Listening in Action Rebecca Rinsema, 2016-10-14 In an age when students come to class with more varied music listening preferences and experiences than ever before music educators can find themselves at a loss for how to connect with their students *Listening in Action* provides the beginnings of a solution to this problem by characterizing students contemporary music listening experiences as they are mediated by digital technologies Several components of contemporary music listening experiences are described including the relationship between music listening experiences and listener engagements with other activities listener agency in creating playlists and listening experiences as a whole and the development of adolescent identities as related to the agency afforded by music listening devices The book provides an accessible introduction to scholarship on music listening across the disciplines of musicology ethnomusicology sociology of music psychology of music and music education By reading *Listening in Action* music educators can gain an understanding of recent theories of music listening in everyday life and how those theories might be applied to bridge the gap between music pedagogies and students who encounter music in a heavily mediated postperformance world

Becoming Creative Juniper Hill, 2018-10-03 How are our ability and motivation to be creative shaped by the world around us Why does creativity seem to flourish in some environments while others seem to stifle it Many societies value creativity as an abstract concept and many perhaps even most individuals feel an internal drive to be creative however tremendous social pressures restrict individuals development of creative skill sets

engagement in creative activities and willingness to take creative risks *Becoming Creative* explores how social and cultural factors enable or inhibit creativity in music Author Juniper Hill integrates perspectives from ethnomusicology education sociology psychology and performance studies while prioritizing the voices of practicing musicians and music educators Insights are drawn from ethnographic research and in depth interviews with classical jazz and traditional musicians in South Africa Finland and the US By comparing and analysing these musicians personal experiences *Becoming Creative* deepens our understanding of the development and practice of musical creativity the external factors that influence it and strategies for enhancing it Hill reveals the common components of how musical creativity is experienced across these cultures and explains why creativity might not always be socially desirable She identifies ideal creativity enabling criteria specific skills sets psychological traits and states and access to opportunities and authority and illustrates how these enablers of creativity are fostered or thwarted by a variety of beliefs attitudes learning methods social relationships institutions and social inequalities In addition to theoretical contributions many sections have direct applications for practice especially the examination of formal and informal strategies for overcoming inhibitors of creativity *Becoming Creative* is for scholars artists educators and anyone wishing to better understand and support creative development in today s world *Remixing the Classroom* Randall Everett Allsup, 2016-06-27 In a delightfully self conscious philosophical mash up Randall Everett Allsup provides alternatives for the traditional master apprentice teaching model that has characterized music education By providing examples across the arts and humanities Allsup promotes a vision of education that is open changing and adventurous at heart He contends that the imperative of growth at the core of all teaching and learning relationships is made richer though less certain when it is fused with a student s self initiated quest In this way the formal study of music turns from an education in teacher directed craft and moves into much larger and more complicated fields of exploration Through vivid stories and evocative prose Randall Everett Allsup advocates for an open quest driven teaching model that has repercussions for music education and the humanities more generally *Doctoral Dissertations in Musicology* ,1984 ***American Doctoral Dissertations*** ,1976
