## **Climate Change And Migration Security And Borders In A Warming World:**

**Climate Change and Migration** Gregory White, 2011 Focusing on climate induced migration from Africa to Europe White shows how global warming's impact on international relations has been significant enhancing the security regimes in not only the advanced economies of the North Atlantic but in the states that serve as transit points between the most advanced and desperate nations *Handbook on Climate Change and International Security* Maria J. Trombetta, 2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue the threats it poses and the political and academic debates it has prompted Framing climate change as a security issue it explores the ways relevant actors states and international organizations have conceptualized climate security and its associated threats *Securitizing Global Warming* Delf Rothe, 2015-11-19 This book explores the reasons for a recent securitization of climate change and reveals how the understanding of climate change as a security threat fuels resilience as a contemporary political paradigm Since 2007 political and public discourse has portrayed climate change in terms of international or national security This increasing attention to the security implications of climate change is puzzling however given the fact that linkages between climate change and conflict or violence are heavily disputed in the empirical literature This book explains this trend of a securitization of global warming and discusses its political implications It traces the actor coalition that promoted the idea of climate change as a security issue and reveals the symbols narratives and storylines that make up this discourse Drawing on three detailed case studies at the international level of the United Nations the regional level of the Euro Mediterranean and the national level of the UK the book reveals how climate change is turned into a non linear and unpredictable threat The resulting complexity discourse prevents the adoption of any exceptional measures and instead presents resilience as the only way to cope with the climate threat This book shows that we can only grasp the complexity of the securitization process and its implications in the climate change case by comparing it at different political levels over a longer period By developing a securitization framework the book makes an important contribution to the ongoing debate on security and resilience in critical security studies This book will be of much interest to students of critical security studies resilience environmental studies global governance and IR in general Climate Change, Policy and Security Donald Wallace, Daniel Silander, 2018-04-17 This book examines the multiple strategies proposed by the international community for addressing global climate change GCC from both human and state security perspectives It examines what is needed from major states working within the UN framework to engage with the multiple dimensions of a strategy that addresses GCC and its impacts where such engagement promotes both human and state security Two broad frameworks for approaching these issues provide the basis of discussion for the individual chapters which discuss the strategies being undertaken by major state powers the US the EU China India Japan and Russia The first framework considers the multiple strategies mitigation adaptation and capacity building required of the international community to address the effects of GCC The second

framework considers the differentiation of GCC policies in terms of security and how the efficacy of these strategies could be impacted by whether priority is given to state security over human security concerns This book will be of much interest to students of human security climate change foreign policy and International Relations

**Research Handbook on Climate Change, Migration and the Law** Benoît Maye, François Crépeau, 2017-10-27 This comprehensive Research Handbook provides an overview of the debates on how the law does and could relate to migration exacerbated by climate change It contains conceptual chapters on the relationship between climate change migration and the law as well as doctrinal and prospective discussions regarding legal developments in different domestic contexts and in international governance

**Handbook on Climate Change and Human Security** Michael R Redclift, Marco Grasso, 2013-10-31 The Handbook is international in scope and provides an assessment that will be of value to academics students and policy professionals alike NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all

*The Daunting Climate Change* Jayarama Reddy Puthalpet, 2022-03-23 The book starts with an overview of Climate Science It discusses the signs of Warming the impacts and consequences on several sectors terrestrial and coastal ecosystems water resources ocean systems agriculture food production and food security human health and safety livelihoods and poverty Arctic populations low lying States so on Mathematical models to project future climate and the resulting concerns global adaptation experiences and opportunities for future execution are explained The mitigation approaches chiefly decarbonizing the energy sector by developing and applying clean low carbon energy sources and improving energy efficiency and the evolving geoengineering schemes are dealt Carbon pricing an economic tool to ensure emissions reductions and transition to a low carbon economy to stimulate sustainable growth are described The continued global efforts under the UN or otherwise until the recent Paris Agreement to arrive at policy responses to tackle this intriguing but daunting problem of climate change are vividly expounded Note T F does not sell or distribute the hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Rethinking Climate Change, Conflict and Security Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and

developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of Geopolitics **Climate Change, Migration and Human Rights** Dimitra Manou, Andrew Baldwin, Dug Cubie, Anja Mihr, Teresa Thorp, 2017-05-12 Climate Change already having serious impacts on the lives of millions of people across the world These impacts are not only ecological but also social economic and legal Among the most significant of such impacts is climate change induced migration The implications of this on human rights raise pressing questions which require serious scholarly reflection Drawing together experts in this field Climate Change Migration and Human Rights offers a fresh perspective on human rights law and policy issues in the climate change regime by examining the interrelationships between various aspects of human rights climate change and migration Three key themes are explored understanding the concepts of human dignity human rights and human security the theoretical nexus between human rights climate change and migration or displacement and the practical implications and challenges for lawyers and policy makers of protecting human dignity in the face of climate change and displacement The book also includes a series of case studies from Alaska Bangladesh Kenya and the Pacific islands which aim to improve our understanding of the theoretical and practical implications of climate change for human rights and migration This book will be of great interest to scholars of environmental law and policy human rights law climate change and migration and refugee studies Climate Migration Calum Nicholson, Benoit Mayer, 2023-09-21 This book investigates the epistemological and ethical challenges faced by studies exploring the relations between climate change and human migration At the heart of the contemporary preoccupation with climate change is a concern for its societal impacts Among these its presumed effect on human migration is perhaps the most politically resonant regardless of whether that politics is oriented towards human or national security There is however a problem research on the causal link between climate change and migration has shown it to be a highly equivocal one By extension it remains unclear what if any response is required from law and policy Carefully structured to guide the reader through the issue of climate migration in a logical and rigorous manner this book is the first to bring together key critiques caveats and cautions in order to systematically examine the challenges facing law policy and research on the topic At a time in which both the effects of climate change and the causes of migration are of great public and political interest and in which these interests are often fraught with sentiment and freighted with politics the book brings dispassionately critical perspectives to bear on a topic that desperately needs it

**Climate Change and People on the Move** Fanny Thornton, 2018 This volume investigates how a justice framework is relevant to the analysis of international law's role in relation to people movement in the climate change context **Render Unto God** Ryan C. McIlhenny, 2015-09-18 The Great Recession like most economic depressions has compelled many to reconsider not only the consequences but also the very nature of contemporary global capitalism Sadly very little critical

reflection on the fundamental nature of the world's hegemonic economic system has come from its most devout disciples evangelicals Throughout the pages of the Old and New Testament God reprimands those driven by a love for gain By way of the cultural mandate God has given humanity the responsibility to care not only for their fellow human beings but also for the earth itself True and undefiled religion includes taking care of those forgotten marginalized and made invisible by all consuming and all mighty capital As such those who accumulate wealth by destroying creation dishonor their Creator Has the Christian community gone far enough in meeting the needs of the poor in seeking the end of poverty or in curbing the rapacious appetites of the greedy few in order to preserve that which is good true and beautiful within God's creation Render Unto God calls Christians to reconsider their ideological commitment to unrestrained capitalism to rethink not only the profit motive an essential element of capitalism if not its central telos the meaning of private property and the dominion of the global power elite but also to understand how market fundamentalism fractures families creates systems of inequality and destroys the environment Have we forgotten our commitment to God neighbor and creation Have we forgotten our primary purpose the reason for our existence namely to glorify God and enjoy him forever

**Environment, Climate Change and Migration in South Asia** Amit Ranjan, Rajesh Kharat, Pallavi Deka, 2023-03-31

Climate change has been fueling migration and according to some policy reports there could more than one billion climate migrants refugees across the world by 2050 In South Asia disasters environmental degradation and climate change are increasing the number of migrants every year In South Asia like other parts of the world migrants and displaced people mainly move within their respective countries but some cross the porous border At most places the migrants and displaced people face hostile situation as they are not welcome by their local host population The chapters in the book highlight the challenges and inadequacies of governments and communities in protecting the environment as well as the disproportionate effect that climate change has on the poor and marginalized groups The book also discusses the gendered experiences of climate related migrations and policy measures which need to be implemented to counter forced displacements and environment degradation along with the legal and institutional resources which could help mitigate climate change and protect climate refugees This book will be of interest to students and researchers of development studies ecology and environment migration sociology law and governance human ecology climate change and economics

**A Changing Environment for Human Security** Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of

insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice

**Local Activism for Global Climate Justice** Patricia E. Perkins, 2019-09-06 This book will inspire and spark grassroots action to address the inequitable impacts of climate change by showing how this can be tackled and the many benefits of doing so With contributions from climate activists and engaged young authors this volume explores the many ways in which people are proactively working to advance climate justice The book pays special attention to Canada and the Great Lakes watershed showing how the effects of climate change span local regional and global scales through the impact of extreme weather events such as floods and droughts with related economic and social effects that cross political jurisdictions Examining examples of local level activism that include organizing for climate resilient and equitable communities the dynamic leadership of Indigenous peoples especially women for water and land protection and diaspora networking Local Activism for Global Climate Justice also provides theoretical perspectives on how individual action relates to broader social and political processes Showcasing a diverse range of inspirational and thought provoking case studies this book will be of great interest to students and scholars of climate justice climate change policy climate ethics and global environmental governance as well as teachers and climate activists

Climate Terror Sanjay Chaturvedi, 2016-01-12 Climate Terror engages with a highly differentiated geographical politics of global warming It explores how fear inducing climate change discourses could result in new forms of dependencies domination and militarised climate security

**Handbook on Migration and Security** Philippe Bourbeau, 2017-04-28 This Handbook provides a state of the art analysis of the critically important links between migration and security in a globalising world and presents original contributions suggesting innovative and emerging frontiers in the study of the securitization of migration Experts from different fields reflect on their respective conceptualisations of the migration security nexus and consider how an interdisciplinary and multifaceted dialogue can stimulate and enrich our understanding of the securitisation of migration in the contemporary world

*The Cambridge History of Nationhood and Nationalism: Volume 2, Nationalism's Fields of Interaction* Cathie Carmichael, Matthew D'Auria, Aviel Roshwald, 2023-11-09 This major new reference work with contributions from an international team of scholars provides a comprehensive account of ideas and practices of nationhood and nationalism from antiquity to the present It considers both continuities and discontinuities engaging critically and analytically with the scholarly literature in the field In volume II leading scholars in their fields explore the dynamics of nationhood and nationalism s interactions with a wide variety of cultural practices and social institutions in addition to the

phenomenon's crucial political dimensions. The relationships between imperialism and nationhood, nationalism and between major world religions and ethno-national identities are among the key themes explained and explored. The wide range of case studies from around the world brings a truly global comparative perspective to a field whose study was long constrained by Eurocentric assumptions.

**The Concept of Climate Migration** Benoît Mayer, 2016-11-25 This timely book offers a unique interdisciplinary inquiry into the prospects of different political narratives on climate migration. It identifies the essential angles on climate migration: the humanitarian narrative, the migration narrative and the climate change narrative and assesses their prospects. The author contends that although such arguments will influence global governance, they will not necessarily achieve what advocates hope for. He discusses how the weaknesses of the concept of climate migration are likely to be utilized in favour of repressive policies against migration or for the defence of industrial nations against perceived threats from the Third World.

*A World to Live In* G. M. Woodwell, 2016-02-26 A scientist makes a powerful case that preservation of the integrity of the biosphere is a necessity and an inviolable human right. A century of industrial development is the briefest of moments in the half-billion years of the earth's evolution. And yet our current era has brought greater changes to the earth than any period in human history. The biosphere, the globe's life-giving envelope of air and climate, has been changed irreparably. In *A World to Live In*, the distinguished ecologist George Woodwell shows that the biosphere is now a global human protectorate and that its integrity of structure and function are tied closely to the human future. The earth is a living system, Woodwell explains, and its stability is threatened by human disruption. Industry dumps its waste globally and makes a profit from it, invading the global commons; corporate interests overpower weak or nonexistent governmental protection to plunder the planet. The fossil fuels industry offers the most dramatic example of environmental destruction, disseminating the heat-trapping gases that are now warming the earth and changing the climate forever. The assumption that we can continue to use fossil fuels and adapt to climate disruption, Woodwell argues, is a ticket to catastrophe. But Woodwell points the way toward a solution: We must respect the full range of life on earth, not species alone but their natural communities of plant and animal life that have built and still maintain the biosphere. We must recognize that the earth's living systems are our heritage and that the preservation of the integrity of a finite biosphere is a necessity and an inviolable human right.
