The Dramatic Works and Poems of William Shakespeare William Shakespeare, 1841 **A Lover's**

Discourse Roland Barthes, 1978 Barthes's most popular and unusual performance as a writer is *A Lover's Discourse*, a writing out of the discourse of love. This language primarily the complaints and reflections of the lover when alone, not exchanges of a lover with his or her partner, is unfashionable. Though it is spoken by millions of people diffused in our popular romances and television programs as well as in serious literature, there is no institution that explores, maintains, modifies, judges, repeats, and otherwise assumes responsibility for this discourse. Writing out the figures of a neglected discourse, Barthes surprises us in *A Lover's Discourse* by making love in its most absurd and sentimental forms an object of interest. Jonathan Culler

[The Lever of Riches](#) Joel Mokyr, 1992-04-09 In a world of supercomputers, genetic engineering, and fiber optics, technological creativity is ever more the key to economic success. But why are some nations more creative than others, and why do some highly innovative societies, such as ancient China or Britain in the industrial revolution, pass into stagnation? Beginning with a fascinating concise history of technological progress, Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome. What emerges from this survey is often surprising: the classical world, for instance, was largely barren of new technology; the relatively backward society of medieval Europe bristled with inventions; and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution. What were the causes of technological creativity? Mokyr distinguishes between the relationship of inventors and their physical environment, which determined their willingness to challenge nature, and the social environment, which determined the openness to new ideas. He discusses a long list of such factors, showing how they interact to help or hinder a nation's creativity, and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China, between classical antiquity and medieval Europe, and between Britain and the rest of Europe during the industrial revolution. He examines such aspects as the role of the state

the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential Audio Catalog Suburban Audio Visual Service (La Grange, Ill.), **This Is My Best** Retha Powers,Kathy Kiernan,2005-05-05 Some of the world s most acclaimed writers including novelists essayists poets playwrights and cartoonists share what they consider their finest works accompanied by incisive commentary by each author on the work and the creative process
