gang discourses Brotherton proposes the development of a critical studies approach to gangs and concludes by making a plea for researchers to engage the gang reflexively paying attention to the contradictory agency of the gang and what gang members actually tell us The book is essential reading for academics and students involved in the study of juvenile delinquency youth studies deviance gang studies and cultural criminology
