## CARDIOPULMONARY RESUSCITATION TRAINING

WITH THE 2015 CPR GUIDELINES

### LIFESAVING CPR

The Lifesaving Society has been teaching lifesaving skills since 1893. In the 1950s, we were the first Canadian organization to adopt mouth-to-mouth rescue breathing as the method of choice over manual methods of artificial respiration. We started our first CPR training program in the 1960s. In the 1980s, we once again stayed on the leading edge by initiating the project to design an economical CPR training manual, ACTAR 911™.

Lifesaving CPR training is designed to teach rescuers to recognize a person who needs assistance to support breathing and circulation. The Lifesaving Society teaches CPR and AED within our lifesaving, lifeguarding, and first aid programs as well as its specific Lifesaving CPR courses. The Lifesaving Society is a national standard setter for CPR and first aid training and a leader in the delivery of this training to Canadians. All of the Society's CPR courses include AED content.

### CHAIN OF SURVIVAL

CPR training is just one link in the Canadian Chain of Survival for circulatory disease. The Chain includes links intended to prevent heart disease and stroke as well as steps to help a casualty in distress and support recovery after the injury. The chain is only as strong as its weakest link. Missing and weak links severely decrease the chance of survival.

### THE "10 MINUTE WINDOW"

- To give the casualty the best chance of survival, activation of EMS, provision of CPR and operation of an AED must occur within the first moments of a cardiac arrest.
- For every minute that passes between collapse and defibrillation, survival rates decrease by 7% to 10%.
- Even minimal training has been shown to improve survival rates, thus, practical training opportunities will be made available.
