## **Clinical Cases In Prosthodontics Clinical Cases In Prosthodontics:**

Clinical Cases in Prosthodontics Leila Jahangiri, Marjan Moghadam, Mijin Choi, Michael Ferguson, 2011-06-09 Wiley Blackwell's Clinical Cases series is designed to recognize the centrality of clinical cases to the profession by providing actual cases with an academic backbone. Clinical Cases in Prosthodontics grounds itself in core principles of this rehabilitative specialty and demonstrates their practical every day application through a range of case presentations building from simple to complex and from common to rare. This unique approach supports the new trend in case based and problem based learning thoroughly covering topics ranging from conventional complete denture prostheses to full mouth rehabilitation using both implant and tooth supported prostheses. Each case begins with a short description of the initial patient presentation and the learning objectives and goals; the subsequent case discussion will demonstrate this, accompanied by relevant medical and dental histories, notes on extra oral and soft tissue examination and a thorough list of clinical findings, all presented in bulleted form to facilitate ease of learning. Clinical decision making factors are then discussed in detail, well illustrated with multiple clinical photos showing progressive stages of treatment. Cases conclude with review questions and relevant literature citations supporting each answer. Ideal for practitioners and students alike, Clinical Cases in Prosthodontics is the ultimate resource linking evidence based research to every day application. **Clinical Cases in Restorative and**

**Reconstructive Dentistry** Gregory J. Tarantola, DDS, 2011-07-26 Wiley Blackwell's Clinical Cases series is designed to recognize the centrality of clinical cases to the profession by providing actual cases with an academic backbone. Clinical Cases in Restorative and Reconstructive Dentistry describes the principles and demonstrates their practical every day application through a range of representative cases building from the simple to the complex and from the common to the rare. This unique approach supports the new trend in case based and problem based learning thoroughly covering topics ranging from infant oral health to complex pulp therapy. Highly illustrated in full color, Clinical Cases in Restorative and Reconstructive Dentistry's format fosters independent learning and prepares the reader for case based examinations. The book presents actual clinical cases accompanied by academic commentary that questions and educates the reader about essential topics in restorative and reconstructive dentistry. The book begins by laying the groundwork of the fundamental principles that apply to all cases and outlining the ten decisions to be made with all cases. The main sections of the book cover the cases themselves, examining them both by type of restoration/solution and by type of problem. This unique approach enables the reader to build their skills, aiding the ability to think critically and independently. Clinical Cases in Restorative and Reconstructive Dentistry's case based format is particularly useful for pre-doctoral dental students, post-graduate residents and practitioners both as a textbook from which to learn about the challenging and absorbing nature of restorative and reconstructive dentistry and also as a reference tool to help with treatment planning when perplexing cases arise in the dental office. **Clinical Cases in Implant Dentistry** Nadeem Karimbux, Hans-Peter Weber, 2016-11-16 Clinical Cases in
