Readercentric Writing for Digital Media David Hailey, 2016-12-05 This book presents an altogether new approach to writing and evaluating writing in digital media It suggests that usability theory provides few tools for evaluating content because usability theory assumes only one kind of writing on the Internet The author suggests three models user centric usability model persuasion centric encouraging the reader to linger and be persuaded Canon camera ads and quality centric encouraging the reader to linger and learn or be entertained because of the quality of the writing NASA gov and YouTube Designed for professional writers and writing students this text provides a rubric for writing in digital media but more importantly it provides a rubric and vocabulary for identifying and explaining problems in copy that already exists The Internet has become a pastiche of cut and paste content often placed by non writers to fill space for no particular reason or by computers with no oversight from humans e g Amazon com Because these snippets are typically on topic but often for the wrong purpose or audience professional writers have difficulty identifying the problems and an even harder time explaining them Finding an effective tool for identifying and explaining problems in digital content becomes a particularly important problem as writers increasingly struggle with growing complications in complex information systems systems that create and manage their own content with little human intervention Being able to look at a body of copy and immediately see that it is problematic is an important skill that is lacking in a surprising number of professional writers Frameworks of IT

Prosumption for Business Development Pa?kowska, Ma?gorzata, 2013-07-31 Separation distinction between the roles of the producer and consumer has become blurred with the development of new science and technologies enabling the emergence of the prosumer or the active consumer In the IT sector the role of the end user has broadened to include innovation and development practices in addition to the traditional consumer activities As such businesses must create opportunities for product development and innovation by the consumers Frameworks of IT Prosumption for Business Development investigates the latest empirical research on active use of information technology resources enabling users with new methodologies tools and opportunities to impact application development processes The objective of this reference book is to mobilize end users to take a more active role in their own IT solutions which will in turn assist in the development of best practices in IT at all levels
