A Catalogue of Geography, Voyages, Travels, History of America, Africa, Australasia and Asia Bernard Quaritch,Quaritch (Londres).,1899 *Bibliography of Natural History Travel Narratives* Anne S. Troelstra,2017-06-01 Anne Troelstra s fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra s work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication

under the author's name. A brief biography with the scope and range of their work is given for each author. Every title is set in context; the contents, including illustrations, are described, and all known editions and translations are cited. In addition, there is a geographical index that cross-refers between authors and the regions visited, and a full list of the bibliographical and biographical sources used in compiling the bibliography. Asia in the Making of Europe, Volume III Donald F. Lach, Edwin J. Van Kley, 2022-07-01. This monumental series, acclaimed as a masterpiece of comprehensive scholarship in the New York Times Book Review, reveals the impact of Asia's high civilizations on the development of modern Western society. The authors examine the ways in which European encounters with Asia have altered the development of Western society in art, literature, science, and religion since the Renaissance. In Volume III, *A Century of Advance*, the authors have researched seventeenth-century European writings on Asia in an effort to understand how contemporaries saw Asian societies and peoples.

Science, Literature and Rhetoric in Early Modern England Juliet Cummins, David Burchell, 2007. These essays throw new light on the complex relations between science, literature, and rhetoric as avenues to discovery in early modern England. Analyzing the contributions of such diverse writers as Shakespeare, Bacon, Hobbes, Milton, Cavendish, Boyle, Pope, and Behn to contemporary epistemological debates, these essays move us toward a better understanding of interactions between the sciences and the humanities during a seminal phase in the development of modern Western thought. **Sale Catalogues** American Art Association, Anderson Galleries (Firm), inc. Representations of Violence in the Eighteenth-Century Pacific Sandhya Patel, 2024-11-26. This book explores representations of the extensive violence that characterised British exploratory and colonising forays into the Pacific Ocean in the long eighteenth century, both between Europeans and Indigenous peoples and amongst Europeans themselves. It explores how navigators, alongside powerful commissioning bodies and editors, depicted violence in manuscripts, published texts, and iconographies as the British negotiated competing colonial claims to Pacific spaces. In so doing, it identifies recurring and reproductive constructions of violence underpinning legitimizing imperial narratives. **A Catalogue of Geography Voyages** Bernard Quaritch (Firm), 1895. *A Catalogue of Geography, Voyages, Travels, Americana* Bernard Quaritch, 1895. *The Pirate who Stole Scotland* Leon Hopkins, 2023-01-24. Economic warfare is not a new phenomenon. In the protectionist climate of the seventeenth century, trade embargoes, exclusions, and boycotts were common. England was among the most active nations when it came to using economic clout to get its own way. It did so to force Scotland to accept an Act of Union to submerge its independence within a United Kingdom governed from London. Instrumental in this attack upon the Scots was William Dampier, the principal subject of this book. He was an extraordinary man: a farmer's son, he became the most traveled man of his generation. He was a pirate, a brute, and a devious sociopath. But he was also a scientist and a talented writer who gave his readers accurate descriptions of previously unknown places, peoples, plants, and animals. He was a daring explorer and an expert navigator who mapped coastlines and logged wind patterns and ocean currents. He

led the first Royal Navy expedition to Australia over 70 years before Captain Cook's arrival. Dampier's writing made him famous but not rich. It allowed him to rub shoulders with the leading men of his day: scientists such as Robert Hooke, Edmund Halley and Hans Sloane; businessmen such as Sir John Houblon, first governor of the Bank of England, and William Paterson; politicians such as James Vernon and Charles Montagu, first Earl of Halifax; and Admiralty men such as Admiral Sir George Rooke and Samuel Pepys. And Dampier was in the pay of the English Government, an agent known to Queen Anne in which capacity he engineered a financial disaster and political drubbing for Scotland. A Preface to Swift Keith Crook, 2014-07-15

Jonathan Swift's moral and political satires astonished his contemporaries and still have the power to disturb with their compelling images and unsettling turns of argument and to delight with their charm and inventive wit. A Preface to Swift examines the complex appeal of this fierce critic of oppression. While thematically arranged, the text follows a broadly chronological account of Swift's life to show his development as a writer from the prolific and inventive iconoclast to the mature satirist whose enduring memory of past events produced warm friendship as well as strong resentment. It considers in detail his engagement with the corruption of over-secure politicians and his opposition to the easy rationalism of free-thinking pundits. *Gulliver's Travels* is shown to be a coherent critique of eighteenth-century ideas of science, education and politics in which the order of the books, the progress of the fable, is highly significant for its whole meaning. While this is a major focus, Keith Crook also discusses a wide range of Swift's other works, including his early satires, his political writings, his poems and his letters. Detailed chronological charts place his life and works in the political and cultural context, and illustrations have been chosen with commentaries to extend the reader's sense of Swift's connections with London, Ireland and his contemporaries. This will be a particularly useful introduction to students who are studying satire as a genre, the early eighteenth-century literary, scientific, philosophical and political context, the representation of women, the political relation of Ireland to England and the position of the artist within society, especially in connection with the levers of power.
