Climate Hope On The Front Lines Of The Fight Against Coal:

Climate Hope Ted Nace, 2010 **Climate Insurgency** Jeremy Brecher, 2015-11-17 Twenty five years of human effort have failed even to slow climate change let alone reverse it Climate Insurgency lays out a strategy for protecting the earth's climate a global nonviolent constitutional insurgency This short book starts with a brief history of official climate protection efforts from above and non governmental ones from below that explains why climate protection has failed so far Then it proposes a global nonviolent insurgency for climate protection to overcome that failure Historian and longtime activist Jeremy Brecher presents a public trust doctrine that can legitimate global climate insurgency in national and international law He shows how to make national economies climate safe and points the way toward justly distributing the global costs and benefits of climate protection In addition he lays out a new strategy to make governments and economies meet their obligations to protect the climate **The Routledge Handbook of Environmental Movements** Maria Grasso, Marco Giugni, 2022-01-31 This handbook provides readers with up to date knowledge on environmental movements and activism and is a reference point for international work in the field It offers an assessment of environmental movements in different regions of the world macrostructural conditions and processes underlying their mobilization the microstructural and social psychological dimensions of environmental movements and activism and current trends as well as prospects for environmental movements and social change The handbook provides critical reviews and appraisals of the current state of the art and future development of conceptual and theoretical approaches as well as empirical knowledge and understanding of environmental movements and activism It encourages dialogue across the disciplinary barriers between social movement studies and other perspectives and reflects upon the causes and consequences of citizens participation in environmental movements and activities The volume brings historical studies of environmentalism sociological analyses of the social composition of participants in and sympathizers of environmental movements investigations by political scientists on the conditions and processes underlying environmental movements and activism and other disciplinary inquiries together while keeping a clear focus within social movement theory and research as the main lines of inquiry The handbook is an essential guide and reference point not only for researchers but also for undergraduate and graduate teaching and for policymakers and activists Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY NC ND 4.0 license **Kivalina** Christine Shearer, 2011-07-26 The true story of an Alaska Native village destroyed by flooding and erosion caused by climate change and how they fought for help Warming Arctic temperatures have been making coastal areas of Alaska increasingly uninhabitable In 2008 the small Alaska Native village of Kivalina filed a legal claim against some of the world's largest fossil fuel companies for damaging their homeland and creating a false debate around climate change Academic and former journalist Christine Shearer explores the history leading up to the lawsuit its connections to disaster management and adaptation and its relationship to past misinformation

campaigns involving lead asbestos and tobacco Kivalina's struggle for safe relocation the book argues is part of our common struggle to acknowledge and address climate change before it is too late 2012 Rachel Carson Environment Book Award Honorable Mention Praise for Kivalina Moving infuriating ominous Shearer provides an impressively concise and comprehensive history of the growth of corporate power in America its influence on entwinement with and corruption of government and corporate obfuscation of industrial hazards Publisher's Weekly Best book of 2011 one of the most timely and important books to be published in 2011 and in the past decade Jeff Biggers The Huffington Post In novelistic detail Shearer recounts the science politics legal battles and human experience at one of the leading edges of climate change impact In doing so she tells the story not just of one village in Alaska but of us all The Society of Environmental Journalists **Critical Environmental Politics** Carl Death, 2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e.g. water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco-centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers **Activism and the Fossil Fuel Industry** Andrew Cheon, Johannes Urpelainen, 2018-02-06 In less than a decade activism against the fossil fuel industry has exploded across the globe While environmentalists used to focus on legislative goals such as carbon emissions trading or renewable energy policies today the most prominent activists directly

attack the fossil fuel industry This timely book offers a comprehensive evaluation of different types of activism the success and impact of campaigns and activities and suggestions as to ways forward This book is the first systematic treatment of the anti fossil fuel movement in the United States An accessible and readable text it is an essential reference for scholars policymakers activists and citizens interested in climate change fossil fuels and environmental sustainability The entire book or chapters from it can be used as required or supplementary material in various courses at the undergraduate and graduate level As the book is not technically challenging but contains a comprehensive review of climate change fossil fuels and the literature on environmental activism it can be used as an accessible introduction to the anti fossil fuel campaign across disciplines

Abolishing Fossil Fuels Kevin A. Young, 2024-05-14 Climate destruction is a problem of political power We have the resources for a green transition but how can we neutralize the influence of Exxon and Shell *Abolishing Fossil Fuels* argues that the climate movement has started to turn the tide against fossil fuels just too gradually The movement's partial victories show us how the industry can be further undermined and eventually abolished Activists have been most successful when they've targeted the industry's enablers the banks insurers and big investors that finance its operations the companies and universities that purchase fossil fuels and the regulators and judges who make life and death rulings about pipelines power plants and drilling sites This approach has jeopardized investor confidence in fossil fuels leading the industry to lash out in increasingly desperate ways The fossil fuel industry's financial and legal enablers are also its Achilles heel The most powerful movements in US history succeeded in similar ways The book also includes an in depth analysis of four classic victories the abolition of slavery battles for workers rights in the 1930s Black freedom struggles of the 1950s and 1960s and the fight for clean air Those movements inflicted costs on economic elites through strikes boycotts and other mass disruption They forced some sectors of the ruling class to confront others which paved the way for victory Electing and pressuring politicians was rarely the movement's primary focus Rather gains in the electoral and legislative realms were usually the byproducts of great upsurges in the fields factories and streets Those historic movements show that it's very possible to defeat capitalist sectors that may seem invulnerable They also show us how it can be done They offer lessons for building a multiracial working class climate movement that can win a global green transition that's both rapid and equitable

Fueling Culture Jennifer Wenzel, Patricia Yaeger, 2017-02-01 How has our relation to energy changed over time What differences do particular energy sources make to human values politics and imagination How have transitions from one energy source to another from wood to coal or from oil to solar to whatever comes next transformed culture and society What are the implications of uneven access to energy in the past present and future Which concepts and theories clarify our relation to energy and which just get in the way *Fueling Culture* offers a compendium of keywords written by scholars and practitioners from around the world and across the humanities and social sciences These keywords offer new ways of thinking about energy as both the source and the limit of how we inhabit culture with the aim of opening up new ways of understanding the

Energy Made Easy Ronald Stein, Todd Royal, 2019-08-12 *Energy* is multifaceted and *Energy Made Easy* allows the reader to grasp enough knowledge quickly so they can participate in discussions with family friends co workers or while watching news reports The main purpose of the book is to Help Citizens Become Energy Literate As an added benefit to the reader each chapter is a stand alone read on twelve energy subjects The readers may not be interested in the entire spectrum of energy but can selectively pick and choose hot energy topics trending on current news or social media coverage It is dangerous and delusional to believe anything can be explained in sound bites much less energy This book will make you look at energy and ELECTRICITY in a new fresh way and perspective We believe this is desperately needed with the upcoming U S Presidential election and global events taking place in China Russia Iran Africa India and South America

Pollution, Politics, and Power Thomas O. McGarity, 2019-11-19 The electric power industry has been transformed over the past forty years becoming more reliable and resilient while meeting environmental goals A big question now is how to prevent backsliding *Pollution Politics and Power* tells the story of the remarkable transformation of the electric power industry over the last four decades Electric power companies have morphed from highly polluting regulated monopolies into competitive deregulated businesses that generate transmit and distribute cleaner electricity Power companies are investing heavily in natural gas and utility scale renewable resources and have stopped building new coal fired plants They facilitate end use efficiency and purchase excess electricity produced by rooftop solar panels and backyard wind turbines helping to reduce greenhouse gas emissions But these beneficial changes have come with costs The once powerful coal industry is on the edge of ruin with existing coal fired plants closing and coal mines shutting down As a result communities throughout Appalachia suffer from high unemployment and reduced resources which have exacerbated a spiraling opioid epidemic The Trump administration s efforts to revive the coal industry by scaling back environmental controls and reregulating electricity prices have had little effect on the coal industry s decline Major advances therefore come with warning signs which we must heed in charting the

continuing course of sustainable electricity In Pollution Politics and Power Thomas O McGarity examines the progress made details lessons learned and looks to the future with suggestions for building a more sustainable grid while easing the economic downsides of coal s demise A Newer World William F. Hewitt,2012 Here is a story that has not previously been adequately told the story of the developments trends and visionary people that are in many ways mitigating the climate crisis and turning sustainable development into reality not just a grand concept In A Newer World the environmentalist Bill Hewitt explores the advances in business and finance politics design science and engineering that are transforming the world around us right now even as the dire climatic consequences of the industrialization of our economies have become ever more starkly apparent The received wisdom is that we are on an irrevocable path toward climate catastrophe The political process we are told is broken Coal fired power plants in China and India are going to inundate the climate system with CO2 before we can convert to less dangerous ways to generate power Market mechanisms to control emissions have not as yet realized their potential There is some truth in all of this but it is not by any means the whole story A Newer World surveys the quantum leaps that are being made in clean technology and tells how governments industry and financial institutions are moving faster and more vigorously every day toward embracing these technologies The challenges are real A Newer World tells the untold story of the major progress already being made in addressing the looming climate crisis Trump and the Deeper Crisis Kevin Young,Michael Schwartz,Richard Lachmann,2022-12-12 As far right forces cement their hold on the Republican Party and as the Democratic Party appears unable to stop them what lies ahead The authors argue that confronting Trumpism requires a frontal attack on the conditions that incubated the monster All Health Politics Is Local Merlin Chowkwanyun,2022-05-09 Health is political It entails fierce battles over the allocation of resources arguments over the imposition of regulations and the mediation of dueling public sentiments all conflicts that are often narrated from a national top down view In All Health Politics Is Local Merlin Chowkwanyun shifts our focus taking us to four very different places New York City Los Angeles Cleveland and Central Appalachia to experience a national story through a regional lens He shows how racial uprisings in the 1960s catalyzed the creation of new medical infrastructure for those long denied it what local authorities did to curb air pollution so toxic that it made residents choke and cry how community health activists and bureaucrats fought over who d control facilities long run by insular elites and what a national coal boom did to community ecology and health All Health Politics Is Local shatters the notion of a single national health agenda Health is and has always been political shaped both by formal policy at the highest levels and by grassroots community battles far below *İklim Direnişi: Bir Hayatta Kalma Stratejisi* Jeremy Brecher,2021-01-06 Her y l temmuz ya da a ustos aylar kuzey yar m k rede gelmi ge mi en s cak ay ilan ediliyor G nler en s cak g n olmak i in birbiriyle yar yor klim krizi yoktur yaland r uydurmad r diyenler eski gazete sayfalar nda saklanacak sayfa ar yor y zleri k zar yor kimsenin y z ne bakam yor Bu arada h k metler lacivert tak m elbiseli adamlar n ve d piyes giymi kad nlar n antalar nda kal n kal n dosyalarla Birle mi Milletler iklim

The Coal Truth David Ritter,2018 Since 2012 the fight to stop the opening of the vast Galilee coal basin has emerged as an iconic pivot of the Australian climate and environment movement The Coal Truth provides a timely and colourful contribution to one of the most important struggles in our national history over the future of the coal industry Written by an environmental insider with an eye on the world his daughters will inherit The Coal Truth is told with wit and verve drawing in other specialist voices to bring to life the contours of a contest that the people of Australia can t afford to lose Contributors include Adrian Burragubba Tara Moss and Berndt Sellheim Lesley Hughes John Quiggin Hilary Bambrick Ruchira Talukdar and Geoffrey Cousins This book will be of interest of anyone interested in environmental studies activism politics and Australian studies

Arctic Screaming: Journey to the Front Line of the Climate Crisis , **Unlikely Alliances** Zoltán Grossman,2017-06-20 Often when Native nations assert their treaty rights and sovereignty they are confronted with a backlash from their neighbors who are fearful of losing control of the natural resources Yet when both groups are faced with an outside threat to their common environment such as mines dams or an oil pipeline these communities have unexpectedly joined together to protect the resources Some regions of the United States with the most intense conflicts were transformed into areas with the deepest cooperation between tribes and local farmers ranchers and fishers to defend sacred land and water Unlikely Alliances explores this evolution from conflict to cooperation through place based case studies in the Pacific Northwest Great Basin Northern Plains and Great Lakes regions during the 1970s through the 2010s These case studies suggest that a deep love of place can begin to overcome even the bitterest divides
