The Implementation of Teacher Evaluation for Professional Development in Primary Education in Taiwan Chao-Wen Liu, 2011-02-14 Teacher evaluation is an activity of assessing teachers performance It is equivalent to teacher appraisal teacher performance management in England This study explores the complexities of implementing Teacher Evaluation in primary schools in Taiwan It concentrates principally on the development of Teacher Evaluation in Taiwan in the light of international research especially that relating to the English context The philosophical perspective with which this study is most closely aligned is constructivism In particular using qualitative methods of documentary analysis and interviews it explores the nature of Teacher Evaluation and the meaning held by implementers Government publications including books

journals and other documentation from public institutions were examined to trace the development of Teacher Evaluation in Taiwan and how it might be influenced by globalisation Interviews were carried out with 3 head teachers and 7 teachers from 3 primary schools in Taiwan and 3 officers from different levels of official organisations A Recommended Model of Teacher Evaluation was synthesised from the review of international research Using the Recommended Model of Teacher Evaluation to evaluate the implementation of Teacher Evaluation for Professional Development in Taiwan the effectiveness of the project was demonstrated However by looking at the empirical data some limitations were observed including deficiencies in the administrative system teachers heavy workload the reluctance of teachers to accept changes and insufficient knowledge of the relevant policy Other obstacles were noted including inadequately trained evaluators the lack of a mechanism for professional dialogue and the incoherence of the educational policy This study shows that most teachers agree with the measures in the Teacher Evaluation for Professional Development implemented by the Ministry of Education although some supplementary measures need to be established in a more sophisticated manner before it can be implemented fully Finally this study further proposes suggestions for a Teacher Evaluation model based on the Recommended Model of Teacher Evaluation the implementation of the current Teacher Evaluation for Professional Development and ideal models mentioned by the interviewees Tools for Strengths-Based Assessment and Evaluation Catherine A.
