which deserves wider publicity Three of the most important geomorphological facts related to Canada are that 90% of its total area emerged from ice sheet cover relatively recently from a geological perspective permafrost underlies 50% of its landmass and the country enjoys the benefits of having three oceans as its borders the Arctic Pacific and Atlantic oceans Canada West is a land of extreme contrasts from the rugged Cordillera to the wide open spaces of the Prairies from the humid west coast forests to the semi desert in the interior of British Columbia and from the vast Mackenzie river system of the to small steep cascading streams on Vancouver Island The thickest Canadian permafrost is found in the Yukon and extensive areas of the Cordillera are underlain by sporadic permafrost side by side with the never glaciated plateaus of the Yukon One of the curiosities of Canada West is the presence of volcanic landforms extruded through the ice cover of the late Pleistocene and Holocene epochs which have also left a strong imprint on the landscape The Mackenzie and Fraser deltas provide the contrast of large river deltas debouching respectively into the Arctic and Pacific oceans

The Northern Forest Border in Canada and Alaska James A. Larsen, 2012-12-06 It is enough to work on the assumption that all of the details matter in the end in some unknown but vital way Edward O Wilson Biophilia Advances in knowledge of northern ecology have been so rapid that to undertake a synthesis of all the literature now available would be a major enterprise perhaps even a life's work and so it must be considered permissible to fill in a few gaps follow one's own inclinations leaving comprehensive syntheses to those willing to undertake them This is the rubric under which I have written reporting some of the more interesting data I and others have obtained over the years often diverging into discussions of plants soils climate and faunal relationships which have perhaps not previously been dealt with extensively or at least in quite the same way This is purely intentional since I find it difficult to summon up the needed enthusiasm at this late hour to write on topics which unfortunately for me have little attraction I have thus written for the pleasure derived from depicting perhaps at times as something of an impressionist a fascinating biotic region a captivating land a collection of interesting ecological problems environmental relationships to be discerned in part perhaps understood to some small degree perhaps one day to be modeled mathematically As Leo Szilard once wrote to be able to say even this much might be of some value Szilard 1960
