Huebner,2014-10-10 George Herbert Mead is a foundational figure in sociology best known for his book Mind Self and  
Society which was put together after his death from course notes taken by stenographers and students and from unpublished  
manuscripts Mead however never taught a course primarily housed in a sociology department and he wrote about a wide  
variety of topics far outside of the concerns for which he is predominantly remembered including experimental and  
comparative psychology the history of science and relativity theory In short he is known in a discipline in which he did not  
teach for a book he did not write In Becoming Mead Daniel R Huebner traces the ways in which knowledge has been  
produced by and about the famed American philosopher Instead of treating Mead s problematic reputation as a separate  
topic of study from his intellectual biography Huebner considers both biography and reputation as social processes of  
knowledge production He uses Mead as a case study and provides fresh new answers to critical questions in the social  
sciences such as how authors come to be considered canonical in particular disciplines how academics understand and use  
others works in their research and how claims to authority and knowledge are made in scholarship Becoming Mead provides  
a novel take on the history of sociology placing it in critical dialogue with cultural sociology and the sociology of knowledge

of John Dewey's writings. In summary, Swartz's book aims to engage educators in dialogues that will lead to improved educational theories and practices.

Strategic Management of Market Niches Gorazd Ocvirik, 2017-11-22 Gorazd Ocvirik creates a comprehensive model for the strategic management of market niches and provides a framework for the construction of a strategic management theory of market niches. Based on the current state of research on the niche topic within strategic management, there are many niche typologies but no clear common methodological and theoretical framework on which to lean. This model has remained absent from the market niche research in the field of strategic management and has led to a state of conceptual ambiguity of the field.
