Can God Intervene How Religion Explains Natural Disasters:

Can God Intervene? Gary Stern, 2007-04-30 The death and devastation wrought by the tsunami in South Asia Hurricane Katrina in the Gulf states the earthquake in Pakistan the mudslides in the Philippines the tornadoes in the American Midwest another earthquake in Indonesia these are only the most recent acts of God to cause people of faith to question God's role in the physical universe Volcanic eruptions wildfires epidemics floods blizzards droughts hailstorms and famines can all raise the same questions Can God intervene in natural events to prevent death injury sickness and suffering If so why does God not act If not is God truly the All Loving All Powerful and All Present Being that many religions proclaim Grappling with such questions has always been an essential component of religion and different faiths have arrived at wildly different answers To explore various religious explanations of the tragedies inflicted by nature author Gary Stern has interviewed 43 prominent religious leaders across the religious spectrum among them Rabbi Harold Kushner author of When Bad Things Happen to Good People Father Benedict Groeschel author of Arise from Darkness The Rev James Rowe Adams founder of the Center for Progressive Christianity Kenneth R Samples vice president of Reason to Believe Dr James Cone the legendary African American theologian Tony Campolo founder of the Evangelical Association for the Promotion of Education Dr Sayyid Syeed general secretary of the Islamic Society of North America Imam Yahya Hendi the first Muslim chaplain at Georgetown University Dr Arvind Sharma one of the world's leading Hindu scholars Robert A F Thurman the first American to be ordained a Tibetan Buddhist monk David Silverman the national spokesman for American Atheists and others rabbis priests imams monks storefront ministers itinerant holy people professors and chaplains Jews Roman Catholics mainline Protestants evangelical Christians Muslims Hindus Buddhists and Atheists people of belief and people of nonbelief too Stern asked each of them probing questions about what their religion teaches and what their faith professes regarding the presence of tragedy Some feel that the forces of nature are simply impersonal and some believe that God is omniscient but not omnipotent Some claim that nature is ultimately destructive because of Original Sin some assert that the victims of natural disasters are sinners who deserve to die and some explain that natural disasters are the result of individual and collective karma Still others profess that God causes suffering in order to test and purify the victims Stern an award winning religion journalist has extensive experience in this type of analytical journalism The result is a work that probes and challenges real people's beliefs about a subject that unfortunately touches everyone's life

Religious Responses to Earthquake and Volcanic Eruption Disasters David Chester, Angus Duncan, John Duncan, 2024-07-26 This book argues that although secular and religious perspectives on disasters have often conflicted today there are grounds for believing that the world's major faiths have much to contribute to the processes of post disaster recovery and future disaster risk reduction DRR It seeks to demonstrate how contemporary dialogues between theologians disaster scholars and policymakers are defining new ways of working together These explore how the resources of religious communities e.g buildings human resources and finance may be used to foster

successful policies of DRR particularly in the aftermath of earthquakes and volcanic eruptions Musing on the relationships between religion and disasters has occurred for millennia and has affected many societies worldwide In societies where the world's major religions Buddhism Christianity Hinduism Islam Judaism and Shinto have been and remain dominant attempting to find supernatural explanations for disasters has occurred throughout history and there have been many theologies seeking to explain why people suffer losses It is argued that developments both within these traditions of faith and in how disasters are understood by the hazard research community of researchers and planners have allowed a new *modus vivendi* to emerge which emphasises both a recognition of religious worldviews by academic writers and disaster planners on the one hand and a desire by people of faith and their leaders to be more fully committed to the goals of DRR The book will appeal to those who are interested in the interface between disasters and theology across the principal religions of the world This includes researchers and students in geology geography theology and religious studies It will also be useful for specialist academic audience and the educated general reader *Joining God in the Thin Places* Mary Schaller Blaufuss, 2025-04-17

Joining God in the Thin Places affirms that everyone is a theologian Authentic theological reflection emerges in natural disasters as people experience disruption and margins That theological reflection carries the authority of the well being of people who begin as vulnerable or excluded by injustice The mutual accountability of God and all creation shapes resilient communities I have threaded my own experience in disaster events as a staff leader in the national United Church of Christ's disaster refugee and sustainable development ministries with public discourse emerging from these and other disasters This book utilizes resources of Bible theologies quantum science history art and liturgy Disaster theology is creation theology This book links climate change and natural disasters by rooting theologies active in natural disasters in who God is and what God does as creator redeemer and sustainer Accelerated climate change makes disasters more frequent intense and extended in duration than ever before It adds urgency to interacting well with creation that is complex and continuing for the sake of well being and flourishing Examples of local and global response and rebuilding demonstrate theologies of accompaniment partnership and solidarity seeking justice Those seeking practical ways to get involved will find them here

Harrison, 2019-10-30 Along comes a global pandemic coronavirus COVID 19 and our world is turned upside down Can the idea of samsara shed any light on all this terrible suffering turmoil and change Are we all travelling around the ever turning cycle of samsara being born dying then reborn again and again and again Does our life the things that happen to us and our death have any meaning What do Hinduism Buddhism and samsara tell us about suffering life and death Could spiritual dimensions exist or do we live in a purely material universe What is consciousness and does it die when our bodies die Are rebirth or reincarnation even possible Can we have spirituality without religion What if anything might spirituality or religion mean in a turbulent and unpredictable twenty first century Do mysticism psychedelics science and quantum physics offer clues to any of these questions Take a journey with the author through the fascinating cultures of Nepal India Bali and Cambodia and explore their rich traditions of Hinduism Buddhism and samsara Part exploration of spirituality and religion part travel adventure to places of astonishing diversity this book will get you thinking about your own beliefs life and death and where those might fit in to a bigger picture **Handbook of Hazards and Disaster Risk Reduction** Ben Wisner, JC

Gaillard, Ilan Kelman, 2012-03-29 The Handbook provides a comprehensive statement and reference point for hazard and disaster research policy making and practice in an international and multi disciplinary context It offers critical reviews and appraisals of current state of the art and future development of conceptual theoretical and practical approaches as well as empirical knowledge and available tools Organized into five inter related sections this Handbook contains sixty five contributions from leading scholars Section one situates hazards and disasters in their broad political cultural economic and environmental context Section two contains treatments of potentially damaging natural events phenomena organized by major earth system Section three critically reviews progress in responding to disasters including warning relief and recovery Section four addresses mitigation of potential loss and prevention of disasters under two sub headings governance advocacy and self help and communication and participation Section five ends with a concluding chapter by the editors The engaging international contributions reflect upon the politics and policy of how we think about and practice applied hazard research and disaster risk reduction This Handbook provides a wealth of interdisciplinary information and will appeal to students and practitioners interested in Geography Environment Studies and Development Studies *Acts of Aid* Eleonor

Marcussen, 2023-05-11 This socio political history on the aftermath of the 1934 Bihar Nepal earthquake explores disaster aid relief and reconstruction and the questions they give rise to about class communities and inequality The book traces disaster responses across the twentieth century in order to demonstrate how they were embedded in political processes transcending the event of the earthquake Aid relief and reconstruction mirrored political agendas and ideas that articulated both changes and continuities by the colonial state civil society and international organisations The impact of the earthquake and aid in its

wake varied widely according to social groups ethnicity and gender in the aftermath By studying the effects of the earthquake on communities directly affected and society the author argues that we can come closer to an understanding of the role political social and cultural factors held in shaping resilience to natural disasters This title is also available as Open Access on Cambridge Core Tornado God Peter J. Thuesen,2020-04-01 One of the earliest sources of humanity's religious impulse was severe weather which ancient peoples attributed to the wrath of storm gods Enlightenment thinkers derided such beliefs as superstition and predicted they would pass away as humans became more scientifically and theologically sophisticated But in America scientific and theological hubris came face to face with the tornado nature's most violent windstorm Striking the United States more than any other nation tornadoes have consistently defied scientists efforts to unlock their secrets Meteorologists now acknowledge that even the most powerful computers will likely never be able to predict a tornado's precise path Similarly tornadoes have repeatedly brought Americans to the outer limits of theology drawing them into the vortex of such mysteries as how to reconcile suffering with a loving God and whether there is underlying purpose or randomness in the universe In this groundbreaking history Peter Thuesen captures the harrowing drama of tornadoes as clergy theologians meteorologists and ordinary citizens struggle to make sense of these death dealing tempests He argues that in the tornado Americans experience something that is at once culturally peculiar the indigenous storm of the national imagination and religiously primal the sense of awe before an unpredictable and mysterious power He also shows that in an era of climate change the weather raises the issue of society's complicity in natural disasters In the whirlwind Americans confront the question of their own destiny how much is self determined and how much is beyond human understanding or control *Tsunami* Richard Hamblyn,2014-08-15 When the earthquake that struck the Solomon Islands in 2013 produced tsunami waves that damaged the country's infrastructure it was one in a recent string of reminders of the devastating effects these ferocious waves can have From the 2011 tsunami in Japan to the giant waves that killed people near the Indian Ocean in 2004 these destructive events can utterly overwhelm an area not just with water but economic social and political devastations But as Richard Hamblyn demonstrates in this cultural historical and scientific engagement with these spectacular natural phenomena tsunamis remain misunderstood their triggers from undersea earthquakes to nuclear weapons testing have only begun to be studied scientifically in the last fifty years Tsunami explores how these treacherous sea surges happen what makes them so powerful and what can be done to safeguard vulnerable coastlines Hamblyn details their cultural significance in tsunami prone places such as Japan Hawaii and Chile while also considering their importance in the more seismically stable West where their appearances are limited to popular culture and blockbuster films From the legend of Atlantis to the present day this book casts new light on these deadly waves *Samsara - The Wheel of Birth, Death and Rebirth: A journey through spirituality, religion, Nepal, Bali, Cambodia and India* Rebecca Harrison,2019-10-26 Travel with the author on a fascinating journey into samsara the cycle of birth death and rebirth the religions of Buddhism and

Is Our Vision of God Obsolete? G.R. Pafumi,2010-01-15 Our vision of God varies by culture It has changed over the millennia We no longer believe in the pagan gods of the Romans and Greeks Why should we expect that our current view of God will not change Scientific knowledge and discovery is occurring at a pace never before experienced in human history Yet our concept of God remains mired in the 15th century This is about to change It will become increasingly difficult for religions to convince believers educated in modern science to blindly accept as truth religious dogmas conceived centuries ago Religious scripture is a combination of literature myth and superstition Science will invalidate many of these myths This is why intelligent design advocates fear science *The End of Christianity* William A. Dembski,2009 A leading intelligent design supporter writes to prove a good God s existence in an evil world in turn explaining what the end result of true Christianity must be

Post-Tsunami Recovery in Thailand Monica Lindberg Falk,2014-09-19 Of all the huge natural disasters that claimed the lives of thousands in Asia the Indian Ocean tsunami in 2004 was the largest estimated to have killed more than 230 000 people The scope of damage brought about by this natural disaster urges focus on recovery and post disaster reconstruction from several perspectives Here we find an in depth ethnography of Thailand and the role of culture and religion as an underpinning issue in post disaster recovery Following the post tsunami recovery over five years the book provides knowledge on socio cultural responses from affected local communities after natural hazards and is based on original material collected in Thailand after the 2004 tsunami With a focus on how culture and religion interplay in the processes of building resilience and decreasing vulnerability it gives a deeper understanding of how disasters are experienced and dealt with on a local level It examines survivors experiences of rituals and ceremonies that became a part of the survivors lives in new ways after the tsunami offering psychological reassurance and religious efficaciousness as well as communication links between themselves and the deceased Using observations narratives and material from in depth interviews with survivors relatives relief workers officials and Buddhist monks and

nuns this book contributes to the research on anthropology of disaster and to the development of research on cultural resilience and religion in post disaster recovery It will be of interest to scholars of Disaster Studies Buddhist Studies and Asian Studies *Cultural Politics in Modern India* Makarand R. Paranjape, 2016-01-22 India's global proximities derive in good measure from its struggle against British imperialism In its efforts to become a nation India turned modern in its own unusual way At the heart of this metamorphosis was a colourful cosmopolitanism the unique manner in which India made the world its neighbourhood The most creative thinkers and leaders of that period reimagined diverse horizons They collaborated not only in widespread anti colonial struggles but also in articulating the vision of alter globalization universalism and cosmopolitanism This book in revealing this dimension offers new and original interpretations of figures such as Kant Tagore Heidegger Gandhi Aurobindo Gebser Kosambi Narayan Ezekiel and Spivak It also analyses cultural and aesthetic phenomena from the rasa theory to Bollywood cinema explaining how Indian ideas texts and cultural expressions interacted with a wider world and contributed to the making of modern India **J.M. Coetzee and Neoliberal Culture** Andrew Gibson, 2022-08-11 This book presents J M Coetzee's work as a complex nuanced counterblast to contemporary global neoliberal economics and its societies Not surprisingly given his many years in South Africa and Australia Coetzee writes from a global Southern perspective Drawing on a wealth of literature philosophy and theory the book reads Coetzee's writings as a discreet oblique but devastating engagement with neoliberal presumptions It identifies and focuses on various key features of neoliberal culture its obsession with self enrichment mastery growth its belief in plenitude endless resources its hubris and obsession with self promotion its desire for ease and easiness well being euphoria its fetishization of managerial reason and the culture of security its unrelenting positivity its belief in illusory goods and trivial progressivisms By contrast Coetzee's writings explore the virtues of irony and self reduction He commits himself to difficulty discomfort patient and austere if bleak inquiry rigorous questioning and radical doubt Destitution and failure come to look like a serious dignified form of life and thought The very tones of Coetzee's books run counter to those of our neoliberal democracies They point in a different direction to an age that has gone astray Positive Psychological Intervention Design and Protocols for Multi-Cultural Contexts Llewellyn Ellardus Van Zyl, Sebastiaan Rothmann Sr., 2019-06-11 This volume presents innovative and contemporary methodologies and intervention protocols for the enhancement of positive psychological attributes in multicultural professional and organizational contexts Most methods models and approaches that underpin positive psychological interventions are confined to clinical samples closed systems or monocultural contexts which restrict their applicability to particular contexts Extensive practical intervention protocols designs and methods which usually accompany first draft intervention papers are condensed into brief paragraphs in final manuscripts or removed in their entirety This in turn reduces their potential for replicability or adoption by consumers practitioners or industry This volume develops guidelines for enhancing positive psychological attributes such as positive moods e g positive affect life satisfaction strengths e g gratitude humour cognitions

e.g. hope, optimism and behaviours e.g. emotional regulation, positive relationship building within various multicultural contexts. Thereby it shows how positive psychology interventions can be replicated to a wide range of contexts beyond those in which they were developed. The Role of Mosque in Building Resilient Communities Abdur Rehman Cheema, 2021-12-04. This book is about the role of the mosque in the aftermath of the 2005 earthquake in Pakistan. Disasters give rise to a situation where people from different parts of the world, quite unfamiliar with each other, come into contact to save lives, provide necessities such as food and shelter, rebuild homes and enable community recovery. During these challenging times, community-based religious institutions such as churches, mosques and temples are a practical choice for reaching people living nearby to fulfil their needs. The book shows the contributions of the mosque as a physical, spiritual and social place for improving the knowledge and practice of disaster risk reduction and management, including the COVID-19 pandemic. It also illuminates the widening role of religion in development. The book reinforces the case for broader engagement with all community-based religious institutions. The book is of interest to academics in diverse fields including development studies, disaster studies, sociology, anthropology, religion, Asian studies, emergency and disaster management. It will also be of interest to the professional staff of disaster management authorities, public sector, bilateral and multilateral aid allocation and implementing agencies and those of humanitarian organizations. Making A Spectacle Megan Ruby, Michelle Angelo-Rocha, Mark Hickey, Vonzell Agosto, 2020-10-01. This book edition offers a collection of scholarship and reflections that goes beyond theoretical conversations. This volume helps reignite a dialogue not only by scholars but also by educators, activists and students who believe in inclusive and equal access to education for all individuals regardless of race, ethnicity, immigration status, gender, sexuality, religion and other identities. In this volume, the authors examine curriculum and pedagogy as a tool for recovery from political trauma and healing. They used this as an opportunity to confront some of the politically shameful situations affecting educational environments: homes, neighborhoods, enclaves and regions marked by socioeconomic inequality. The authors of *Making a Spectacle* present wide open questions: How are educators and school leaders learning to interact with one another, students, their families and community while facing increased mass school shootings, police violence, racial profiling, unequal access to education and basic needs during a pandemic, COVID-19 and other forms of sociopolitical stress influenced by discrimination, institutional racism and White nationalism? What curricular and pedagogical geographies are educators and students afforded through which to process their emotional responses to ecological or political activities witnessed in schools and their surrounding areas? These chapters and reflections/perspectives represent a diversity of positionalities within critical intersections of power and privilege as they relate to identity, culture and curriculum and social justice, schools and society. **Perspectives on Science and Christian Faith**, 2007.
