Climbing The Mountains:

Life Is Like Climbing a Mountain James E. Bruce, 2008-09 The objective of this book is to inform educate inspire and motivate individuals and groups toward understanding oneself and others through a literal or virtual mountain climbing experience The aim is to introduce the reader to a literary journey that involves the process and the act of mountain climbing This book brings forth the recognition that just as literal mountains may be comprised of rocks trees ice snow and dirt either singularly or in any combination so too are we as individuals comprised of differing traits strengths values mores and beliefs that offer both specific strengths and weaknesses that alternate given the environment that surround us the situation presented to us and what we feel within us A volcanic mountain it should be noted is more representative to one's inner self Similar to that of this living rock changes occur subtly deep within us sometimes immediate and many times occurring unnoticed by us over long periods of time Like the sudden sight of smoke or vibrations felt from underground it is only during the external expression of change do we realize that we and those around us are merely experiencing the change that has long since occurred The inherent volatility of this living rock parallels the vulnerability potential explosiveness and yet the total dependencies that exist in the individual human experience as well as within our local and world communities These physical mountains are used as a metaphor to offer insight into understanding the dynamics and challenges that are involved in the process of climbing a virtual mountain The mountain climbing process might become more meaningful to an explorer who climbs a virtual mountain that may ultimately take the form of realizing a goal dream or aspiration This book explores the spiritual aspect of the physical mountain particularly how the physical mountain has been a reference place for some people whose successful climb offer testimony to a life changing experience This mountain climbing model is useful towards attaining individual personal or collective goals set in areas such as education business wealth building job or career development marriage political aspirations geographical relocating re-establishing oneself raising children leading or managing sports teams hiring and managing a work force or even military strategy This climbing a mountain model can be used for creating a strategic map towards achieving other personal goals such as writing a book building a house from the ground up or regaining physical or mental health Similarly for organizations this climbing a mountain model can be used as a guide when setting an organization's growth plans in motion The principles are the same Finally this book provides a strategic working roadmap that will transform the reader to an explorer to a believer and finally to an achiever The achiever in retrospect will be inspired to recall and then recite the most powerful words I said I can I know that I would and I made it happen

Reaching New Heights Carl Lee, 2013-08 Carl is a businessman who started climbing mountains relatively late in life His love for the mountains and great outdoors started as a boy growing up in Wyoming Weekends were often spent in the Wyoming hills and mountains hunting Indian artifacts or catching trout Climbing always interested him but for most of his life he never considered becoming a mountain climber But as he commuted to his job in Boulder Colorado one beautiful and

huge mountain greeted him each day Longs Peak The dormant desire to climb mountains came alive A goal was set to climb Longs Peak This was an especially challenging goal as Carl was still recovering from kidney cancer Together with his rehabilitation specialist plans were made to climb Longs Peak With a significant amount of physical conditioning Carl stood on the summit of this great Colorado 14er A passion to climb mountains was born In the summer of 2009 Carl put work on the backburner to focus on mountain climbing Ten mountains were selected He had two primary goals for the Summer of Climbing first to summit each mountain Second to look for the defining moment of each climb and then to develop life lessons around the defining moments The Result is Reaching New Heights A Summer of Climbing Join Carl as he climbs Experience the thrill pain and sense of accomplishment as he works his way to the summit Then spend time in reflecting on the defining moments and the lessons he learned His life was changed writing this book As you journey with him through his Summer of Climbing his prayer is that you will be blessed enriched and challenged **Two for the Summit** Geoffrey

Climbing Mountains in Heaven Mark Steven Macaluso,2006-06-01 An autobiography of events and experiences tells a great deal about what has happened to us But does it really reveal who we are I think not These events are the circumstances of our life and often give birth to labels by which others think they know us As Yale Law Professor Stephen Carter so eloquently put it To be black and an intellectual in America is to live in a box So I live in a box not of my own making and on the box is a label not of my own choosing Most of those who have not met me and many of those who have see the box and read the label and imagine that they have seen me The box is formed by the assumptions others make when they learn that I am black and a label is available for every occasion The reality is that being black and being named Muhammad Abdullah gives birth to labels that become more than boxes in which I am placed they have become glasses through which others attempt to see and judge who I am Worse for a large portion of my life they were the glasses through which I saw myself These glasses were akin to attempting to see myself as one tries to see the bride behind and beneath the veil This book removes the veil It is an autobiography of my inner life of my ideas Reflections in the Key of Life is like a song a song of my soul It is my composition and like my favorite music form jazz it will often appear to stray from the melody But even in the

midst of the straying a gem is discovered then another and yet another and just as you find yourself becoming interested in gems and collecting all you can gather you find yourself back at the melody and the gems like bread crumbs have led you there back to where you began As T S Elliot put it And the end of all explorations is to return to that place where you began and know it for the first time

Climb the Mountain Pearl P. Glasgow,2012-06 It explores the possibility of a new beginning even after one experiences what they consider to be failure It starts off by looking at the number 8 as the number of new beginnings the eighth day was the dawn of a new beginning for Adam in the garden That was the beginning of God releasing His creation over to Adam to take care of it and cultivate it taking Adam s life to a new standard of living There are seven days in a week but the eighth day is a completely new beginning to a new week of new possibilities and new opportunities The author encourages the reader If for any reason you felt that you have failed in the past now is the time to begin again with a view to climbing those mountains in your life The mountain peaks of achievement and advancement are never crowded Not many people aspire to climb because it is hard work But what most people fail to realize is the significance of just being on the mountain The climb is usually difficult but the benefits are overwhelming You must have the vision to dream big the strength and courage to reach what
