Content Management George Pullman,Gu Baotung,2017-03-02 This collection of articles is the first attempt by academics and professional writers to delve into the world of content management systems The knowledge economy s greatest asset and primary problem is information management finding it validating it re purposing it keeping it current and keeping it safe In the last few years content management software has become as common as word processing software was five years ago But unlike word processors which are designed for single authorization and local storage content management systems are designed to accommodate large scale information production with many authors providing many different pieces of information kept in a web accessible database any piece of which might find its way into electronic documents that the author doesn t even know exist These software systems are complex to say the least and their impact on the field of writing will be immense

Libraries in the Twenty-First Century

Stuart J. Ferguson, 2007-05-31 *Libraries in the Twenty First Century* brings together library educators and practitioners to provide a scholarly yet accessible overview of library and information management and the challenges that the twenty first century offers the information profession. The papers in this collection illustrate the changing nature of the library as it evolves into its twenty first century manifestation. The national libraries of Australia and New Zealand for instance have harnessed information and communication technologies to create institutions that are far more national even democratic in terms of delivery of service and sheer presence than their print based predecessors. Aimed at practitioners and students alike, this publication covers specific types of library and information agencies, discusses specific aspects of library and information management and places developments in library and information services in a number of broad contexts: socio-economic, ethico-legal, historical and educational.
