Cameos For Calculus Visualization In The First Year Course:

Cameos for Calculus Roger B. Nelsen, 2015-12-31 A thespian or cinematographer might define a cameo as a brief appearance of a known figure while a gemologist or lapidary might define it as a precious or semiprecious stone This book presents fifty short enhancements or supplements the cameos for the first year calculus course in which a geometric figure briefly appears Some of the cameos illustrate mainstream topics such as the derivative combinatorial formulas used to compute Riemann sums or the geometry behind many geometric series Other cameos present topics accessible to students at the calculus level but not usually encountered in the course such as the Cauchy Schwarz inequality the arithmetic mean geometric mean inequality and the Euler Mascheroni constant There are fifty cameos in the book grouped into five sections Part I Limits and Differentiation Part II Integration Part III Infinite Series Part IV Additional Topics and Part V Appendix Some Precalculus Topics Many of the cameos include exercises so Solutions to all the Exercises follows Part V The book concludes with references and an index Many of the cameos are adapted from articles published in journals of the MAA such as The American Mathematical Monthly Mathematics Magazine and The College Mathematics Journal Some come from other mathematical journals and some were created for this book By gathering the cameos into a book the Author hopes that they will be more accessible to teachers of calculus both for use in the classroom and as supplementary explorations for students

Introduction to the Mathematics of Computer Graphics Nathan Carter, 2016-12-31 This text by an award winning Author was designed to accompany his first year seminar in the mathematics of computer graphics Readers learn the mathematics behind the computational aspects of space shape transformation color rendering animation and modeling The software required is freely available on the Internet for Mac Windows and Linux The text answers questions such as these How do artists build up realistic shapes from geometric primitives What computations is my computer doing when it generates a realistic image of my 3D scene What mathematical tools can I use to animate an object through space Why do movies always look more realistic than video games Containing the mathematics and computing needed for making their own 3D computer generated images and animations the text and the course it supports culminates in a project in which students create a short animated movie using free software Algebra and trigonometry are prerequisites calculus is not though it helps Programming is not required Includes optional advanced exercises for students with strong backgrounds in math or computer science Instructors interested in exposing their liberal arts students to the beautiful mathematics behind computer graphics will find a rich resource in this text

Proofs Without Words III Roger B. Nelsen, 2015-12-31 Proofs without words PWWs are figures or diagrams that help the reader see why a particular mathematical statement is true and how one might begin to formally prove it true PWWs are not new many date back to classical Greece ancient China and medieval Europe and the Middle East PWWs have been regular features of the MAA journals Mathematics Magazine and The College Mathematics Journal for many years and the MAA published the collections of PWWs Proofs Without Words Exercises in Visual Thinking in

1993 and Proofs Without Words II More Exercises in Visual Thinking in 2000 This book is the third such collection of PWWs
