Although the law on infringement is relatively straightforward in relation to the copying of literal and textual elements of software, it is the copying of non-literal and functional elements that poses complex and topical questions in the context of intellectual property (IP) protection. In many cases, it is these non-literal and functional elements that contain the real value of a software product. This book concerns the copying of non-literal and functional elements of software in both the United States and European Union, using a holistic approach to address the most topical questions facing experts concerned with legal protection of software products across a range of technological platforms. The book focuses on six distinct but interrelated areas: contract, copyright, patents, trade dress, designs and trade secrets, discussing these areas separately and in relation to one another. The book discusses software as a multilayered functional product, setting the scene for other legal discussions by highlighting software's unique characteristics. It examines models for the provision of software, addressing licensing patterns and overall enforceability, as well as the statutory and judicial tools for regulating the use of such licences. It assesses the protection of non-literal and functional software elements under EU and US laws, focusing on internal architecture, interfaces, behavioural elements and GUIs. *The Self-Made Myth* Brian Miller, Mike

Lapham, 2012-03-05. Powerful, compelling and well researched, it demolishes what may be the most destructive myth in America. David Korten, author of *Agenda for a New Economy*. *The Self-Made Myth* exposes the false claim that business success is the result of heroic individual effort with little or no outside help. Brian Miller and Mike Lapham not only bust the myth, they present profiles of business leaders who recognize the public investments and supports that made their success possible, including Warren Buffett, Ben Cohen of Ben and Jerry's, New Belgium Brewing CEO Kim Jordan and others. The book also thoroughly demolishes the claims of supposedly self-made individuals such as Donald Trump and Ross Perot. How we view the creation of wealth and individual success is critical because it shapes our choices on taxes, regulation, public investments in schools and infrastructure, CEO pay and more. It takes a village to raise a business, and it's time to recognize that fact.

Franchising Stephen Spinelli, Robert Rosenberg, Sue Birley, 2004. Hundreds of potential entrepreneurs investigate franchising every year, but this enormous business opportunity remains hugely misunderstood. *Franchising: Pathway to Wealth Creation* delivers that guidance from start to finish.
