## **Climate Change And Displacement Multidisciplinary Perspectives:**

**Climate Change and Displacement** Jane McAdam, 2010-09-06 Environmental migration is not new Nevertheless the events and processes accompanying global climate change threaten to increase human movement both within states and across international borders The Inter governmental Panel on Climate Change has predicted an increased frequency and severity of climate events such as storms cyclones and hurricanes as well as longer term sea level rise and desertification which will impact upon people s ability to survive in certain parts of the world This book brings together a variety of disciplinary perspectives on the phenomenon of climate induced displacement With chapters by leading scholars in their field it collects in one place a rigorous holistic analysis of the phenomenon which can better inform academic understanding and policy development alike Governments have not been prepared to take a leading role in developing responses to the issue in large part due to the absence of strong theoretical frameworks from which sound policy can be constructed The specialist expertise of the authors in this book means that each chapter identifies key issues that need to be considered in shaping domestic regional and international responses including the complex causes of movement the conceptualisation of migration responses to climate change the terminology that should be used to describe those who move and attitudes to migration that may affect decisions to stay or leave The book will help to facilitate the creation of principled research based responses and establish climate induced displacement as an important aspect of both the climate change and global migration debates

Building the Critical Anthropology of Climate Change Hans A. Baer, Merrill Singer, 2024-08-14 This book applies a critical perspective to anthropogenic climate change and the global socio ecological crisis The book focuses on the critical anthropology of climate change by opening up a dialogue with the two main contending perspectives in the field namely the cultural ecological and the cultural interpretive perspectives Guided by these the authors take a firm stance on the types of changes that are needed to sustain life on Earth as we know it Within this framework they explore issues of climate and social equity the nature of the current era in Earth s geohistory the perspectives of the elite polluters driving climate change and the regrettable contributions of anthropologists and other scholars to climate change Engaging with perspectives from sociology political science and the geography of climate change the book explores various approaches to thinking about and responding to the existential threat of an ever warming climate In doing so it lays the foundation for a brave new sustainable world that is socially just highly democratic and climatically safe for humans and other species This book will be of interest to researchers and students studying environmental anthropology climate change human geography sociology and political science

Climate Change and People on the Move Fanny Thornton, 2018-10-24 This book applies a justice framework to analysis of the actual and potential role of international law with respect to people on the move in the context of anthropogenic climate change That people are affected by the impacts of climate change is no longer doubted including with implications for people movement migration displacement relocation etc Climate Change and People on the Move tackles

unique questions concerning international responsibility for people movement arising from the inequities inherent to climate change Corrective and distributive justice provide the analytical backbone and are explored in a substantial theoretical chapter and then applied to subsequent contextual analysis Corrective justice supports analysis as to whether people movement in the climate change context could be conceived or framed as harm loss or damage which is compensable under international law either through fault centred regimes or no fault regimes i e insurance Distributive justice supports analysis as to whether such movement could be conceived or framed as a disproportionate burden either for those faced with movement or those faced with sheltering people on the move from which duties of re distribution may stem This book contributes to the growing scholarship and analysis concerning international law or governance and people movement in response to the impacts of climate change by investigating the bounds of the law where the phenomenon is viewed as one of in justice

**Change and Tradition in a Small Island State** Peter Rudiak-Gould,2013-07-18 The citizens of the Marshall Islands have been told that climate change will doom their country and they have seen confirmatory omens in the land air and sea This book investigates how grassroots Marshallese society has interpreted and responded to this threat as intimated by local observation science communication and Biblical exegesis With grounds to dismiss or ignore the threat Marshall Islanders have instead embraced it with reasons to forswear guilt and responsibility they have instead adopted in group blame and having been instructed that resettlement is necessary they have vowed instead to retain the homeland These dominant local responses can be understood as arising from a pre existing vigorous constellation of Marshallese ideas termed modernity the trickster a historically inspired narrative of self inflicted cultural decline and seduction by Euro American modernity This study illuminates islander agency at the intersection of the local and the global and suggests a theory of risk perception based on ideological commitment to narratives of historical progress and decline **Human Rights Approaches to**

**Climate Change** Sumudu Atapattu,2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change its catastrophic impact on human beings was not really understood as a human rights issue until recently This book examines the link between climate change and human rights in a comprehensive manner It looks at human rights approaches to climate change including the jurisprudential bases for human rights and the environment the theoretical framework governing human rights and the environment and the different approaches to this including benchmarks In addition to a discussion of human rights implications of international environmental law principles in the climate change regime the book explores how the human rights framework can be used in relation to mitigation adaption and adjudication Other chapters examine how vulnerable groups women indigenous peoples and climate refugees would be disproportionately affected by climate change The book then goes on to discuss a new category of people created by climate change those who will be rendered stateless as a result of states disappearing and displaced by climate change and whether human rights law can adequately address these emerging issues **Environmental Migration and Social Inequality** Robert McLeman,Jeanette Schade,Thomas

Faist,2015-12-16 This book presents contributions from leading international scholars on how environmental migration is

both a cause and an outcome of social and economic inequality It describes recent theoretical methodological empirical and legal developments in the dynamic field of environmental migration research and includes original research on environmental migration in Bangladesh Burkina Faso China Ghana Haiti Mexico and Turkey The authors consider the implications of sea level rise for small island states and discuss translocality gender relations social remittances and other concepts important for understanding how vulnerability to environmental change leads to mobility migration and the creation of immobile trapped populations Reflecting leading edge developments this book appeals to advanced undergraduate and graduate students researchers and policymakers **Climate Change, Forced Migration, and International Law** Jane

McAdam, 2012-02-23 Displacement caused by climate change is an area of growing concern With current rises in sea levels and changes to the global climate it is an issue of fundamental importance to the future of many parts of the world This book critically examines whether States have obligations to protect people displaced by climate change under international refugee law international human rights law and the international law on statelessness Drawing on field work undertaken in Bangladesh India and the Pacific island States of Kiribati and Tuvalu it evaluates whether the phenomenon of climate change induced displacement is an empirically sound category for academic inquiry It does so by examining the reasons why people move or choose not to move the extent to which climate change as opposed to underlying socio economic factors provides a trigger for such movement and whether traditional international responses such as the conclusion of new treaties and the creation of new institutions are appropriate solutions in this context In this way the book queries whether flight from habitat destruction should be viewed as another facet of traditional international protection or as a new challenge requiring more creative legal and policy responses law and the international law on statelessness Drawing on Statehood under Water

Alejandra Torres Camprubí, 2016-07-11 In Statehood under Water Alejandra Torres Camprub revisits the concept of statehood through an analysis on how sea level rise and the Anthropocene challenge the territorial demographical and political dimensions of the State Closely examining the fight for survival undertaken by low lying Pacific Island States the author engages with the legal and policy innovations necessary to address these new scenarios This monograph reacts against overly formal approaches to the law on statehood and is devoted to the reconstruction of the context in which both the challenges and the measures adopted to tackle them are taking place Progressively forged within the international community it is the kind of political and ethical framework that will soon inform the potential transformation of the law on statehood Climate Refugees in South Asia Stellina Jolly, Nafees Ahmad, 2018-12-28 This book addresses the forms of legal

protection extended to people displaced due to the consequences of climate change and who have either become refugees by crossing international borders or are climatically displaced persons CDPs in their own homelands It explores the legal response of the South Asian Jurisdictions to these refugee like situations and also to what extent these people are protected under current international law The book critically examines and assesses whether States have obligations to protect people

displaced by climate change under international refugee law IRL and international climate change law ICCL It discusses the issue of climate migration in South Asia analyzes the legal and judicial response initiated by South Asian nations and also investigates the role of SAARC in relation to climate change and climate refugees Drawing on the International Legal Standards and States Practices in South Asia regarding climate refugees the book shows how IRL ICCL and IHRL international human rights law have been used to address and identify the gaps in the global legal protection framework concerning the contours of the normative debate on climate refugees climate change displacement migration forced migration susceptibility to climate change typology of climate change induced displacement role of the SAARC and its municipal legal systems approaches to climate change human mobility and developing a hybrid regional law or advocating a legal alternative of equal measure in a region characterized by diversity and multiculturalism The book offers valuable takeaways for students researchers consultants practitioners and policymakers alike *Handbook of Migration and Health* Felicity Thomas, 2016-12-30 Migration is now firmly embedded as a leading global policy issue of the twenty first century Whilst not a new phenomenon it has altered significantly in recent decades with changing demographics geopolitics conflict climate change and patterns of global development shaping new types of migration Against this evolving backdrop this Handbook offers an authoritative overview of key debates underpinning migration and health in a contemporary global context *Climate Justice and Disaster Law* Rosemary Lyster, 2016-01-11 Climate disasters demand an integration of multilateral negotiations on climate change disaster risk reduction sustainable development human rights and human security Via detailed examination of recent law and policy initiatives from around the world and making use of a capability approach Rosemary Lyster develops a unique approach to human and non human climate justice and its application to all stages of a disaster prevention response recovery and rebuilding and compensation and risk transfer She comprehensively analyses the complexities of climate science and their interfaces with the law and policy making processes and also provides an in depth analysis of multilateral climate change negotiations under the 1992 United Nations Framework Convention on Climate Change **Research Handbook on Climate Disaster Law** Rosemary Lyster, Robert R.M. Verchick, 2018 Through assessing climate disaster law in relation to international public private and environmental law this Research Handbook considers the unique challenges barriers and opportunities that climate disasters pose for law and policy Scientific and empirical evidence suggests that the laws addressing natural disasters cannot be adequately applied to disasters that are caused by climate change Featuring contributions from leading international experts this Research Handbook will be a useful resource for those with an interest in environmental law and international policymaking *De Gruyter Handbook of Climate Migration and Climate Mobility Justice* Andreas Neef, Natasha Pauli, Bukola Salami, 2024-09-23 Accelerating climate change is widely predicted to have profound impacts on human mobility over the coming decades Climate mobilities and immobilities invoke issues of justice and social inequality and pose numerous socio cultural health economic legal and political challenges

Current international legal frameworks and national governance mechanisms provide insufficient protection for people displaced by climate change who are often subjected to health risks psychosocial trauma human rights abuse and even new climatic risks At the same time there is a need to better understand how climate change interacts with other mobility drivers and why many climate affected people decide to stay put or remain trapped in at risk locations Drawing on a wide range of disciplinary traditions and featuring Indigenous voices and youth perspectives this book introduces new conceptual frameworks and empirical studies to examine the unique challenges facing people on the move and those staying behind

**Climate Migration** Calum Nicholson,Benoit Mayer,2023-09-21 This book investigates the epistemological and ethical challenges faced by studies exploring the relations between climate change and human migration At the heart of the contemporary preoccupation with climate change is a concern for its societal impacts Among these its presumed effect on human migration is perhaps the most politically resonant regardless of whether that politics is oriented towards human or national security There is however a problem research on the causal link between climate change and migration has shown it to be a highly equivocal one By extension it remains unclear what if any response is required from law and policy Carefully structured to guide the reader through the issue of climate migration in a logical and rigorous manner this book is the first to bring together key critiques caveats and cautions in order to systematically examine the challenges facing law policy and research on the topic At a time in which both the effects of climate change and the causes of migration are of great public and political interest and in which these interests are often fraught with sentiment and freighted with politics the book brings dispassionately critical perspectives to bear on a topic that desperately needs it
