

A man with dark hair, wearing a dark shirt, is shown from the chest up. He is looking down and slightly to the right, with his right hand resting on his head. The background is dark and out of focus. Overlaid on the image is the text "Contigo en la Distancia" in a white, elegant script font. The text is split into two lines: "Contigo en la" on the top line and "Distancia" on the bottom line. The word "Distancia" is slightly larger and more prominent than the first line.

The Access to Subjectivity Cesar Ojeda, 2023-04-14 This book explores the conceptual and practical connections that exist between phenomenology Buddhism and psychotherapy These three disciplines clearly have completely different origins histories conceptualizations and academic environments and at first blush there seems to be no real bond between them However this book shows that there are connections between these diverse approaches but they have the peculiar character of being latent and hidden Thus phenomenology and the practice of mindfulness share a similar though perhaps not explicit goal to exclude the ego Notwithstanding this connection they approach this task from quite separate roads each of which conceals this implicit goal giving the impression that both disciplines are irreducible and disconnected as if they were completely distinct and closed systems

The Returned Claudia Masferrer, Erin R. Hamilton, Nicole Denier, 2024-03-21 In the first two decades of the 21st century more than two million Mexican migrants returned to Mexico from the United States Between 2010 and 2020 the number of people who returned to Mexico was so large that for the first time in at least fifty years more people entered Mexico from the United States than entered the United States from Mexico Many of these migrants were destined for urban areas and we know little about how they fare after they return to cities In The Returned sociologists Claudia Masferrer Erin R Hamilton and Nicole Denier examine the experiences of returned migrants in Mexico City one of the largest metropolitan areas in the world Masferrer Hamilton and Denier draw on interviews with former U S migrants living in Mexico City to better understand the experience of return migration to urban areas Each of the migrants they spoke with lived in the United States for long periods with noncitizen status during the last four decades During this time U S immigration policy became increasingly focused on restriction and enforcement which made it difficult for migrants to safely move back and forth across the border for work or to visit family without documentation The authors find that upon their return migrants in Mexico City felt disoriented and lost and had difficulty adapting to a massive urban environment where there is little support for returnees They struggled to translate their work experience from their time in the U S to find quality jobs Additionally many found their family lives upended as they reunited with or formed families in the U S Some found themselves separated from family members still in the U S with no ability to legally visit them Others brought their families back to Mexico some of whom were U S citizens and had never been to Mexico before They too struggled to adapt and integrate to life in Mexico City The authors use the experiences of return migrants to discuss policies and practices that would improve their lives and ease their reintegration To help with the disorientation they experience returnees proposed ongoing psychological support with mental health professionals who have

knowledge and training in the social and legal issues that return migrants face Return migrants also advocated for policies to enhance skill matching job creation and entrepreneurship as many felt the occupational skills they developed in the U S were undervalued in Mexico To address family separation returnees argued for legal and policy reform to accommodate family reunification The Returned is an illuminating account of the difficulties faced by return migrants and their families in Mexico City

Revisiting Language Learning Resources Carlos Periñán Pascual,2009-03-26 Human and material resources are two key elements that make up the language learning process Regarding material resources nowadays new technologies can be said to play a leading role in most language learning environments However we cannot forget that these relatively new tools still coexist with more traditional ones which are still widely used in the foreign language classroom On the other hand the progressive emergence of new human roles in language learning means that human resources have also become a key medium through which the learner accesses knowledge and practice towards language acquisition There is an obvious need to carry out research on these resources in order to assess their potential for an optimum learning experience This book tries to meet such needs offering the research work that different authors have carried out in this field

The Civil Sphere in Latin America Jeffrey C. Alexander,Carlo Tognato,2018-05-03 Social thinkers have criticized Latin American development as incomplete backward and anti modern This volume demonstrates that while often deeply compromised and fragmented Latin American civil spheres have remained resilient institutionally and culturally generating new oppositional movements independent journalism rebellious intellectuals electoral power and critical political parties In widely different arenas dissidents have

employed the coruscating language of the civil sphere to pollute their oppressors in the name of justice In the 1970s and 1980s political thinkers heralded the resurrection of Latin American civil society envisioning a new world of freedom and stability Corruption inequality racism and exclusion become pressing and urgent social problems not despite the promises of democracy but because of them The premise of this volume is that Latin American civil spheres are powerful even as they are compromised creating challenges to anti civil culture and institutions that trigger social reform It is the first of three volumes that place civil sphere theory in a global context
