The Green Halo Erazim V. Kohák, 2000 The Green Halo is a readable introduction to the vast field of contemporary ecological thought It is a basic education in environmental philosophy and a welcome propaedeutic for understanding the most crucial problem facing humankind in the coming century How can humans live on this Earth so that they do not destroy the preconditions for their own existence

Humans Sergio Almécija, 2023-05-23 How did humanity evolve And what does our evolutionary history tell us about what it means to be human These questions are fundamental to our identity as individuals and as a species and to our relationship with the world But there are almost as many answers to them as there are scientists who study these topics This book brings together more than one hundred top experts who share their insights on the study of human evolution and what it means for understanding our past present and future Sergio Almécija asks leading figures across paleontology primatology archaeology genetics and many other disciplines about their lives their work and the philosophical significance of human evolution They reflect on questions that are both fun and profound What set you down your career path Are humans special Where and when would you travel in a time machine Does human evolution offer lessons for society Is evolution compatible with spirituality and religion Humans features a remarkably accomplished cast of contributors including Kay Behrensmeyer Frans de Waal Nina Jablonski Richard Leakey Robert Sapolsky and Richard Wrangham Together they provide a refreshing personable engaging cross disciplinary and thought provoking exploration of different even diametrically opposed ideas about our nature and evolution what makes humans unique and what our future might hold This book also offers practical suggestions for readers seeking to embark on a scientific career

The Politics of the Final Hundred Years of Humanity (2030-2130) Ian Cook, 2020-02-04 This book is the first book that looks at both the politics of maintaining the trajectory toward humanity's final hundred years and the politics of those final hundred years It is the first book to take up theoretical and practical aspects with respect to both the movement toward and events during these final hundred years As a result it is the first book that attempts to provide a more complete picture of the politics of catastrophic human caused environment change The fact that the book provides a way into the variety of policy problems that catastrophic human caused environment change is creating means that it is also important to those in Public Policy The book also raises a series of philosophical and ethical questions associated with human rights which are significant to those who study Political Philosophy and some of those who study Law international action to mitigate the effects of climate change the nature of science and the limitations of political institutions

Profiling Humans from their Voice Rita Singh, 2019-06-18 This book is about recent research in the area of profiling humans from their voice which seeks to deduce and describe the speaker's entire persona and their surroundings from voice alone It covers several key aspects of this technology describing how the human voice is unique in its ability to both capture and influence the human persona how in some ways voice is more potent and valuable than DNA and fingerprints as a metric since it not only carries information

about the speaker but also about their current state and their surroundings at the time of speaking. It provides a comprehensive review of advances made in multiple scientific fields that now contribute to its foundations. It describes how artificial intelligence enables mechanisms of discovery that were not possible before in this context, driving the field forward in unprecedented ways. It also touches upon related and relevant challenges posed by voice disguise and other mechanisms of voice manipulation. The book acts as a good resource for academic researchers and for professional agencies in many areas such as law enforcement, healthcare, social services, entertainment, etc.

Humanity's Ruins Danielle Bouchard, 2025-07-11
Danielle Bouchard examines how genocidal aspirations animate contemporary Western humanitarian projects and discourses, showing that humanitarianism perpetuates fundamentally racist conceptualizations of what it means to be human.

Light in the Saddle, Practices and Principles for Horses and Humans Sara Annon, 2018-12-07
Light in the Saddle is an eight-volume series that starts with building a relationship with your horse on the ground and continues through developing the foundations of communication in the saddle. Educating and conditioning the horse humanely, along with exercises for the rider, opens the doors, step by step, to both horse and rider enjoying the process of exploring their full potential.

Where Can Peace Be Found? J. Krishnamurti, 2011-01-11
Widely recognized as one of the most influential spiritual teachers of the twentieth century, Jiddu Krishnamurti taught that in order for there to be peace in the world, we must each first make peace with ourselves. No spiritual path, leader, or personal or political philosophy will guide us in this endeavor, he said. This transformation of the human psyche is a truth that each of us must discover within. Here, Krishnamurti teaches that the war and destruction human beings wreak on each other and the environment are caused by our misplaced attachment to a sense of self and individuality that leads to aggression, competition, greed, and conflict. When we recognize that our consciousness is not individual but common to all humans, we can work together in a spirit of cooperation and compassion. Krishnamurti shows that taking personal responsibility for our actions and reactions in our relationships and in our lives is the necessary first step toward a global view.

Radioactive Risk for Humans Jean-Claude Amiard, Jean-Claude Zerbib, 2024-10-29
Once scientists discovered radioactivity, they soon recognized its dangers. However, the assessment of radioactive risk to humans is still the subject of heated debate. In this book, the authors present a summary of past and recent scientific work on estimating

radioactivity in the anthroposphere and the radioactive contamination of human beings They describe the various sources of exposure to ionizing radiation external internal and dietary and estimate the irradiation doses suffered by humans under various conditions both naturally occurring for the general public and professionals and from accidents The harmful effects of ionizing radiation at various biological levels molecular cellular and tissue and health effects at the individual level are also discussed Particular focus will be placed on radiation induced occupational illnesses The relationship between doses of ionizing radiation and its harmful effects is discussed with reference to high medium and low doses The controversies on this subject are outlined and international and French regulatory values are provided Finally an estimate of the radioactive risk for humans is suggested

Are Humans Damaging the Atmosphere? Catherine Chambers, 2015-03-12 Car train ship or

aeroplane which form of transport is most harmful to the atmosphere What do farming techniques such as agrochemicals do What is acid rain and what are effects of it This book takes a look at the impact that our modern world is having on our surrounding environment from our use of fossil fuels and our increase in global food production and building work to the rise in our transport production Discover what steps scientists and engineers and even ordinary people are taking to develop sustainable solutions to these problems from replastering festivals to buildings bound together using horse hair Game Theory and Applications V. V. Mazalov, 2002 This book brings together papers of well known specialists in game theory and adjacent problems It presents the basic results in dynamic games stochastic games applications of game theoretical methods in ecology and economics and methodological aspects of game theory **Pathways to Exploration** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Division on Engineering and Physical Sciences, Space Studies Board, Aeronautics and Space Engineering Board, Committee on Human Spaceflight, 2014-09-30 The United States has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions from the early Mercury and Gemini suborbital and Earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the United States operated for three decades Today the United States is the major partner in a massive orbital facility the International Space Station that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights And yet the long term future of human spaceflight beyond this project is unclear Pronouncements by multiple presidents of bold new ventures by Americans to the Moon to Mars and to an asteroid in its native orbit have not been matched by the same commitment that accompanied President Kennedy's now fabled 1961 speech namely the substantial increase in NASA funding needed to make it happen Are we still committed to advancing human spaceflight What should a long term goal be and what does the United States need to do to achieve it Pathways to Exploration explores the case for advancing this endeavor drawing on the history of rationales for human spaceflight examining the attitudes of stakeholders and the public and carefully assessing the technical and fiscal realities This report recommends maintaining the long term focus on Mars as the horizon goal for human space exploration With this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to Mars According to Pathways to Exploration a successful U S program would require sustained national commitment and a budget that increases by more than the rate of inflation In reviving a U S human exploration program capable of answering the enduring questions about humanity's destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier The recommendations of Pathways to Exploration provide a clear map toward a human spaceflight program

that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal

Cauldron of Changes Janice C. Crosby, 2000-01-01 This book examines the spiritual dimensions found in the literature of the fantastic science fiction fantasy and magical realism by linking such novels to actual currents within the feminist spirituality movement Fusing popular culture studies women s studies and close textual analysis the author moves beyond earlier studies that fail to address the genre s use of goddess worship psychic phenomena and reverence for the earth She reveals how such attributes betoken a spiritual awakening with profound implications for contemporary feminism Special emphasis is given to both the struggle to provide an alternative to men centered experience and to the need to articulate ways in which feminists can achieve personal and social power The authors studied represent a variety of American voices and include both firmly established and newer writers such as Marion Zimmer Bradley Kim Chernin Alice Walker Mercedes Lackey Patricia Kennealy Gael Baudino Octavia Butler Lynn Abbey Joan Vinge Toni Morrison Gloria Naylor Ntozake Shange and Starhawk

Vegetation, Water, Humans and the Climate P. Kabat, 2004 This book presents a state of the art scientific overview of the influence of terrestrial vegetation and soils within the Earth system It deals especially with interactions between the terrestrial biosphere and the atmosphere via the hydrological cycle and their interlinkage with anthropogenic activities Measurements gathered in integrated field experiments in the Sahel the Amazon North America and South east Asia confirm the importance of these interactions but a substantial data consolidation effort still needs to be undertaken Observations are complemented by modelling studies including regional models that simulate flows and transport in river catchments coupled land cover and regional climate systems and Earth system and global circulation models Water nutrient and sediment fluxes in river basins are also discussed and are shown to be highly impacted and regulated by humans through land use pollution and river engineering Finally the book discusses environmental vulnerability and methodologies for assessing the risks associated with regional and global climatic and environmental variability and change The editors emphasise that the results reported in this book are based on the research work of many individual scientists and teams around the world associated with the objectives of the IGBP BAHC and WCRP GEWEX international research programmes

Theory of Person and Existential Personalistic Anthropology Antonio Mercurio, 2009-12

[From Blavatsky to Krishnamurti: "It is Finished"](#) Al Boag, 2025-09-16 This book highlights some important continuities as well as differences between the teachings of Helena Petrovna Blavatsky 1831 1891 co founder of the Theosophical Society in 1875 and Krishnamurti Jiddu 1895 1986 the Theosophist who was trained to be the World Teacher Until now very little has been written of the importance to Blavatsky of an esoteric eschatology and Christology and their relation to the secret core of her Path of Initiation the practice of an occult breathless meditation Similarly scholarly research has overlooked the evidence that Krishnamurti eviscerated the secret core of Blavatsky s teaching with his own esoteric interpretation of it which exists in his published work as the camouflaged core of his teaching Offering a fresh

appraisal this work draws on careful exploration of the primary source material of Blavatsky and Krishnamurti as well as his Theosophical mentors Annie Besant 1847 1933 and Charles Webster Leadbeater 1854 1934 It will be of particular interest to students and scholars of esotericism new religious movements and the history of religions THE SOLUTION TO ALL OF HUMANITY'S PROBLEMS and The Secret to Creating the Life You Want William Eastwood, 2017-05-31 From the upper echelons of the scientific establishment comes a completely new definition of reality and the human being The most advanced physics in the world suggests that accumulated knowledge in all fields is based on a false premise Time is an illusion and the past does not create the present but that is not all All curriculum from grade school to university will need to be entirely overhauled The end result will be a complete and total reversal of focus that will bring about a new human with entirely new and powerful ways of achieving goals and solving problems Learn how to become powerful and unstoppable by having the right knowledge We unknowingly wield immense power We must recognize the fantastic power we possess and learn to use it constructively Here and now we have the power to work magic of such proportions we have never fathomed Yet unseized such power waits for us to claim it It is of no use until we awaken to it It is all here in the solution
