- ♦ **With the Main Control dial.** This controls focus, allowing you to choose between One-shot and AI focus mode. One-shot focus mode chooses and locks the focus once the Shutter button is pressed half-way. AI focus mode continuously checks the focus of the chosen focus point (or the automatically chosen focus point) and adjusts continuously as the camera-to-subject distance changes.

- ♦ **With the Quick Control dial.** This controls the motor drive, allowing you to choose between Silent mode, single exposure, slow continuous motor drive, and fast continuous motor drive.

Tip

Silent mode is a particularly useful mode in quiet or sensitive locations, and one that many photographers forget about. It is useful inside places of worship, with sensitive subjects, at high-pressure focused board meetings, and so on.
