Decolonising Restorative Justice Leanne Alexis Levers, 2023-09-01 This book critically examines the colonial dimensions of restorative justice through the lens of justice policy reform in Jamaica Restorative justice is not new Practices of restitution can be found throughout history predominantly in non Western traditions and religions One of the key principles of restorative practices is contextualisation

That is restorative practices are developed and embedded within the political economic and cultural context of the communities in which they are practised Many of the countries that have gone on to develop restorative justice as part of their formal justice system have developed their policy on the model of their indigenous communities for example in Canada and in New Zealand However with the globalisation of restorative practices within the past decade many countries have sought to colonise restorative justice by developing a standardised best practice approach Instead of a practice that is developed and formed by its community colonised restorative justice dictates that one size fits all Examined through the lens of the development and implementation of restorative justice policies in Jamaica this book argues that this Westernised approach diminishes the effectiveness of restorative justice in its capacity to address the victim s needs to hold the offender accountable in a way that reintegrates them into society and to empower the community by involving them in the provision of justice to victims Restorative justice then must be decolonised and local indigenous practices acknowledged if it is to achieve its aims This book will be of interest to a range of scholars with interests in decolonisation as well as alternative dispute resolution especially those in sociolegal studies criminology human rights social policy political science and Caribbean studies

Drug War Pathologies Horace

A. Bartilow,2019-07-30 In this book Horace Bartilow develops a theory of embedded corporatism to explain the U S government s war on drugs Stemming from President Richard Nixon s 1971 call for an international approach to this war U S drug enforcement policy has persisted with few changes to the present day despite widespread criticism of its effectiveness and of its unequal effects on hundreds of millions of people across the Americas While researchers consistently emphasize the role of race in U S drug enforcement Bartilow s empirical analysis highlights the class dimension of the drug war and the immense power that American corporations wield within the regime Drawing on qualitative case study methods declassified U S government documents and advanced econometric estimators that analyze cross national data Bartilow demonstrates how corporate power is projected and embedded in lobbying financing of federal elections funding of policy think tanks and interlocks with the federal government and the military Embedded corporatism he explains creates the conditions by which interests of state and nonstate members of the regime converge to promote capital accumulation The subsequent human rights repression illiberal democratic governments antiworker practices and widening income inequality throughout the Americas Bartilow argues are the pathological policy outcomes of embedded corporatism in drug enforcement
