Heidegger Sartre and Marcel The key notions like musical subject Schein becoming temporality modalities Dasein transcendence put musical facts in a completely new light and perspectives of interpretation The volume attempts to make explicit what is implicit in every musical interpretation intuition and understanding to explain how compositions and composers talk to us Its analyses are accessible due to the book s universal approach Music is experienced as a language communicating from one subject to another

*Cultures of Colour* Chris Horrocks, 2012-06-01 Colour permeates contemporary visual and material culture and affects our senses beyond the superficial encounter by infiltrating our perceptions and memories and becoming deeply rooted in thought processes that categorise and divide along culturally constructed lines Colour exists as a cultural as well as psycho physical phenomenon and acquires a multitude of meanings within differing historical and cultural contexts The contributors examine how colour becomes imbued with specific symbolic and material meanings that tint our constructions of race gender ideal bodies the relationship of the self to others and of the self to technology and the built environment By highlighting the relationship of colour across media and material culture this volume reveals the complex interplay of cultural connotations discursive practices and socio psychological dynamics of colour in an international context
