Disability, Avoidance and the Academy David Bolt, Claire Penketh, 2017-07-14 Disability is a widespread phenomenon indeed a potentially universal one as life expectancies rise Within the academic world it has relevance for all disciplines yet is often dismissed as a niche market or someone else's domain This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies This innovative book brings together work in the humanities and the social sciences and draws on the riches of cultural diversity

to challenge institutional and disciplinary avoidance Divided into three parts the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts The final part shows how more diverse cultural engagement offers a way forward for the academy demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension disability theory activism experience and culture Disability Avoidance and the Academy Challenging Resistance will interest students and scholars of disability studies education studies and cultural studies *Intellectual Disability and Being Human* Chrissie Rogers, 2016-02-26

Whilst legislation may have progressed internationally and nationally for disabled people barriers continue to exist of which one of the most pervasive and ingrained is attitudinal Social attitudes are often rooted in a lack of knowledge and are perpetuated through erroneous stereotypes and ultimately these legal and policy changes are ineffectual without a corresponding attitudinal change This unique book provides a much needed multifaceted exploration of changing social attitudes toward disability Adopting a tripartite approach to examining disability the book looks at historical cultural and education studies broadly conceived in order to provide a multidisciplinary and interdisciplinary approach to the documentation and

endorsement of changing social attitudes toward disability Written by a selection of established and emerging scholars in the field the book aims to break down some of the unhelpful boundaries between disciplines so that disability is recognised as an issue for all of us across all aspects of society and to encourage readers to recognise disability in all its forms and within all its contexts This truly multidimensional approach to changing social attitudes will be important reading for students and researchers of disability from education cultural and disability studies and all those interested in the questions and issues surrounding attitudes toward disability Understanding the Lived Experiences of Persons with Disabilities in Nine Countries Rune Halvorsen,Bjørn Hvinden,Julie Beadle Brown,Mario Biggeri,Jan Tøssebro,Anne Waldschmidt,2017-12-01 Over the last three decades a number of reforms have taken place in European social policy with an impact on the opportunities for persons with disabilities to be full and active members of society The policy reforms have aimed to change the balance between citizens rights and duties and the opportunities to enjoy choice and autonomy live in the community and participate in political decision making processes of importance for one s life How do the reforms influence the opportunities to exercise Active Citizenship This volume presents the findings from the first cross national comparison of how persons with disabilities reflexively make their way through the world pursuing their own interests and values The volume considers how their experiences views and aspirations regarding participation vary across Europe Based on retrospective life course interviews the volume examines the scope for agency on the part of persons with disabilities i e the extent to which men and women with disabilities are able to make choices and pursue lives they have reasons to value Drawing on structuration theory and the capability approach the volume investigates the opportunities for exercising Active Citizenship among men and women in nine European countries The volume identifies the policy implications of a process oriented and multi dimensional approach to Active Citizenship in European disability policy It will appeal to policymakers and policy officials as well as to researchers and students of disability studies comparative social policy international disability law and qualitative research methods

young people in the Global North is the multiple ways that have emerged to monitor their development behaviour and character. In particular, disabled children or children with unusual developmental patterns can find themselves surrounded by multiple practices through which they are examined. This rich book draws on a wide range of qualitative research to look at how disabled children have been cared for, treated and categorised. Narrative and longitudinal interviews with children and their families, along with stories and images they have produced and notes from observations of different spaces in their lives – medical consultation rooms, cafes and leisure centres, homes, classrooms and playgrounds – amongst others, all make a contribution. Bringing this wealth of empirical data together with conceptual ideas from disability studies, sociology of the body, childhood studies, symbolic interactionism and feminist critical theory, the authors explore the multiple ways in which monitoring occurs within childhood disability and its social effects. Their discussion includes examining the dynamics of differentiation via medicine, social interaction and embodiment, and the multiple actors, including children and young people themselves, involved. The book also investigates the practices that differentiate children into different categories and what this means for notions of normality, integration, belonging and citizenship. Scrutinising the multiple forms of monitoring around disabled children and the consequences they generate for how we think about childhood and what is normal, this volume sits at the intersection of disability studies and childhood studies.

The Routledge International Handbook of Disability Human Rights Hierarchies Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31

Disability is defined by hierarchy Regardless of culture or context persons with disabilities are almost always pushed to the bottom of the social hierarchy With the advent of the Convention on the Rights of Persons with Disabilities 2006 disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally Despite important progress the disability human rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states international organizations or advocates want rather than what those on the ground need most This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread implementation and protection of disability human rights The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups rights In order to change this situation inequalities across the disability human rights movement must be explored Divided into five parts Who counts as disabled Political social and cultural context Which rights on top whose rights on bottom Pushed to the periphery in the disability rights movement Representations of disability and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean Bangladesh Bosnia Herzegovina China Ghana Haiti Hungary India Israel Kenya Latin America Poland Russia Scotland Serbia and South Africa and other countries this book will be of interest to all scholars and students of disability studies sociology human rights law and social policy
