eight diverse genocides large scale and small well known and obscure through the lens of criminal behavior Rafter explores different models of genocidal activity reflecting on the popular use of the Holocaust as a model for genocide and ways in which other genocides conform to different patterns For instance Rafter questions the assumption that only ethnic groups are targeted for genocidal cleansing and she also urges that actions such as genocidal rape be considered alongside traditional instances of genocidal violence Further by examining the causes of genocide on different levels Rafter is able to construct profiles of typical victims and perpetrators and discuss means of preventing genocide in addition to delving into the social psychology of genocidal behavior and the ways in which genocides are brought to an end A sweeping and innovative investigation into the most tragic of events in the modern world *The Crime of All Crimes* will fundamentally change how we think about genocide in the present day

Emily Gets Her Gun Emily Miller, 2013-09-03 In the wake of tragic shootings in Newtown and Aurora the anti gun lobby has launched a campaign of lies distortion misrepresentation and emotional manipulation that is breathtaking in its vitriol and its denial of basic facts Their goal is to take away our Second Amendment rights and then disarm law abiding Americans Emily Miller tells her personal story of how being a single female victim of a home invasion drove her to try to obtain a legally registered gun in Washington D C The narrative sometimes shocking other times hilarious in its absurdity gives the reader a real life understanding of how gun control laws only make it more difficult for honest law abiding people to get guns while violent crime continues to rise Using facts and newly uncovered research Miller exposes the schemes politicians on Capitol Hill in the White House and around the country are using to deny people their Second Amendment rights She exposes the myths that gun grabbers and liberal media use to get new laws passed that infringe on our right to keep and bear arms The gun rights debate isn't just about firearms It's about protecting a fundamental right that is enshrined in the U S Constitution It's about politicians who lie manipulate and outright break existing laws to get what they want It's about President Obama wanting a bigger federal government to control you Not just your guns you The fight for gun rights is the fight for freedom Emily Miller says stand up and fight back now because your Second Amendment will only be the first to go

Public Confidence in Criminal Justice Elizabeth R. Turner, 2017-12-04 In this book Liz Turner argues that survey methods have gained an unwarranted and unhealthy level of dominance when it comes to understanding how the public views the criminal justice system The focus on measuring public confidence in criminal justice by researchers politicians and criminal justice agencies has tended to prioritise the production of quantitative representations of general opinions at the expense of more specific qualitative or deliberative approaches This has occurred not due to any inherent methodological superiority of survey based approaches but due to the congruence of the survey based general measure of opinion with the prevailing neoliberal political tendency to engage with citizens as consumers By identifying the historical conditions on which contemporary knowledge claims rest and tracing the political power struggles out of which sprang the idea of public confidence in criminal justice as a real and measurable object Turner shows that

things could be otherwise She also draws attention to the ways in which survey researchers have asserted their dominance over other approaches suppressing convincing claims by advocates of deliberative methods that a better politics of crime and justice is possible Ultimately Turner concludes researchers need to be more upfront about their political objectives and more alert to the political responsibilities that go along with the making of knowledge claims Providing a provocative critique of the dominant approaches to measuring public confidence this timely study will be of special interest to scholars of the criminal justice system research methods and British politics

Policing the Borders Within Ana Aliverti, 2021-06-25

Policing the Borders Within offers an in depth comprehensive exploration of the everyday working of inland border controls in Britain informed by extensive empirical material viewed through the lens of wide ranging interdisciplinary debates In particular this book examines afresh the relationship between policing borders and social order in terms of migration policing By charting this new landscape of everyday contemporary policing this book s main goal is to advance understanding of novel forms of law enforcement in a global age These new forms of collaboration direct attention to the way in which frontline enforcement agents through their everyday work not only enforce the border but recreate it As the book argues the emphasis on borders and migration controls and the growing importance of it within inland policing is a symptom of the new demands and challenges facing the state in exercising authority in a fast moving interconnected world and its attempt to offer a semblance of order Such challenges result in practice of random capricious informal and arbitrary operation of power which relies on non rational elements to solve policing problems Through an ethnography of the worlds of police and immigration officers this book dissects the ethical political legal and social dilemmas and explores the tensions and contradictions of maintaining order in a deeply unequal globalized world The new impetus to police migration is an insightful entry point to understand law enforcement in a global age

Hard Bargains Mona Lynch, 2016-11-01

The convergence of tough on crime politics stiffer sentencing laws and jurisdictional expansion in the 1970s and 1980s increased the powers of federal prosecutors in unprecedented ways In **Hard Bargains** social psychologist Mona Lynch investigates the increased power of these prosecutors in our age of mass incarceration Lynch documents how prosecutors use punitive federal drug laws to coerce guilty pleas and obtain long prison sentences for defendants particularly those who are African American and exposes deep injustices in the federal courts As a result of the War on Drugs the number of drug cases prosecuted each year in federal courts has increased fivefold since 1980 Lynch goes behind the scenes in three federal court districts and finds that federal prosecutors have considerable discretion in adjudicating these cases Federal drug laws are wielded differently in each district but with such force to overwhelm defendants ability to assert their rights For drug defendants with prior convictions the stakes are even higher since prosecutors can file charges that incur lengthy prison sentences including life in prison without parole Through extensive field research Lynch finds that prosecutors frequently use the threat of extremely severe sentences to compel defendants to plead guilty rather than go to trial and risk much harsher punishment Lynch also

shows that the highly discretionary ways in which federal prosecutors work with law enforcement have led to significant racial disparities in federal courts For instance most federal charges for crack cocaine offenses are brought against African Americans even though whites are more likely to use crack In addition Latinos are increasingly entering the federal system as a result of aggressive immigration crackdowns that also target illicit drugs Hard Bargains provides an incisive and revealing look at how legal reforms over the last five decades have shifted excessive authority to federal prosecutors resulting in the erosion of defendants rights and extreme sentences for those convicted Lynch proposes a broad overhaul of the federal criminal justice system to restore the balance of power and retreat from the punitive indulgences of the War on Drugs
