Clearer Skies Over China Reconciling Air Quality Climate And Economic Goals:

Clearer Skies Over China Chris P. Nielsen, Mun S. Ho, 2013 Clearer Skies Over China Chris P. Nielsen, Mun S. Ho, 2013-10-18 A groundbreaking U S Chinese inquiry into the effects of recent air pollution controls and prospective carbon taxes on China's economy and environment China's carbon dioxide emissions now outstrip those of other countries and its domestic air quality is severely degraded especially in urban areas Its sheer size and its growing fossil fuel powered economy mean that China's economic and environmental policy choices will have an outsized effect on the global environmental future Over the last decade China has pursued policies that target both fossil fuel use and atmospheric emissions but these efforts have been substantially overwhelmed by the country's increasing energy demands With a billion citizens still living on less than 4 000 per year China's energy and environmental policies must be reconciled with the goals of maintaining economic growth and raising living standards This book a U S Chinese collaboration of experts from Harvard and Tsinghua University offers a groundbreaking integrated analysis of China's economy emissions air quality public health and agriculture It first offers essential scientific context and accessible summaries of the book's policy findings it then provides the underlying scientific and economic research These studies suggest that China's recent sulfur controls achieved enormous environmental health benefits at unexpectedly low costs They also indicate that judicious implementation of carbon taxes could reduce not only China's carbon emissions but also its air pollution more comprehensively than current single pollutant policies all at little cost to economic growth *Routledge Handbook of Environmental Policy in China* Eva Sternfeld, 2017-06-12 During the last few decades China has accomplished unprecedented economic growth and has emerged as the second largest economy in the world This economic miracle has led hundreds of millions of people out of poverty but has also come at a high cost Environmental degradation and the impact of environmental pollution on health are nowadays issues of the greatest concern for the Chinese public and the government The Routledge Handbook of Environmental Policy in China focuses on the environmental challenges of China's rapidly growing economy and provides a comprehensive overview of the policies developed to address the environmental crisis Leading international scholars and practitioners examine China's environmental governance efforts from an interdisciplinary perspective Divided into five parts the handbook covers the following key issues Part I Development of Environmental Policy in China Actors and Institutions Part II Key issues and Strategies for Solution Part III Policy Instruments and Enforcement Part IV Related Policy Fields Conflicts and Synergies Part V China's Environmental Policy in the International Context This comprehensive handbook will be an invaluable resource to students and scholars of environmental policy and politics development studies Chinese studies geography and international relations **Climate Diplomacy from Rio to Paris** William Sweet, 2016-12-06 The essential primer for understanding climate diplomacy describing both the major players and the path to progress from the 1992 Rio Summit to the 2015 Paris Climate Conference Climate Diplomacy from Rio to Paris is the first accessible overview of climate diplomacy in its first

quarter century The author who has reported on energy and climate for two decades provides readers with a nuanced account of the major players and their interests from the United States the European Union and China to environmental organizations the United Nations and the Vatican and analyzes the outcomes of the major climate conferences at Rio Kyoto Copenhagen and Paris

Measuring Economic Growth and Productivity Barbara Fraumeni, 2019-11-06 Measuring Economic Growth and Productivity Foundations KLEMS Production Models and Extensions presents new insights into the causes mechanisms and results of growth in national and regional accounts It demonstrates the versatility and usefulness of the KLEMS databases which generate internationally comparable industry level data on outputs inputs and productivity By rethinking economic development beyond existing measurements the book s contributors align the measurement of growth and productivity to contemporary global challenges addressing the need for measurements as well as the Gross Domestic Product All contributors in this foundational volume are recognized experts in their fields all inspired by the path breaking research of Dale W Jorgenson

Urbanization and Party Survival in China Xiaobing Li, Xiansheng Tian, 2016-11-21 While the Chinese urban movement has successfully transferred surplus labor from the countryside to urban industries that urgently require free and cheap labor numerous problems have arisen as a result of the unprecedented huge scale process Such conditions such as overcrowding substandard housing lack of social services corruption and abuse of power have often reached crisis stage American college students often ask How does the government control the largest urban population in the world Why do newly developed highly commercialized cities continue to support the Chinese Communist Party CCP rather than challenging the old regime What happens when urban residents have problems with a party controlled government This book collects essays from the best scholars in their fields and examines urban issues including identifying residents concerns analyzing policy problems and providing some answers to these pivotal questions They address this important topic from a Chinese American perspective through a cooperative interdisciplinary research effort among Chinese American scholars interested in the subject Their scholarship makes a significant contribution through multi faceted components from different fields such as economics political science criminal justice law anthropology sociology and education The authors introduce and explore the theory and practice of policy patterns political systems and social institutions by identifying key issues in Chinese government and society contained within the larger framework of the international sphere Originally from Beijing Shanghai Xi an Tianjin and other cities in China these authors have received training and advanced degrees from American universities and colleges thus bringing uncommon perspective and conclusions by focusing on urban studies specific to China Their endeavors move beyond the existing scholarship and seek to spark new debates and proposed solutions while reflecting on established schools of history religion linguistics and gender studies Crucial to this volume is the assessment of historical and empirical data found in these essays that place major events in the context of Chinese tradition its culture and national security Using comprehensive coverage to create a broad and solid

foundation of knowledge this collection presents a better understanding of the current Chinese metropolitan climate and includes legitimate issues with city policy implementation Handbook on the Economics of Climate Change Graciela Chichilnisky, Armon Rezai, 2020-06-26 This timely Handbook recognises the emergence of climate change as the defining topic of our time With public climate discourse growing more urgent every year this Handbook brings together international experts from different economic disciplines to answer critical climate policy questions Climate Mitigation in China Ian W.H. Parry, Baoping Shang, Mr. Philippe Wingender, Nate Vernon, Tarun Narasimhan, 2016-07-25 For the 2015 Paris Agreement on climate change China pledged to reduce the carbon dioxide CO₂ intensity of GDP by 60-65 percent below 2005 levels by 2030 This paper develops a practical spreadsheet tool for evaluating a wide range of national level fiscal and regulatory policy options for reducing CO₂ emissions in China in terms of their impacts on emissions revenue premature deaths from local air pollution household and industry groups and overall economic welfare By far carbon and coal taxes are the most effective policies for meeting environmental and fiscal objectives as they comprehensively cover emissions and have the largest tax base *China's Air Pollution Problems* Claudio O. Delang, 2016-04-20 China's rapid industrialisation has led to an air pollution catastrophe Concerted efforts to achieve economic growth have led to veiled skies of toxic air and created health and morbidity problems as well as tremendous environmental degradation China's Air Pollution Problems provides an overview of air pollution in China describing how and why China has ended up in such a dire situation what the government is doing to address the problem and the difficulties it is encountering in attempting to reduce the pollution The analysis is based on both grey literature newspaper articles NGO reports Chinese government information and on academic studies The grey literature gives a voice to those who suffer from the pollution their advocates and government officers and allows the reader to better grasp the conditions on the ground and the impact of air pollution among people in different areas in China The academic literature adds a theoretical perspective and brings these different case studies into a broader context This book will be of great interest to students of environmental pollution and contemporary Chinese studies looking for an introduction to the topic and also for researchers looking for an extensive list of sources and analysis of China's environmental problems Modern China Xiaobing Li, 2015-11-23 Providing an indispensable resource for students educators businessmen and officials investigating the transformative experience of modern China this book provides a comprehensive summary of the culture institutions traditions and international relations that have shaped today's China In *Modern China* author Xiaobing Li offers a resource far beyond a conventional encyclopedia providing not only comprehensive coverage of Chinese civilization and traditions but also addressing the values issues and critical views of China As a result readers will better understand the transformative experience of the most populous country in the world and will grasp the complexity of the progress and problems behind the rise of China to a world superpower in less than 30 years Written by an author who lived in China for three decades this encyclopedia addresses 16 key topics regarding China such as its geography

government social classes and ethnicities gender based identities arts media and food each followed by roughly 250 short entries related to each topic All the entries are placed within a broad sociopolitical and socioeconomic contextual framework The format and writing consistency through the book reflects a Chinese perspective and allows students to compare Chinese with Western and American views

Clean Air at What Cost? Denise Sienli van der Kamp, 2023-01-19 China's green transition is often perceived as a lesson in authoritarian efficiency In just a few years the state managed to improve air quality contain dissent and restructure local industry Much of this was achieved through top down blunt force solutions such as forcibly shuttering or destroying polluting factories This book argues that China's blunt force regulation is actually a sign of weak state capacity and ineffective bureaucratic control Integrating case studies with quantitative evidence it shows how widespread industry shutdowns are used not to scare polluters into respecting pollution standards but to scare bureaucrats into respecting central orders These measures have improved air quality in almost all Chinese cities but at immense social and economic cost This book delves into the negotiations trade offs and day to day battles of local pollution enforcement to explain why governments employ such costly measures and what this reveals about a state's powers to govern society

Air Pollution Governance in East Asia Kuei-Tien Chou, Koichi Hasegawa, Dowan Ku, Shu-Fen Kao, 2022-04-19 Focusing on Taiwan South Korea Japan and Mainland China the contributors to this book analyze various cases of air pollution within East Asia Air pollution in East Asia is a major health risk which also has damaging impacts on the environment leading to impacts on society economic growth and welfare While existing laws and policies have made progress in alleviating air pollution in each country in the region the protection of favorable environments and the resolution of transboundary air pollution problems have become major targets of regional cooperation Combining perspectives from social sciences and science technology and society studies the contributors to this book examine both the technical and socioeconomic political aspects of these challenges through a range of case studies from around the region The book is a valuable read for researchers and policymakers looking at air pollution and transboundary governance challenges within and beyond East Asia

The Palgrave Handbook of Sustainability Robert Brinkmann, Sandra J. Garren, 2018-04-30 This book provides a comprehensive overview of the practice of sustainability through a diverse range of case studies spanning across varied fields and areas of expertise It provides a clear indication as to the contemporary state of sustainability in a time faced by issues such as global climate change challenges of environmental justice economic globalization and environmental contamination The Palgrave Handbook of Sustainability explores three broad themes Environmental Sustainability Social Sustainability and Economic Sustainability The authors critically explore these themes and provide insight into their linkages with one another to demonstrate the substantial efforts currently underway to address the sustainability of our planet This handbook is an important contribution to the best practises on sustainability drawn from many different examples across the fields of engineering geology anthropology sociology biology chemistry and religion

Globalization of Low-Carbon

Technologies Venkatachalam Anbumozhi, Kaliappa Kalirajan, 2017-10-30 This book explores the opportunities and barriers within the Intended Nationally Determined Contributions INDC framework of the Paris Agreement for low carbon technology diffusion Further it proposes appropriate and feasible mechanisms required at local national and regional levels to achieve the INDC targets The book employs both meta policy analysis and scenario building to examine whether the diffusion of low carbon energy future by 2030 is economically viable under the INDC framework and how international technology cooperation could accelerate investments on the scale required for achieving the INDC targets Further this book provides new perspectives on market and non market mechanisms for the globalization of low carbon technologies within the framework conditions of the Paris Agreement which will be of significant value to senior policy makers multi disciplinary academia and investing communities

Mitigation Policies for the Paris Agreement: An Assessment for G20 Countries Ian Parry, Victor Mylonas, Nate Vernon, 2018-08-30 Following submission of greenhouse gas GHG mitigation commitments by 169 countries for the 2015 Paris Agreement policymakers are considering specific policy actions to implement these commitments To help guide policy it is helpful to have a quantitative framework for understanding the main impacts on GHGs fiscal balances the domestic environment economic welfare and distributional incidence of emissions pricing trade offs between pricing and other commonly used mitigation instruments and why and to what extent needed policies and their impacts differ across countries This paper provides an illustrative sense of this information for G20 member countries who collectively account for about 80 percent of global emissions under plausible though inevitably uncertain projections for future fuel use and fuel price responsiveness The quantitative results underscore the generally strong case for comprehensive pricing over other instruments its small net costs or often net benefits when domestic environmental gains are considered but the potentially wide dispersion and hence inefficiency in emissions prices implied by countries mitigation commitments

China's 40 Years of Reform and Development: 1978-2018 Ross Garnaut, Ligang Song, Cai Fang, 2018-07-19 The year 2018 marks 40 years of reform and development in China 1978 2018 This commemorative book assembles some of the world's most prominent scholars on the Chinese economy to reflect on what has been achieved as a result of the economic reform programs and to draw out the key lessons that have been learned by the model of growth and development in China over the preceding four decades This book explores what has happened in the transformation of the Chinese economy in the past 40 years for China itself as well as for the rest of the world and discusses the implications of what will happen next in the context of China's new reform agenda Focusing on the long term development strategy amid various old and new challenges that face the economy this book sets the scene for what the world can expect in China's fifth decade of reform and development A key feature of this book is its comprehensive coverage of the key issues involved in China's economic reform and development Included are discussions of China's 40 years of reform and development in a global perspective the political economy of economic transformation the progress of marketisation and

changes in market compatible institutions the reform program for state owned enterprises the financial sector and fiscal system reform and its foreign exchange system reform the progress and challenges in economic rebalancing and the continuing process of China's global integration This book further documents and analyses the development experiences including China's large scale of migration and urbanisation the demographic structural changes the private sector development income distribution land reform and regional development agricultural development and energy and climate change policies

Getting Energy Prices Right Ian W.H. Parry, Mr. Dirk Heine, Eliza Lis, Shanjun Li, 2014-07-22 Energy taxes can produce substantial environmental and revenue benefits and are an important component of countries fiscal systems Although the principle that these taxes should reflect global warming air pollution road congestion and other adverse environmental impacts of energy use is well established there has been little previous work providing guidance on how countries can put this principle into practice This book develops a practical methodology and associated tools to show how the major environmental damages from energy can be quantified for different countries and used to design the efficient set of energy taxes

Carbon Capture and Storage Ian Havercroft, Richard Macrory Hon KC, Richard Stewart, 2018-02-08 Carbon Capture and Storage CCS is increasingly viewed as one of the most significant ways of dealing with greenhouse gas emissions Critical to realising its potential will be the design of effective legal regimes at national and international level that can handle the challenges raised but without stifling a new technology of potential great public benefit These include long term liability for storage regulation of transport the treatment of stored carbon under emissions trading regimes issues of property ownership and increasingly the sensitivities of handling the public engagement and perception Following its publication in 2011 Carbon Capture and Storage quickly became required reading for all those interested in or engaged by the need to implement regulatory approaches to CCS The intervening years have seen significant developments globally Earlier legislative models are now in force providing important lessons for future legal design Despite these developments the growth of the technology has been slower in some jurisdictions than others This timely new edition will update and critically assess these updates and provide context for the development of CCS in 2018 and beyond

Reforming Energy Policy in India Ian W.H. Parry, Victor Mylonas, Nate Vernon, 2017-05-03 Spreadsheet models are used to assess the environmental fiscal economic and incidence effects of a wide range of options for reducing fossil fuel use in India Among the most effective options is ramping up the existing coal tax Annually increasing the tax by INR 150 2 25 per ton of coal from 2017 to 2030 avoids over 270 000 air pollution deaths raises revenue of 1 percent of GDP in 2030 reduces CO2 emissions 12 percent and generates net economic benefits of approximately 1 percent of GDP The policy is mildly progressive and at least initially imposes a relatively modest cost burden on industries

Coping with Urban Climates Sascha Roesler, Madlen Kobi, Lorenzo Stieger, 2022-06-21 While 20th century architecture learned to control the climate of a building the architecture of the 21st century needs to learn to cope with the climate of cities Problems such as urban heat and air pollution need to be

included in planning and design Based on empirical realities in Cairo Chongqing Geneva and Santiago de Chile the book underlines that the materiality and social practices attached to room heating compound greening street alignment or climate policies together form the tissue for contemporary urban climates It interweaves socio cultural with meteorological data and pioneers the new concept of thermal governance by linking architectural and technological as well as legal and economic dimensions of climate control in urban environments
