## **Climate Change Ethics Navigating The Perfect Moral Storm:**

*Climate Change Ethics* Donald A. Brown, 2013-05-07 Climate change is now the biggest challenge faced by humanity worldwide and ethics is the crucial missing component in the debate about what to do about this enormous threat This book examines why thirty five years of discussion of human induced warming has failed to acknowledge fundamental ethical concerns and subjects climate change s most important policy questions to ethical analysis This book examines why ethical principles have failed to gain traction in policy formation and recommends specific strategies to ensure that climate change policies are consistent with ethical principles Because climate change is a global problem that requires a global solution and given that many nations refuse participation due to perceived inequities in proposed international solutions this book explains why ensuring that nations sub national governments organizations businesses and individuals acknowledge and respond to their ethical obligations is both an ethical and practical mandate This book is the first of its kind to go beyond a mere account of relevant ethical questions to offer a pragmatic guide on how to make ethical principles influential in formulating the world s response to climate change Written by Donald A Brown a leading voice in the field it should be of interest to policy makers and those studying environmental policy climate change policy international relations environmental ethics and philosophy

*A Perfect Moral Storm* Stephen M. Gardiner, 2011-02-01 Climate change is arguably the great problem confronting humanity but we have done little to head off this looming catastrophe In *The Perfect Moral Storm* philosopher Stephen Gardiner illuminates our dangerous inaction by placing the environmental crisis in an entirely new light considering it as an ethical failure Gardiner clarifies the moral situation identifying the temptations or storms that make us vulnerable to a certain kind of corruption First the world s most affluent nations are tempted to pass on the cost of climate change to the poorer and weaker citizens of the world Second the present generation is tempted to pass the problem on to future generations Third our poor grasp of science international justice and the human relationship to nature helps to facilitate inaction As a result we are engaging in willful self deception when the lives of future generations the world s poor and even the basic fabric of life on the planet is at stake We should wake up to this profound ethical failure Gardiner concludes and demand more of our institutions our leaders and ourselves This is a radical book both in the sense that it faces extremes and in the sense that it goes to the roots Notre Dame Philosophical Reviews The book s strength lies in Gardiner s success at understanding and clarifying the types of moral issues that climate change raises which is an important first step toward solutions Science Magazine Gardiner has expertly explored some very instinctual and vitally important considerations which cannot realistically be ignored Required reading Green Prophet Gardiner makes a strong case for highlighting and insisting on the ethical dimensions of the climate problem and his warnings about buck passing and the dangerous appeal of moral corruptions hit home Times Higher Education Stephen Gardiner takes to a new level our understanding of the moral dimensions of climate change *A Perfect Moral Storm* argues convincingly that climate change is the greatest moral challenge

our species has ever faced and that the problem goes even deeper than we think Peter Singer Princeton University

**Climate Change Ethics** Donald A. Brown, 2013 This book provides an important new perspective on the debate over climate change ethics in light of a thirty five year history of national and international debates about climate change policies Donald A Brown has written the first book of its kind that makes practical recommendations on how to increase consideration of ethical matters into policy giving readers a new way of thinking about climate ethics Ecology, Economy, Equity Mandy Henk, 2014-07-01 In the first book to seriously examine the future of libraries in a climate reality based context Henk convincingly argues that building a carbon neutral future for libraries is not only essential but eminently practical

*America's Energy Gamble* Shanti Gamper-Rabindran, 2022-01-13 How can America get back to an energy transition that is good for the economy and the environment That is the question at the heart of this eye opening and richly informative dissection of the Trump administration's energy policy The policy was ardently pro fossil fuel and ferociously anti regulation implemented by manipulating science and economic analysis putting oil and gas insiders at the helm of environmental agencies and hacking away at democratic norms that once enjoyed bipartisan support The impacts on the nation's health economy and environment were as this book carefully demonstrates dire But the damage can be reversed Ordinary Americans civil society groups environmental professionals and politicians at every level all have parts to play in making sure the needed energy transition leaves no one behind This compelling book will appeal to course instructors and students government and industry officials activists and journalists and everyone concerned about the nation's future **An**

**Integrated Approach to Environmental Management** Dibyendu Sarkar, Rupali Datta, Avinandan Mukherjee, Robyn Hannigan, 2015-09-30 Covers the most recent topics in the field of environmental management and provides a broad focus on the theoretical and methodological underpinnings of environmental management Provides an up to date survey of the field from the perspective of different disciplines Covers the topic of environmental management from multiple perspectives namely natural sciences engineering business social sciences and methods and tools perspectives Combines both academic rigor and practical approach through literature reviews and theories and examples and case studies from diverse geographic areas and policy domains Explores local and global issues of environmental management and analyzes the role of various contributors in the environmental management process Chapter contents are appropriately demonstrated with numerous pictures charts graphs and tables and accompanied by a detailed reference list for further readings *Ethical Values and*

*the Integrity of the Climate Change Regime* Hugh Breakey, Vesselin Popovski, 2016-05-23 This book investigates the ethical values that inform the global carbon integrity system and reflects on alternative norms that could or should do so The global carbon integrity system comprises the emerging international architecture being built to respond to the climate change This architecture can be understood as an integrity system an inter related set of institutions governance arrangements regulations and practices that work to ensure the system performs its role faithfully and effectively This volume investigates

the ways ethical values impact on where and how the integrity system works where it fails and how it can be improved With a wide array of perspectives across many disciplines including ethicists philosophers lawyers governance experts and political theorists the chapters seek to explore the positive values driving the global climate change processes to offer an understanding of the motivations justifying the creation of the regime and the way that social norms impact upon the operation of the integrity system The collection focuses on the nexus between ideal ethics and real world implementation through institutions and laws The book will be of interest to policy makers climate change experts carbon taxation regulators academics legal practitioners and researchers

The Routledge Handbook of Applied Climate Change Ethics Donald A. Brown, Kathryn Gwiazdon, Laura Westra, 2023-09-27 The Routledge Handbook of Applied Climate Change Ethics is a powerful reference source for the identification and exploration of the underlying ethical issues in climate change law and policy Bridging theory with practice it takes ethical engagement out of the classroom and into the halls of governance The Handbook's 39 chapters written by a diverse and interdisciplinary team of experts from around the world are case studies divided into five parts Parts I-IV highlight the ethical issues that arise in climate change policy formation from duties not to harm to duties to consider the views and voices of those who will be or are being harmed from the role of human rights justice and democracy to how to identify and respond to disinformation and denialism It also raises the ethics of various policy responses such as cap and trade carbon taxing and geo engineering Part V offers a way forward with strategies on how to expressly consider ethics in climate change policy formation from negotiations to education media communication and the power and potential of shaming The volume is essential reading for students professors and practitioners who wish to better engage with government and non government organizations on climate policy to better understand the practical application of the theory and philosophy of ethics and how to more strongly draft and defend ethical action in negotiating drafting and defending climate change law and policy

**The Climate Crisis and Other Animals** Richard Twine, 2024-03-01 The Climate Crisis and Other Animals is a must read for anyone who cares about the future of our planet and the animals who live on it Twine examines the impact of the climate crisis on nonhuman animals and argues for the importance of a climate and food justice movement inclusive of nonhuman animals The book examines the ways in which climate breakdown is affecting nonhuman animal species and delves deeply into the politicised controversy over the extent of emissions from animal agriculture demonstrating the markedly lower emissions of eating vegan Critical of misguided human centred framings of the climate crisis Twine makes clear the necessity of including practices of animal commodification the importance of documenting the effect of a changing climate on other animal species and the mitigative opportunities of a radical remaking of dominant human animal relations The Climate Crisis and Other Animals addresses the emissions impacts of radical land use changes and the twentieth century scaling up of animal commodification within the animal industrial complex revealing how this system is interwoven in the gendered and racialised histories of capitalism Twine collates an

impressive body of scientific research that demonstrate both the already enormous impact of the climate crisis on the lives of nonhuman animals and the need to tackle the dominance of meat based cultures Twine critically explores approaches to food transition and three potentially transformative scenarios for global food systems that could help dismantle the animal industrial complex and create a more sustainable and just food system Averting the climate and biodiversity crises requires nothing less than a radical transformation in how we see ourselves in relation to other species Ethics and climate change, 2015-07-27 Climate change is the most significant moral and environmental issue of our time This project seeks to help deepen explicit ethical reflection around the world on national responses to climate change by developing a publicly available record on national compliance with ethical obligations for climate change similar to the reports that are now available on national compliance with human rights obligations *Human Dignity, Human Rights, and Social Justice* Zhibin Xie, Pauline Kollontai, Sebastian Kim, 2020-06-25 This book explores human dignity human rights and social justice based on a Chinese interdisciplinary dialogue and global perspectives In the Chinese and other global contexts today social justice has been a significant topic among many disciplines and we believe it is an appropriate topic for philosophers theologians legal scholars and social scientists to sit together discuss enrich each other and then deepen our understanding of the topic Many of them are concerned with the conjuncture between social justice human rights and human dignity The questions this volume asks are what s the place of human rights in social justice How is human dignity important in the discourse on human rights And through these inquiries we ask further how is possible to achieve humanist justice This volume presents the significance challenges and constraints of human dignity in human rights and social justice and addresses the questions through philosophical theological sociological political and legal perspectives and these are placed in dialogue between the Chinese and other global settings We are concerned with the norms regarding human dignity human rights and social justice while we take seriously into account their practice This volume consists of two main sections The first section examines Chinese perspectives on human rights and social justice in which both from Confucianism and Christianity are considered and the issues such as patriotism religious freedom petition social protest the rights of marginalized people and sexual violence are studied The second section presents the perspectives of Christian public theologians in the global contexts They examine the influence of Christian thought and practice in the issues of human rights and social justice descriptively and prescriptively and address issues such as religious laws and rights diaconia majoritarianism general equality social economic disparities and climate justice from global perspectives including in the contexts of America Australia Israel and Europe With contributions by experts from mainland China Hong Kong South Korea Australia New Zealand the UK USA and Norway the book provides valuable cross cultural and interdisciplinary insights and perspectives As such it will appeal to political and religious leaders and practitioners particularly those working in socially engaged religious and civil organizations in various geopolitical contexts including the Korean Peninsula and Japan **Climate Justice in a Non-Ideal World** Clare

Heyward, Dominic Roser, 2016-07-01 Climate change is a pressing international political issue for which a practical but principled solution is urgently required Climate Justice in a Non Ideal World aims to make normative theorising on climate justice more relevant and applicable to political realities and public policy The motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances In the last years a lively debate has sprung up in political philosophy about non ideal theory and there has also been an upsurge of interest in the various normative issues raised by climate change such as intergenerational justice transnational harm collective action or risk assessment However there has been little systematic discussion of the links between climate justice and non ideal theory even though the former would seem like a paradigm example of the relevance of the latter The aim of this edited volume is to address this In doing so the volume presents original work from leading experts on climate ethics including several who have participated in climate policy The first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change The second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal The chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science communication and politics

*Towards a Refugee Oriented Right of Asylum* Laura Westra, Satvinder Juss, 2016-03-09 This volume explores the factors that give rise to the number of people seeking asylum and examines the barriers they currently and will continue to face Divided into three parts the authors first explore the causality that generates displacement examining climate change illegal conflicts and the deprivation of natural resources They argue that all of these problems either originate from human agency directly or are strongly influenced by human activities particularly those of

wealthy countries in the North West The study goes on to discuss how migrants are received and the problems they face on arrival and concludes with confronting the fate and the status of asylum seekers after arrival and the walls both virtual and material that they encounter The authors propose ways of approaching the situation beyond the present language and the limited interpretations of the Convention on the Status of Refugees Written by leading experts in environmental ethics asylum law and international law the book will be essential reading for those working in these and related areas

**Bioethical Insights into Values and Policy** Cheryl C. Macpherson, 2016-03-29 Changes in earth's atmosphere oceans soil weather patterns and ecosystems are well documented by countless scientific disciplines These manifestations of climate change harm public health Given their goals and social responsibilities influential health organizations recognize health impacts compounded by geography social values social determinants of health health behaviors and relationships between humans and environments primarily described in feminist ethics and environmental ethics Health impacts are relevant to but seldom addressed in bioethics global health public policy or health or environmental policy This book is the first to describe cultural geographic and socioeconomic factors that influence the regional significance of these impacts and frame them for bioethics and policy analyses

Political Theory and Global Climate Action Idil Boran, 2018-10-03 From around the world cities and regions civil society networks and businesses nongovernmental organizations and institutions for research and learning and many others are taking action on climate change The role of these nonstate and substate actors is increasingly being recognized in the new facilitative climate regime Political theory to date has been surprisingly silent about the scale and prospects of these actions for low carbon climate resilient and sustainable transformations Idil Boran argues provocatively for the need for a widened scope of vision one that has a broader public life of climate action at its centre While acknowledging the role of the state and the multilateral process Boran maintains that social transformation is as deeply and more continuously influenced by the engagement of a wide range of actors below and above the state whose actions are often locally anchored and inescapably interwoven across borders Bringing concepts of the public sphere from political theory into contact with leading scholarship on transnational climate governance Political Theory and Global Climate Action launches an exploration sensitive to changing patterns of practice focused on diversity of actors driven to explore historically contingent conditions of possibility and responsive to questions of equity and justice in the context of transformations The result is a repositioning of political thought on climate change engaging political philosophers scholars of politics and governance and drivers of climate action worldwide at nonstate and substate levels interested in the social and political meaning of their engagement

*Meta-Philosophical Reflection on Feminist Philosophies of Science* Maria Cristina Amoretti, Nicla Vassallo, 2015-12-21 This volume offers a meta philosophical reflection on feminist philosophies of science It emphasizes and discusses both the connections and differences between traditional philosophies of science and feminist philosophies of science The collection systematically analyses feminist contributions to the various philosophies of specific sciences Each

chapter is devoted to a specific area of philosophy of science general philosophy of science philosophy of biology philosophy of climate sciences philosophy of cognitive sciences and neurosciences philosophy of economics philosophy of history and archaeology philosophy of logic and mathematics philosophy of medicine philosophy of psychology philosophy of physics and philosophy of social sciences Since some of these areas have so far rarely been addressed by feminist philosophers this new collection provides new angles and stimulates the debate on pivotal issues that are part and parcel of both traditional philosophies of science and feminist philosophies of science Using a range of different methodologies and styles the essays all show great clarity in both arguments and contents

**Access to International Justice** Patrick Keyzer, Vesselin Popovski, Charles Sampford, 2014-11-20 There is much debate about the scope of international law its compatibility with individual state practice its enforceability and the recent and limited degree to which it is institutionalized This collection of essays seeks to address the issue of access to justice the related element of domestic rule of law which does not yet figure significantly in debates about international rule of law Even in cases in which laws are passed institutions are present and key players are ethically committed to the rule of law those whom the laws are intended to protect may be unable to secure protection This is an issue in most domestic jurisdictions but also one which poses severe problems for international justice worldwide The book will be of interest to academics and practitioners of international law environmental law transitional justice international development human rights ethics international relations and political theory

The Anthropocene Project Byron Williston, 2015-09-24 The evidence presented in the recently released Fifth Assessment Report AR5 of the Intergovernmental Panel on Climate Change IPCC suggests strongly that continued failure to make meaningful cuts to greenhouse gas emissions could bring about disastrous results for the human community especially for future generations Summing up the findings of AR5 Rajendra Pachauri chairman of the IPCC has stated that our persistent inaction on climate change presents a grave threat to the very social stability of human systems The Anthropocene Project attempts to make philosophical sense of this examining the reasons for the inaction highlighted by the IPCC and suggests the normative bases for overcoming it Williston identifies that we are now in the human age the Anthropocene but he argues that this is no mere geological marker It is instead best viewed as the latest permutation of an already existing moral and political project rooted in Enlightenment values The author shows that it can be fruitful to do climate ethics with this focus because in so many aspects of our culture we already endorse broadly Enlightenment values about progress equality and the value of knowledge But these values must be robustly instantiated in the dispositions of moral agents and so we require a climate ethics emphasizing the virtues of justice truthfulness and rational hope One of the book's most original claims is that our moral failure on this issue is in large part the product of motivated irrationality on the part of the world's most prosperous people We have failed to live up to our commitments to justice and truthfulness because we are respectively morally weak and self-deceived Understanding this provides the basis for the rational hope that we might yet find a way to avoid climate

catastrophe     The Role of Integrity in the Governance of the Commons Laura Westra, Janice Gray, Franz-Theo Gottwald, 2017-05-29 This book explores the impact of disintegrity on various aspects of governance as the disregard of ecological conditions produce grave direct effects to human rights to water or food and indirectly also to human security in several ways International legal regimes need to be reconsidered and perhaps re interpreted in order to correct these situations that affect the commons today Some believe that our starting point should acknowledge the impact we already have on the natural world and accept that we now live in the anthropocene Others think that the present emphasis on sustainable development needs to be re defined Finally many believe that reconnecting with moral principles both in professional life and in governance in general represents a necessary first step
