Bird on Fire Andrew Ross, 2011-11-03 Phoenix Arizona is one of America's fastest growing metropolitan regions It is also its least sustainable one sprawling over a thousand square miles with a population of four and a half million minimal rainfall scorching heat and an insatiable appetite for unrestrained growth and unrestricted property rights In Bird on Fire eminent social and cultural analyst Andrew Ross focuses on the prospects for sustainability in Phoenix

a city in the bull's eye of global warming and also the obstacles that stand in the way. Most authors writing on sustainable cities look at places that have excellent public transit systems and relatively high density such as Portland, Seattle or New York. But Ross contends that if we can't change the game in fast growing low density cities like Phoenix, the whole movement has a major problem. Drawing on interviews with 200 influential residents from state legislators, urban planners, developers and green business advocates to civil rights champions, energy lobbyists, solar entrepreneurs and community activists, Ross argues that if Phoenix is ever to become sustainable, it will occur more through political and social change than through technological fixes. Ross explains how Arizona's increasingly xenophobic immigration laws, science denying legislature and growth at all costs business ethic have perpetuated social injustice and environmental degradation. But he also highlights the positive changes happening in Phoenix, in particular the Gila River Indian Community's successful struggle to win back its water rights, potentially shifting resources away from new housing developments to producing healthy local food for the people of the Phoenix Basin. Ross argues that this victory may serve as a new model for how green democracy can work, redressing the claims of those who have been aggrieved in a way that creates long term benefits for all. *Bird on Fire* offers a compelling take on one of the pressing issues of our time, finding pathways to sustainability at a time when governments are dismally failing in their responsibility to address climate change. — *The Oxford Handbook of Global Justice* Thom Brooks, 2020

The Oxford Handbook of Global Justice explores an exciting area of refreshing innovative new ideas for a changing world facing significant challenges. — Climate Change and International Trade Rafael Leal-Arcas, 2013-01-01

Rafael Leal Arcas expertly examines the interface of climate change mitigation and international trade law with a view to addressing the question: How can we make best use of the international trading system experience to aim at a global climate change agreement? The insightful book contributes to developing the architecture for a post 2012 global climate agreement and in doing so seeks and proposes new approaches to climate change mitigation by linking it to the international trade system. The author suggests the adoption of a bottom up approach to climate change negotiations by using the evolution of multilateral trade agreements as a model for reaching a global climate treaty. He discusses the innovative approach of inserting climate goals within regional trade agreements given their proliferation, especially bilateral in the international trading system. He explains the trade implications of climate change mitigation policies by analyzing a couple of areas where the international regimes for trade and climate change mitigation may potentially clash. *Climate Change and International Trade* will strongly appeal to undergraduate and graduate students of international and European trade law, international and European environmental law as well as social science academics, NGOs, think tanks, practitioners, researchers and international organizations will also find plenty of valuable information in this timely resource. — **Thriving** Megha Mukim, Mark Roberts, 2023-05-18

Between 1970 and 2021, the number of people living in cities increased from 1.19 billion to 4.46 billion, while the Earth's surface temperature climbed by 1.19 degrees Celsius above its preindustrial levels. Because of

the prosperity they helped generate cities have been a major cause of this climate change. However, it is also in cities that many of the solutions to the climate crisis in terms of both adaptation and mitigation will be found, not least because by 2050 almost 70 percent of the world's population will call cities home. As such, cities are the key to arguably the greatest public policy challenge of our times. To take stock of how green, how resilient, and how inclusive cities globally are today, *Thriving: Making Cities Green, Resilient and Inclusive in a Changing Climate* defines a global typology of more than 10,000 cities. It finds that there is wide variation in how green, resilient, and inclusive cities are around the world. It asks how climate change impacts cities and conversely how cities affect climate. Vicious cycles in development could occur as cities become more vulnerable to extreme events and the challenges compound and cascade. Finally, this report provides a compass for policy makers on policies that can help cities not only survive but also thrive in the face of the perils of climate change. Policy makers can and must act now to chart a more sustainable trajectory.

Key Indicators for Asia and the Pacific 2012 Asian Development Bank, 2012-08-01. The *Key Indicators for Asia and the Pacific 2012*, the 43rd edition of this series, includes the latest available economic, financial, social, and environmental indicators for the 48 regional members of the Asian Development Bank. This publication aims to present the latest key statistics on development issues concerning the economies of Asia and the Pacific to a wide audience, including policy makers, development practitioners, government officials, researchers, students, and the general public. Part I of this issue of the *Key Indicators* is a special chapter, *Green Urbanization in Asia*. Parts II and III comprise brief, non-technical analyses and statistical tables on the Millennium Development Goals and seven other themes. This year, the second edition of the *Framework of Inclusive Growth Indicators*, a special supplement to *Key Indicators*, is also included. The statistical tables in this issue of the *Key Indicators* may also be downloaded in MS Excel format from this website or in user-specified format at SDBS Online.

Transcultural Ecocriticism Stuart Cooke, Peter Denney, 2021-01-28. Bringing together decolonial, Romantic, and global literature perspectives, *Transcultural Ecocriticism* explores innovative new directions for the field of environmental literary studies. By examining these literatures across a range of geographical locations and historical periods, from Romantic period travel writing to Chinese science fiction and Aboriginal Australian poetry, the book makes a compelling case for the need for ecocriticism to competently translate between Indigenous and non-Indigenous, planetary and local, and contemporary and pre-modern perspectives. Leading scholars from Australasia and North America explore links between Indigenous knowledges, Romanticism, globalisation, avant-garde poetics, and critical theory in order to chart tensions as well as affinities between these discourses in a variety of genres of environmental representation, including science fiction, poetry, colonial natural history, and oral narrative.

Critical Theory Amirhosein Khandizaji, Wolfgang Sohst, 2025-07-01. *Critical Theory: The Last Stand for Emancipation* gathers leading voices in contemporary critical thought to reassert the enduring relevance of a tradition forged in resistance. From the early insights of the Frankfurt School to its intersections with decolonial, queer, ecological, and postcolonial critiques,

this volume maps the evolving terrain of a radical project devoted to unveiling domination and envisioning emancipation At a time when neoliberal orthodoxy undermines critical scholarship and authoritarian populism distorts public discourse this book refuses resignation It offers instead a lucid and urgent intervention one that confronts the alienations of digital life the legacies of colonial violence and the manufactured chaos of late capitalism With essays ranging from genealogy to praxis from epistemology to affect this collection insists that critical theory is not an academic relic but a living practice of resistance Whether reckoning with the failures of progress or reclaiming hope as a political act Critical Theory The Last Stand for Emancipation is a call to think deeply act ethically and remember that critique remains a vital tool in the struggle for a more just world
