Taylor, 1999 Biological Inquiry Neil A. Campbell, Margaret Waterman, Ethel Stanley, Jane B. Reece, 2007-12 This workbook offers an investigative case study for each unit of the book Each case study requires students to synthesize information from one unit of the text and apply that knowledge to a real world scenario as they evaluate new information analyze evidence plot data or seek explanations This workbook includes two new case studies one on avian influenza and one on hedgehog developmental pathways Animal Acoustic Communication Steven L. Hopp, Michael J. Owren, Christopher S. Evans, 2012-12-06 The last decades have brought a significant increase in research on acoustic communication in animals Publication of scientific papers on both empirical and theoretical aspects of this topic has greatly increased and a new journal Bioacoustics is entirely devoted to such articles Coupled with this proliferation of work is a recognition that many of the current issues are best approached with an interdisciplinary perspective requiring technical and theoretical contributions from a number of areas of inquiry that have traditionally been separated With the notable exception of a collection edited by Lewis 1983 there have been few volumes predominately focused on technical issues in comparative bioacoustics to follow up the early works edited by Lanyon and Tavolga 1960 and Busnel 1963 It was the tremendous growth of expertise concerning this topic in particular that provided the initial impetus to organize this volume which attempts to present fundamental information from both theoretical and applied aspects of current bioacoustics research While a completely comprehensive review would be impractical this volume offers a basic treatment of a wide variety of topics aimed at providing a conceptual framework within which researchers can address their own questions Each presentation is designed to be useful to the broadest possible spectrum of researchers including both those currently working in any of the many and diverse disciplines of bioacoustics and others that may be new to such studies

**Creatures of Cain** Erika Lorraine Milam, 2018-12-11 How Cold War America came to attribute human evolutionary success to our species unique capacity for murder After World War II the question of how to define a universal human nature took on new urgency Creatures of Cain charts the rise and precipitous fall in Cold War America of a theory that attributed man s evolutionary success to his unique capacity for murder Drawing on a wealth of archival materials and in depth interviews Erika Lorraine Milam reveals how the scientists who advanced this killer ape theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity s problems even to answer the most fundamental questions of human identity The killer ape theory spread quickly from colloquial science publications to late night television classrooms political debates and Hollywood films Behind the scenes however scientists were sharply divided their disagreements centering squarely on questions of race and gender Then in the 1970s the theory unraveled altogether

when primatologists discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science Creatures of Cain argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature      **Government Reports Annual Index** ,1975
