Getting to the Core of

Literacy for History/Social Studies, Science, and Technical Subjects, Grades 6–12 Vicky Giouroukakis, Maureen Connolly, 2013-05-14 Literacy is not just for English teachers anymore. The new Common Core English Language Arts Standards aren't just for English teachers. Fluent reading and writing are critically important to the study of history, social studies, science, and technical subjects too. What's more, the progress your students make is directly tied to their ability to process information they read and to express their ideas in writing. So how do you make literacy a focus of your teaching without taking time away from essential content? This practical resource, packed with teacher-tested CCSS-based sample lessons, shows you how using the Backward Design approach to set and meet your goals. Each lesson template includes the teaching strategies you'll utilize, ways to incorporate technology and media, variations for differentiation and interdisciplinary connections, links to the work of major educational theorists. Following these models, you'll set the CCSS in your sights and develop lessons that both meet standards and fit your classroom. Before you know it, you'll be infusing reading and writing across your curriculum in purposeful and meaningful ways.

Adolescent Literacy in the Academic Disciplines Tamara L. Jetton, Cynthia Shanahan, 2012-01-25 From leading authorities in both adolescent literacy and content area teaching, this book addresses the particular challenges of literacy learning in each of the major academic disciplines. Chapters focus on how to help students successfully engage with texts and ideas in English, literature, science, math, history, and arts classrooms. The book shows that while general strategies for reading informational texts are essential, they are not enough; students also need to learn processing strategies that are quite specific to each subject and its typical tasks or problems. Vignettes from exemplary classrooms illustrate research-based ways to build content area knowledge while targeting essential reading and writing skills.

Teaching Civic Literacy Projects Shira Eve Epstein, 2014-09-01 This practical resource shows teachers how to enact robust forms of civic education in today's schools. Both instructive and thought-provoking, it will inspire teachers to craft curricula addressing a wide range of genuine civic problems, such as those related to racial discrimination, environmental damage, and community health. Dividing civic literacy projects into three key phases: problem identification, problem exploration, and action, the author provides concrete examples from upper elementary, middle, and high school classrooms to illustrate and analyze how each phase can unfold. The projects ultimately provide opportunities for youth to participate in civic life while they develop essential literacy skills associated with reading, writing, and speaking. The final chapter outlines a curriculum design process that will result in coherent and meaningful civic literacy projects driven by clear goals. It includes practical tools such as a sample unit timeline, an assessment chart, and student worksheets that can be modified for immediate use.
