Clearing The Fields Solutions To The Global Land Mines Crisis:

Clearing the Fields Kevin M. Cahill, 1995 **Disarming States** Kenneth R. Rutherford, 2010-12-07 This book provides a detailed history of the global movement to ban anti personnel landmines APL marking the first case of a successful worldwide civil society movement to end the use of an entire category of weapons In March 1995 Belgium became the first state to pass a domestic anti personnel landmine ban In December 1997 122 states joined Belgium in signing the comprehensive Mine Ban Treaty also known as the Ottawa Treaty The movement to ban landmines became a turning point in global politics that continues to influence policy and strategy decisions regarding weapon use today *Disarming States* The International Movement to Ban Landmines describes how non government organizations NGOs brought the landmine issue to international attention by forming the International Campaign to Ban Landmines ICBL The author presents new information gleaned from interviews and intensive research conducted around the world The critical role of mid size states such as Austria Canada and Switzerland recruited to back the movement s goals is examined The book concludes by examining how NGOs affect the international political agenda especially in seeking legal prohibitions on weapons and changes in states behaviors *The Global Landmine Crisis* United States. Congress. Senate. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs, 1994 **Edward Said and the Work of the Critic** Paul A. Bové, 2000-06-01 A distinguished panel of contributors assess and expand Edward Said s many contributions to the study of colonialism imperialism and representation that have marked his career long struggle to end conflict and further the effort to build civilizati **Hidden Killers, 1998** United States. Department of State. Office of Humanitarian Demining Programs, 1998 Amerikansk rapport der beskriver de problemer udl gning af miner i forbindelse med krigsf relse giver overalt i verden Is r civilbefolkningen rammes fordi de udlagte miner specielt personelminer sj ldent ryddes effektivt n r krigshandlerne oph rer *Towards A Nuclear-weapon-free World - Proceedings Of The Forty-fifth Pugwash Conference On Science And World Affairs* Joseph Rotblat, Michiji Konuma, 1997-07-01 In this volume scientists write on the desirability and feasibility of eliminating nuclear weapons including reflections 50 years after the destruction of Hiroshima and Nagasaki by atomic bombs The following topics are discussed strategies for preventing the proliferation of weapons of mass destruction ways and means to monitor and control the arms trade the need for global governance specific aspects of security in the Asia Pacific region and interactions between the problems of meeting the world s energy demand reducing environmental pollution and promoting sustainable development *Proceedings of the Technology and the Mine Problem Symposium* Albert M. Bottoms, Barbara Honegger, 1996 **Negotiating Minefields** Leon V. Sigal, 2013-05-13 Against all odds the International Campaign to Ban Landmines helped to enact a global treaty banning antipersonnel mines in 1997 For that achievement it was awarded the Nobel Peace Prize In this volume Leon Sigal shows how a handful of NGOs with almost no mass base got more than 100 countries to outlaw a weapon that their armies had long used It is a story of intrigue and

misperception of clashing norms and interests of contentious bureaucratic and domestic politics It is also a story of effective leadership of sustained commitment to a cause of alliances between campaigners and government officials of a US senator who championed the ban and of the skilful use of the news media Despite this monumental effort the campaign failed to get the United States to sign the treaty Drawing on extensive internal documents and interviews with US officials and ban campaigners Sigal tells the story of the in fighting inside the Clinton administration in the Pentagon and within the ban campaign itself that led to this major setback for an otherwise unprecedented successful global effort Negotiating Minefields will be of interest to students and scholars of military and strategic studies and politics and international relations

Human Security as Statecraft Nik Hynek, 2012-02-20 This book critically investigates the discourses and practices of human security and aims to delve below the stereotypical imageries representing them Drawing on Foucault and Deleuze the author approaches human security from a new perspective with the aim of ascertaining what has been behind and underneath a certain spatio temporal articulation of human security and with what political implications and consequences Each human security assemblage is composed of messy discourses and practices which are loosely related and sometimes even disconnected This book examines the Canadian and Japanese articulations of human security and establishes the kinds of structural terrains have enabled shaped or blocked the unfolding of these versions of human security The pivotal contention of the book is that Canadian and Japanese articulations of human security have been different because they have grown from completely different domestic economies of power governing the relationship between the state apparatus and the non profit and voluntary sector While the Canadian human security assemblage has been shaped by transformations in the country s advanced liberal model of government the Japanese has been shaped by the continuities of Japan s bureaucratic authoritarianism A novel approach is employed for the related process tracing a general series linking structural conditions with actual articulations of the human security projects and their further development including analysis of their unintended consequences This book will be of much interest to students of Critical Security Studies human security global governance foreign policy and IR Security studies

More with Less Kevin M. Cahill, 2013-09-01 Natural and human made disasters are increasing around the world Hurricanes typhoons earthquakes tsunamis droughts and resultant famine floods and armed conflicts are constant reminders of the frailty of our human race Global warming may cause whole island states to be submerged as the oceans rise In the past these acute and recurring crises have been met by the international community responding to UN and media appeals The economic collapse of nations is now a reality some of those most affected had been traditional generous donors to disaster relief operations It is unlikely probably impossible that they will be able to continue to contribute overseas when their own domestic needs are unmet A recent New York Times front page report suggested that one of the few domestic issues to have bipartisan support was to cut the foreign aid budget This book analyzes the global economic forecast and the United Nations pattern of philanthropy provides a case study of how one nation with a tradition of giving will cope in the face of a marked reduction in flexible funds and then provides thoughtful chapters on new approaches to disaster preparedness and disaster response
