## **Cane Toads A Tale Of Sugar Politics And Flawed Science:**

**Cane toads** Nigel Turvey, 2013-10-11 Before the birth of modern insecticides farmers and gardeners used predatory and parasitic wasps and flies insect eating birds lizards and toads as agents of biological control In the late 19th century sugar cane scientists carried cane toads from Barbados to Puerto Rico to Hawai i and then Queensland to control pests Toads were introduced to some 138 countries and are now ranked among the world s most invasive species Queensland s sugar scientists released the toad into cane fields in 1935 They were supported by cane growers politicians the nation s leading scientists the premier of Queensland and the prime minister of Australia Only a lone voice objected In the following 70 years they spread as far as western NSW and Western Australia This story is about good intentions unintended consequences and of simple acts leading to catastrophic outcomes It is about scientists so committed to solving a problem serving their country their leaders and the industry that employed them that they are blinkered to adverse impacts There are lessons to learn from the toad s tale And as the tale shows we still come perilously close to repeating the mistakes of the past **Cane Toads** Nigel D

Turvey, 2013 *Cane Toad Wars* Richard Shine, 2018-03-20 For 80 years giant American amphibians have been spreading through tropical Australia resulting in the death of millions of native animals Rick Shine and his research team set out to understand that invasion and its impacts and to develop new ways of protecting endangered wildlife from the tide of toads In the process Shine s work revealed that biological invasions can stimulate rapid evolutionary change and that understanding your enemy is the essential first step in combatting its deadly effects Provided by publisher **Biological Invasions in**

**Changing Ecosystems** João Canning-Clode, 2015-01-01 When organisms are deliberately or accidentally introduced into a new ecosystem a biological invasion may take place These so called invasive species may establish spread and ecologically alter the invaded community Biological invasions by animals plants pathogens or vectors are one of the greatest environmental and economic threats and along with habitat destruction a leading cause of global biodiversity loss In this book more than 50 worldwide invasion scientists cover our current understanding of biological invasions its impacts patterns and mechanisms in both aquatic and terrestrial systems *Before Environmental Law* Benjamin J Richardson, 2023-10-05 This landmark open access book unveils the history of defending Australia s natural environment and examines the subject s legal and political contexts from the birth of the nation in 1901 until the advent of the so called modern era of environmental regulation in the late 1960s It rejects the mythology that Australia lacked environmental law before the late 1960s in revealing how many of today s environmental laws from pollution control to nature conservation emerged from precedents or events much earlier in the 20th century This history however reveals a discrepancy between lawmakers greater efficacy to exploit rather than protect the environment a discrepancy that grew as nature s backlash intensified in a rapidly degrading continent colonised to build the Australian nation In exploring these dynamics the book offers a rich tapestry of case studies illustrated with historic photographs that show the origins of Australia s environmental laws and how they borrowed from

international precedents or furnished lessons for other nations Through its multi disciplinary enquiry the book offers scholars and students of environmental law legal history and the environmental humanities a unique story about the failures and successes in the making of environmental law The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on bloomsburycollections com      **Animal Activism On and Off Screen** Claire Parkinson,Lara

Herring,2024-07-01 Animal Activism On and Off Screen examines the relationship between animal advocacy and the film and television industries Leading scholars activists and film industry professionals critically analyse the ways in which animal activism has been represented inside and outside film and television programs in relation to the politics of celebrity vegan and animal activism Case studies include UK US and German television crime fiction feature length advocacy documentaries such as Blackfish 2013 The Ghosts in Our Machine 2013 The Animal People 2019 and Meat the Future 2020 fiction films such as Okja 2017 and Cloud Atlas 2012 as well as celebrity chefs French activism and celebrity activists Pamela Anderson Joaquin Phoenix and James Cromwell By exploring three key aspects of the current context for animal rights representations of activism on screen activist texts and their reception and celebrity vegans and animal advocates Animal Activism On and Off Screen evaluates the efficacy of advocacy narratives in film and on television and offers important insights intended to inform animal advocacy strategies and campaigns      **The Climate Crisis and Other Animals** Richard Twine,2024-03-01

The Climate Crisis and Other Animals is a must read for anyone who cares about the future of our planet and the animals who live on it Twine examines the impact of the climate crisis on nonhuman animals and argues for the importance of a climate and food justice movement inclusive of nonhuman animals The book examines the ways in which climate breakdown is affecting nonhuman animal species and delves deeply into the politicised controversy over the extent of emissions from animal agriculture demonstrating the markedly lower emissions of eating vegan Critical of misguided human centred framings of the climate crisis Twine makes clear the necessity of including practices of animal commodification the importance of documenting the effect of a changing climate on other animal species and the mitigative opportunities of a radical remaking of dominant human animal relations The Climate Crisis and Other Animals addresses the emissions impacts of radical land use changes and the twentieth century scaling up of animal commodification within the animal industrial complex revealing how this system is interwoven in the gendered and racialised histories of capitalism Twine collates an impressive body of scientific research that demonstrate both the already enormous impact of the climate crisis on the lives of nonhuman animals and the need to tackle the dominance of meat based cultures Twine critically explores approaches to food transition and three potentially transformative scenarios for global food systems that could help dismantle the animal industrial complex and create a more sustainable and just food system Averting the climate and biodiversity crises requires nothing less than a radical transformation in how we see ourselves in relation to other species      **Australian Animal Law**

Elizabeth Ellis,2022-07-01 Australian Animal Law Context and Critique provides comprehensive information about the legal

and regulatory framework governing the interaction between humans and animals By relating specific content areas to the discipline s broader characteristics and themes researcher Elizabeth Ellis exposes the systemic nature of current problems and the consequent need for significant change This book also illustrates the role of official animal protection narratives in legitimising the existing system despite the many factual flaws they contain Ellis covers the major areas of animal law in detail incorporating accessible contextual material and allowing readers to consolidate their understanding and build upon their knowledge Key areas include the concept of unnecessary animal suffering the effective exemption of most animals from the operation of cruelty laws regulatory conflicts of interest the hidden nature of animal use and the lack of transparency in animal law *Australian Animal Law* is an essential resource inviting reflection on the way the law helps to construct the relationship between human and non human animals including through its silences and omissions

**Animal Welfare in China** Peter J. Li, 2021-03-01 Peter J Li s pathbreaking new book *Animal Welfare in China* is timely and valuable ANTHROZO S The plight of animals in China has attracted intense interest in recent times Since the outbreak of COVID 19 speculation about the origins of the virus have sparked global curiosity Speculation about the origins of COVID 19 has sparked curiosity about how animals are treated traded and consumed in China today In *Animal*

Welfare in China Peter Li explores the key animal welfare challenges facing China now including animal agriculture bear farming and the trade and consumption of exotic wildlife dog meat and other controversial products He considers how Chinese policymakers have approached these issues and speaks with activists from China's growing animal rights movement Li also offers an overview of the history of animal welfare in China from ancient times through the enormous changes of the 20th and 21st centuries Some practices that are today described as traditional he argues are in fact quite recent developments reflecting the contemporary pursuit of economic growth rather than long standing cultural traditions Based on years of fieldwork and analysis *Animal Welfare in China* makes a compelling case for a more nuanced and evidence based approach to these complex issues *Sea and Land* Philip D. Morgan, John Robert McNeill, Matthew Mulcahy, Stuart B. Schwartz, 2022 The first comprehensive environmental synthesis of the Caribbean region written by eminent scholars of the topic *Animal Dreams* David Brooks, 2021-04-01 *Animal Dreams* collects David Brooks thought provoking essays about how humans think dream and write about other species Brooks examines how animals have featured in Australian and international literature and culture from *The Man from Snowy River* to Rainer Maria Rilke and *The Turin Horse* to live animal exports veganism and the culling of native and non native species In his piercing elegant widely celebrated style he considers how private and public conversations about animals reflect older and deeper attitudes to our own and other species and what questions we must ask to move these conversations forward in what he calls the immense work of undoing For readers interested in animal welfare conservation and the relationship between humans and other species *Animal Dreams* will be an essential richly rewarding companion Praise for *Animal Dreams* one of Australia's most skilled unusual and versatile writers Peter Pierce *The Sydney Morning Herald* No one writes about animals like David Brooks Jeffrey Moussaieff Masson author of *The Assault on Truth When Elephants Weep* and *Lost Companions* Beautifully written and emotionally and intellectually enthralling The best book I have ever read on relations between humans and animals and the redress we owe them It makes you angry it makes you weep it makes you determined to rethink and to act Helen Tiffin FAHA co author of *The Empire Writes Back* and *Wild Man from Borneo A Cultural History of the Orangutan* *Animal Welfare in Australia* Peter John Chen, 2016-10-10 The issue of animal welfare has attracted much attention in Australia in recent decades Activists and welfare organisations have become increasingly vigorous in promoting a new ethical relationship between humans and animals and in challenging practices they identify as inhumane In 2011 this agitation culminated in the temporary suspension of cattle live exports with significant economic and political implications for Australia Similar campaigns have focused on domestic food production systems and the use of animals in entertainment Yet despite this increased interest the policy process remains poorly understood *Animal Welfare in Australia* is the first Australian book to examine the topic in a systematic manner Without taking a specific ethical position Chen draws on a wide range of sources including activists industry representatives and policy makers to explain how policy is made and implemented He explores the history of animal

welfare in Australia examines public opinion and media coverage of key issues and comprehensively maps the policy domain. He shows how diverse social, ethical and economic interests interact to produce a complex and unpredictable climate. *Animal Welfare in Australia* will be of interest to scholars and practitioners of public policy; those interested in issues of animal welfare; and anyone wishing to understand how competing interests interact in the contemporary Australian policy landscape.

**Decolonising Animals** Dr Rick De Vos, 2023-04-01. The lives of non-human animals, their ways of being and seeing their experiences and knowledge, and their relationships with each other, continue to be ignored, discounted, written over and destroyed by anthropocentric practices and endeavours. Within the vestiges of colonialism, this silence and occlusion co-opts and consumes animals physically and culturally into the servitude of human interests and selective narratives of history and progress. *Decolonising Animals* brings together critical interrogations, case studies and creative explorations that identify and examine how non-human animals are affected by and respond to colonial structures and processes. This collection includes the perspectives of Indigenous and non-Indigenous scholars, artists and activists detailing the ways in which they question colonial ways of knowing, engaging with and representing animals. Importantly, the book offers suggestions for how we might decolonise our relationships with non-human animals and with each other.

**Guide to Introduced Pest Animals of Australia** Peter West, 2018-04. Australia's introduced vertebrate pest species cost at least 1 billion annually in economic, environmental and social impacts. *The Guide to Introduced Pest Animals of Australia* is a comprehensive practical guide to 60 introduced pest animal species present in Australia, including 27 mammals, 18 birds, nine freshwater fish, two amphibians and four reptiles. It contains descriptive information to identify each species in the field, including distinctive physical characteristics, size, weight, colouration, diet, breeding behaviour, habitat preferences and information about footprints, dung, scats and audible animal calls. Each species profile is accompanied by practical management information, maps and high-quality photographs, allowing readers to learn about pest species in their local area, what problems they might cause and what control options exist for management. This guide also contains a number of emerging high-risk pest species that may pose a significant threat to our natural environment, economy, agriculture and human health. Whether you are a farmer, natural resource manager, public land manager, pest controller, teacher, student, field naturalist or wildlife ecologist, this easy-to-use guide will help you identify Australia's most significant introduced pest animals in your local area.

**Australian Beetles Volume 2** Adam Slipinski, John Lawrence, 2019-11-01. This three-volume series represents a comprehensive treatment of the beetles of Australia, a relatively under-studied fauna that includes many unusual and unique lineages found nowhere else on Earth. Volume 2 contains 36 chapters providing critical information and identification keys to the genera of the Australian beetle families included in suborders Archostemata, Myxophaga, Adephaga and several groups of Polyphaga: Scirtoidea, Hydrophiloidea, Scarabaeoidea, Buprestoidea and Tenebrionidae. Each chapter is richly illustrated in black and white drawings and photographs. The book also includes colour habitus figures for about 1000 Australian beetle genera and

subgenera belonging to the families treated in this volume This volume is a truly international collaborative effort as the chapters have been written by 23 contributors from Australia China Czech Republic Germany Italy Poland and USA

**Meatsplaining** Jason Hannan, 2020-10-01 The animal agriculture industry like other profit driven industries aggressively seeks to shield itself from public scrutiny To that end it uses a distinct set of rhetorical strategies to deflect criticism These tactics are fundamental to modern animal agriculture but have long evaded critical analysis In this collection academic and activist contributors investigate the many forms of denialism perpetuated by the animal agriculture industry What strategies does the industry use to avoid questions about its inhumane treatment of animals and its impact on the environment and public health What narratives myths and fantasies does it promote to sustain its image in the public imagination powerful timely and essential David Nibert author of *Animal Oppression and Human Violence* *Domesecration Capitalism and Global Conflict* *Meatsplaining* equips us to identify the lies at the heart of animal agriculture It s an excellent and timely compilation on an exceedingly vexing problem Carol J Adams author of *The Sexual Politics of Meat* and *Burger* *Meatsplaining* is the first book to give an apt name to the animal agriculture industry s relentless campaign of disinformation and denialism Written in a clear lively and accessible style *Meatsplaining* will surely educate the public about the horrors of animal agriculture Marc Bekoff author of *The Animals Agenda* *Freedom Compassion and Coexistence in the Human Age* *Cruelty* thrives in secrecy and the meat industry is highly skilled at concealing the routine abuse and misery that flourishes on modern farms *Meatsplaining* cuts through the spin and exposes the meat industry s massive PR machine It explores how Big Meat uses language obfuscation and denial to misdirect the public s attention away from its commodification of sentient animals environmental devastation and the looming health crisis caused by eating animals This book is a must read for animal advocates and anyone else who no longer wants to be lied to Camille Labchuk Executive Director Animal Justice This book provides a necessary corrective to the fantasy world created by meat industry propaganda As we grapple with a global zoonotic pandemic and biodiversity crisis it is urgent for us to start thinking clearly about who and what is on our plates John Sorenson Brock University

**The Flight of Birds** Lobb, Joshua, 2019-02-01 Shortlisted for the Readings Prize for New Australian Fiction in 2019 *The Flight of Birds* is a novel in twelve stories each of them compelled by an encounter between the human and animal worlds The birds in these stories inhabit the same space as humans but they are also apart gliding above us *The Flight of Birds A Novel in Twelve Stories* explores what happens when the two worlds meet Joshua Lobb s stories are at once intimate and expansive grounded in an exquisite sense of place The birds in these stories are variously free and wild native and exotic friendly and hostile Humans see some of them as pets some of them as pests and some of them as food Through a series of encounters between birds and humans the book unfolds as a meditation on grief and loss isolation and depression and the momentary connections that sustain us through them Underpinning these interactions is an awareness of climate change of the violence we do to the living beings around us and of the possibility of transformation *The Flight of Birds* will change how

you think about the planet and humanity's place in it      **Dingo Bold** Rowena Lennox, 2021-01-01 Dingo Bold is a thought provoking exploration of the relationship between people and dingoes. At its heart is Rowena Lennox's encounter with a dingo on the beach on K'gari Fraser Island, a young male she nicknames Bold. Struck by this experience and by the intense, often polarised opinions expressed in public conversations about dingo conservation and control, she sets out to understand the complex relationship between humans and dingoes. Weaving together ecological data, interviews with people connected personally and professionally with K'gari's dingoes, and Lennox's expansive reading of literary, historical, and scientific accounts, Dingo Bold considers what we know about the history of relations between dingoes and humans and what preconceptions shape our attitudes today. Do we see dingoes as native wildlife or feral dogs? Wild or domesticated animals? A tourist attraction or a threat? And how do our answers to these questions shape our interactions with them? Dingo Bold is both a moving memoir of love and loss through Lennox's observations of the natural world and an important contribution to wider conversations about conservation and animal welfare. Combining natural history, Indigenous culture, folklore, memoir, and environmental politics, this is an elegantly written and affectionate tribute to Australia's most maligned and least understood native animal. Jacqueline Kent. Fuelled by empathy, curiosity, and passion, and informed by research, data, and observation, this moving and compelling book speaks to the heart and to the head. Rowena Lennox poses questions about our relationship with dingoes and our role in the natural world that are as bold and lively as her subject. Debra Adelaide.
