Gluck, Katherine Kraschel, Carmel
Shachar**

Contested Spaces Abortion Clinics Womens Shelters And Hospitals Politicizing The Female Body:

Contested Spaces: Abortion Clinics, Women's Shelters and Hospitals Lori A. Brown, 2016-05-13 In this book Lori Brown examines the relationship between space defined physically legally and legislatively and how these factors directly impact the spaces of abortion It analyzes how various political entities shape the physical landscapes of inclusion and exclusion to reproductive healthcare access and questions what architecture s responsibilities are in respect to this spatial conflict Employing writing drawing and mapping methodologies this interdisciplinary project explores restrictions and legislatures which directly influence abortion policy in the US Mexico and Canada It questions how these legal rulings produce spatial complexities and why architecture isn t more culturally and spatially engaged with these spaces In Mexico where abortion is fully legal only in Mexico City during the first trimester women must travel vast distances and undergo extreme conditions in order to access the procedure Conservative state governments continue to make abortion a severely punishable crime In Canada there are nowhere near the cultural and religious stigmas to abortion as in the US and Mexico Completely legal and without restrictions Canada offers an important contrast to the ongoing abortion issues within the US and Mexico Researching the spatial implications of such a politicized space this book expands beyond a study of abortion clinic and includes other spaces such as women s shelters and hospitals that require multiple levels of secured spaces in order to discuss the spatial ramifications of access and security within spaces that are highly personal private and sometimes secret or even hidden In questioning what architecture s responsibility is in these spatial conflicts the book looks at how what architecture does can be used to reconsider the spaces and security around such contested places and ultimately suggests what design s potential impact might be In doing so it shows how architecture s role might be redefined within social and spatial practices

Obstacle Course David S. Cohen, Carole Joffe, 2020-02-18 It seems unthinkable that citizens of one of the most powerful nations in the world must risk their lives and livelihoods in the search for access to necessary health care And yet it is no surprise that in many places throughout the United States getting an abortion can be a monumental challenge Anti choice politicians and activists have worked tirelessly to impose needless restrictions on this straightforward medical procedure that at best delay it and at worst create medical risks and deny women their constitutionally protected right to choose Obstacle Course tells the story of abortion in America capturing a disturbing reality of insurmountable barriers people face when trying to exercise their legal rights to medical services Authors David S Cohen and Carole Joffe lay bare the often arduous and unnecessarily burdensome process of terminating a pregnancy the sabotaged decision making clinics in remote locations insurance bans harassing protesters forced ultrasounds and dishonest medical information arbitrary waiting periods and unjustified procedure limitations Based on patients stories as well as interviews with abortion providers and allies from every state in the country Obstacle Course reveals the unstoppable determination required of women in the pursuit of reproductive autonomy as well as the incredible commitment of abortion providers Without the efforts of an

unheralded army of medical professionals clinic administrators counselors activists and volunteers what is a legal right would be meaningless for the almost one million people per year who get abortions There is a better way treating abortion like any other form of health care but the United States is a long way from that ideal *The Routledge Companion to Women in Architecture* Anna Sokolina,2021-06-28 The Routledge Companion to Women in Architecture illuminates the names of pioneering women who over time continue to foster shape and build cultural spiritual and physical environments in diverse regions around the globe It uncovers the remarkable evolution of women s leadership professional perspectives craftsmanship and scholarship in architecture from the preindustrial age to the present The book is organized chronologically in five parts outlining the stages of women s expanding engagement leadership and contributions to architecture through the centuries It contains twenty nine chapters written by thirty three recognized scholars committed to probing broader topographies across time and place and presenting portraits of practicing architects leaders teachers writers critics and other kinds of professionals in the built environment The intertwined research sets out debates questions and projects around women in architecture stimulates broader studies and discussions in emerging areas and becomes a catalyst for academic programs and future publications on the subject The novelty of this volume is in presenting not only a collection of case studies but in broadening the discipline by advancing an incisive overview of the topic as a whole It is an invaluable resource for architectural historians academics students and professionals *The Routledge Companion to Gender and Borderlands* Zalfa Feghali,Deborah Toner,2024-10-23 The Routledge Companion to Gender and Borderlands maps the relationship between gender and borderlands at a global scale and sets the agenda for developing a global composite field of gender and borderlands studies This interdisciplinary collection seeks to understand the complex nexus at which gender and the borderlands intersect modelling radical relationality at epistemological ontological and activist levels Going beyond border studies frequent site at the U S Mexico Border this book examines the power relations of borderlands as they play out in influence and reflect gender dynamics Contributors draw on case studies from around the world and their chapters span diverse fields from anthropology literature and history to political science religious studies sociology and the arts The Routledge Companion to Gender and Borderlands is an indispensable resource for scholars and students engaged in border studies gender studies and the wide range of interlocking disciplines that inform and enrich these fields Chapters 1 15 and 20 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY 4 0 license *Reproductive Rights Issues in Popular Media* Waltraud Maierhofer,Beth Widmaier Capo,2017-07-07 No woman can call herself free who does not own and control her body Almost a century after Margaret Sanger wrote these words women s reproductive rights are still hotly debated in the press and among policymakers while film television and other media address issues of birth control and abortion to global audiences This collection of new essays brings fresh perspectives to the study of family planning contraception and abortion

with a focus on their representation in popular media Topics include dramas of adoption and abortion telling the story of the pill Sanger s depiction in entertainment media and a controversy about demographic developments stirred by Carl Djerassi also known as the father of the pill Contentious Cities Jess Berry,Timothy Moore,Nicole Kalms,Gene Bawden,2020-11-29 Contentious Cities offers unique interdisciplinary approaches to understanding gendered spatial equity in the urban environment Positioning design as a central component in how cities produce construct represent and materialise gendered spatial practices it brings together practice and theory to critique question and enable solutions that challenge the root causes of gender inequalities in cities Through a rich array of case studies practice led interventions and historical and theoretical perspectives it examines important issues that affect the ways in which women and people of diverse gender and sexual identities experience and participate in cities Thematically organised it considers problems of street harassment heterosexualisation and equity in access and mobility together with modes of segregation isolation and discrimination as well as processes of resistance intervention and agency Grounded in feminist and queer methods of analysis the book offers new insights regarding the representation of cities the lived experience of cities and how design tactics and approaches might affect the ways cities shape and regulate how women and people of diverse gender and sexual identity inhabit occupy and move through the city An examination of the ways in which design might shift toward safer and more inclusive cities Contentious Cities will appeal to scholars of sociology gender studies and urban studies as well as those working in the fields of urban planning and design **COVID-19 and the Law** I. Glenn Cohen,Abbe R. Gluck,Katherine Kraschel,Carmel Shachar,2023-11-09 The COVID 19 pandemic has had an enduring effect across the entire spectrum of law and policy in areas ranging from health equity and racial justice to constitutional law the law of prisons federal benefit programs election law and much more This collection provides a critical reflection on what changes the pandemic has already introduced and what its legacy may be Chapters evaluate how healthcare and government institutions have succeeded and failed during this global stress test and explore how the US and the world will move forward to ensure we are better prepared for future pandemics This timely volume identifies the right questions to ask as we take stock of pandemic realities and provides guidance for the many stakeholders of COVID 19 s legal legacy This book is also available as Open Access on Cambridge Core **New Books on Women and Feminism** ,2015 **Contested Spaces: Abortion Clinics, Women's Shelters and Hospitals** Dr Lori A Brown,2013-06-28 In this book Lori Brown examines the relationship between space defined physically legally and legislatively and how these factors directly impact the spaces of abortion It analyzes how various political entities shape the physical landscapes of inclusion and exclusion to reproductive healthcare access and questions what architecture s responsibilities are in respect to this spatial conflict Employing writing drawing and mapping methodologies this interdisciplinary project explores restrictions and legislatures which directly influence abortion policy in the US Mexico and Canada It questions how these legal rulings produce spatial complexities and why architecture isn t more culturally and

spatially engaged with these spaces In Mexico where abortion is fully legal only in Mexico City during the first trimester women must travel vast distances and undergo extreme conditions in order to access the procedure Conservative state governments continue to make abortion a severely punishable crime In Canada there are nowhere near the cultural and religious stigmas to abortion as in the US and Mexico Completely legal and without restrictions Canada offers an important contrast to the ongoing abortion issues within the US and Mexico Researching the spatial implications of such a politicized space this book expands beyond a study of abortion clinic and includes other spaces such as women s shelters and hospitals that require multiple levels of secured spaces in order to discuss the spatial ramifications of access and security within spaces that are highly personal private and sometimes secret or even hidden In questioning what architecture s responsibility is in these spatial conflicts the book looks at how what architecture does can be used to reconsider the spaces and security around such contested places and ultimately suggests what design s potential impact might be In doing so it shows how architecture s role might be redefined within social and spatial practices
