Hughes, 2022-04-26 This book makes an original contribution to reconnecting criminological inquiry to the core concerns of the classical sociological imagination and to the intellectual resources of comparative and historical sociology Throughout the book Hughes challenges the long standing division of labour in criminology and sociology more generally between theory method and research Accordingly the author s concerns here are as much about the craft and working methods of being a sociological criminologist as it is about theory and concepts In the first half of the book the key conceptual and methodological premises of the classical sociological tradition are outlined and the latter s potential for revitalizing contemporary criminological research theorizing are assessed These chapters also address the debate regarding the relationship between crime and violence and that of modernity and the Western civilizing process In the second half of the book three areas of current criminological inquiry are explored through the lens of the long term process oriented and radically relational perspective of contemporary Weberian and Eliasian scholarship Among the areas of comparative investigation explored here are street crime gangs and urban violence genocide and murderous ethnic cleansing warfare colonialism and human rights Written in a clear and direct style this book will appeal to students and scholars of criminology sociology and all those interested in what a sociological lens brings to the practices of contemporary criminology

**Ontology of Organized Crime** Stephen Schneider, 2024-11-29 One of the most elusive pursuits in the study of organized crime is developing a definition description or conceptual model that captures its complexity diversity and ever changing nature This book takes a comprehensive approach to unraveling the intricacies and variations of organized crime providing a

detailed account of its many attributes Based on a review of the theoretical literature the author has created a holistic typology essential to understanding organized crime The typology comprises 28 attributes divided into five thematic categories associational the relationship among the offenders that leads to some discernible structure commercial revenue generating crimes operational support functions and expenditures institutional factors that sustain a criminal association and activities over time and cultural behavioral the norms values and codes of organized crime and how they affect the actions of offenders These categories are not simply used to classify the different attributes each one represents a structural pillar of an organized criminal association As a meta analytical framework the typology is the first to incorporate the foremost ways in which organized crime has been conceptualized in the literature as an association of offenders the crimes perpetrated how organized crimes are carried out and as a form of underworld governance The book also adapts the static typology into a flexible and testable conceptual model that recognizes the many variations among organized criminal associations and which can be used to determine when a group of offenders constitutes organized crime Besides their theoretical and empirical purposes the typology and conceptual model have been constructed as applied frameworks for informing strategic enforcement setting priorities tactical enforcement targeting and denigrating the structural pillars of an organized criminal association and policy purposes as a basis for a comprehensive multi sectoral control plan This book is invaluable for students and scholars studying organized crime as well as criminal justice professionals looking for guidance on enforcement strategies and public policies
