Cancel The Apocalypse The New Path To Prosperity:

Cancel the Apocalypse Andrew Simms, 2013 In fascinating and iconoclastic detail on everything from the cash in your pocket to the food on your plate and the shape of our working lives *Cancel The Apocalypse* describes how the relentless race for economic growth is not always one worth winning how excessive materialism has come at a terrible cost to our environment and hasn't even made us any happier in the process Simms believes passionately in the human capacity for change and shows how the good life remains in our grasp *Generation Impact* Adam Richards, Jeremy Nicholls, 2021-01-08 *Generation Impact* fills a significant gap in the impact accounting literature about how ambitions pressures and misgivings can be addressed dealt with and harnessed into forward looking programmes for the creation measurement and management in social accounting **The Alternative** Lisa Nandy, 2016-08-25 The 2015 election result was a disaster for progressives in British politics delivering a majority Conservative government at Westminster And the outlook for the next election is not auspicious either particularly amid the aftershocks of the momentous 2016 EU referendum result and with possible boundary changes in the offing There is a growing recognition however that cross party cooperation among the progressives could reinvigorate politics and inspire a credible alternative to the Conservatives Those who want a good society can and must work together and by doing so they can deliver better answers and more inclusive government With contributions from a broad range of left and centre left voices including Si n Berry Mhairi Black Frances O Grady Tim Farron Peter Hain Carys Afoko Yasmin Alibhai Brown Zoe Williams and Neal Lawson *The Alternative* sets out a base of core values around which progressives can unite proposes a number of big policy ideas that embody those values and crucially explores an urgently needed new form of politics to achieve them *Picturing the Apocalypse* Natasha O'Hear, Anthony O'Hear, 2015-06-25 The book of Revelation has been a source of continual fascination for nearly two thousand years Concepts such as The Lamb of God the Four Horsemen the Seventh Seal the Beasts and Antichrist the Whore of Babylon Armageddon the Millennium the Last Judgement the New Jerusalem and the ubiquitous Angel of the Apocalypse have captured the popular imagination One can hardly open a newspaper or click on a news web site without reading about impending financial or climate change Armageddon while the concept of the Four Horsemen pervades popular music gaming and satire Yet few people know much about either the basic meaning or original context of these concepts or the multiplicity of different ways in which they have been interpreted by visual artists in particular The visual history of this most widely illustrated of all the biblical books deserves greater attention This book fills these gaps in a striking and original way by means of ten concise thematic chapters which explain the origins of these concepts from the book of Revelation in an accessible way These explanations are augmented and developed via a carefully selected sample of the ways in which the concepts have been treated by artists through the centuries The 120 visual examples are drawn from a wide range of time periods and media including the ninth century Trier Apocalypse thirteenth century Anglo Norman Apocalypse Manuscripts such as the Lambeth and Trinity

Apocalypses the fourteenth century Angers Apocalypse Tapestry fifteenth century Apocalypse altarpieces by Van Eyck and Memling Durer and Cranach's sixteenth century Apocalypse woodcuts and more recently a range of works by William Blake J M W Turner Max Beckmann as well as film posters and stills cartoons and children's book illustrations The final chapter demonstrates the continuing resonance of all the themes in contemporary religious political and popular thinking while throughout the book a contrast will be drawn between those readers of Revelation who have seen it in terms of earthly revolutions in the here and now and those who have adopted a more spiritual otherworldly approach We Are More Than This Andrew Simms, 2016-11-01 Andrew Simms Coleridge Lecture where he sets out a hopeful vision of the future

Environmental Expertise Esther Turnhout, Willemijn Tuinstra, Willem Halffman, 2019-02-21 An important goal of environmental research is to inform policy and decision making However environmental experts working at the interface between science policy and society face complex challenges including how to identify sources of disagreement over environmental issues communicate uncertainties and limitations of knowledge and tackle controversial topics such as genetic modification and the use of biofuels This book discusses the problems environmental experts encounter in the interaction between knowledge society and policy on both a practical and conceptual level Key findings from social science research are illustrated with a range of case studies from fisheries to fracking The book offers guidance on how to tackle these challenges equipping readers with tools to better understand the diversity of environmental knowledge and its role in complex environmental issues Written by leading natural and social scientists this text provides an essential resource for students scientists and professionals working at the science policy interface *Human Geography* Mark Boyle, 2021-04-12 Revised Extended and Extensively Updated Text Uses Historical Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography Drawing on nearly three decades of instructional experience and a wealth of testing pedagogical innovations with students Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography As with the First Edition Boyle follows the premise that history makes geography whilst geography makes history and that the key to studying the principal demographic social political economic cultural and environmental processes in any region in the world today is to look at how that region has been impacted by and in turn has impacted the story of the rise reign and decline of the West Moreover he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical political and institutional project Informed by recent developments in post colonial scholarship the book covers key concepts seminal thinkers and influential texts in the field Although designed for the beginner student Boyle does not shy away from ideas and debates often avoided in introductory texts clearly communicating theory without condescension In addition he places human geography in its larger academic context discussing the influences on the field from related subjects Notable features in the Second Edition include Extensive revision and updating of coverage of key ideas developments debates and case studies New chapter on uneven geographical

development at different scales and development theory and practice Dedicated coverage of Covid 19s geographies New learning resources figures tables plates maps Deep Dive boxes etc throughout the text plus learning objectives essay questions checklists summarizing key ideas and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter by chapter lectures and PowerPoint slides for each chapter new multiple choice exam paper and additional essay style exam questions and a wide range of student tutorial exercises Human Geography An Essential Introduction Second Edition is an excellent foundational text for undergraduate courses in human geography globalization Western civilization historiographies of intellectual thought the grand public problems confronting humanity in the twenty first century and other wider social science courses

Utopia in the Anthropocene Michael Harvey, 2019-06-03 Utopia in the Anthropocene takes a cross disciplinary approach to analyse our current world problems identify the key resistance to change and take the reader step by step towards a more sustainable equitable and rewarding world It presents paradigm shifting models of economics political decision making business organization and leadership and community life These are supported by psychological evidence utopian literature and inspirational changes in history The Anthropocene is in crisis because human activity is changing almost everything about life on this planet at an unparalleled pace Climate change the environmental emergency economic inequality threats to democracy and peace and an onslaught of new technology these planetwide risks can seem too big to comprehend let alone manage Our reckless pursuit of infinite economic growth on a finite planet could even take us towards a global dystopia As an unprecedented frenzy of change grips the world the case for utopia is stronger than ever An effective change plan requires a bold imaginative vision practical goals and clarity around the psychological values necessary to bring about a transformation This book will be of great interest to students and scholars of the environmental

humanities sustainability studies ecological economics organizational psychology politics utopian philosophy and literature and all who long for a better world Encounters with World Affairs Emilian Kavalski, 2016-03-09 This book is designed to familiarise students with leading International Relations IR theories and their explanation of political events phenomena and processes which cross the territorial boundaries of the state Thus students will be exposed to the interplay between power interest ideas identity and resistance in explaining continuity and change in international relations Developed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs This textbook responds to the challenges of a dynamic job market by assisting students to gain both thorough theoretical knowledge and training them to apply this knowledge to real world problems In short this textbook delivers A comprehensive and interdisciplinary approach to the examination of national regional and global trends in politics economics and socio cultural developments allowing students to understand the practice and theory of contemporary international relations the politics culture history and economies of different regions around the world the role played by international interactions culture and government in local national and global settings Equipping students with the proficiency to understand and interpret the dynamics patterns and issues of global affairs to know how to get more information about particular questions to evaluate that information independently and effectively To these ends the textbook provides a number of features that will appeal to students and avoids overwhelming students with chapters on topics which in practice are rarely on courses while nonetheless providing a comprehensive overview of the field Introduces students to the main debates topics and terms in the field and allows them to decide which they would like to focus on in their further studies **The Cultural Politics of Austerity** R. Bramall, 2013-10-31 This timely book examines austerity s conflicted meanings from austerity chic and anti austerity protest to economic and eco austerity Bramall s compelling text explores the presence and persuasiveness of the past developing a new approach to the historical in contemporary cultural politics

Global Political Economy John Ravenhill, 2020 The most balanced blend of empirical material and analysis from leading scholars of Global Political Economy Written by leading international specialists Global Political Economy is a comprehensive yet accessible introduction to the field Skilfully interweaving history theory and topical issues and debates the authors offer an authoritative and stimulating guide which not only informs but also encourages readers to critically examine their own perspectives on the subject New to this edition Thoroughly updated to incorporate recent developments such as the Trump administration Brexit and populism Enhanced coverage of the political economy of the environment New material on globalization inequality and poverty Book jacket *Addicted to Growth* Robert Costanza, 2022-12-29 This book takes a compelling approach to describing what is needed to create the kind of future that most people on Earth really want Our global society is hopelessly addicted to a particular vision of the world and a future that has become both unsustainable and undesirable Addicted to Growth frames our current predicament as a societal addiction to a growth at all costs economic

paradigm While economic growth has produced many benefits its side effects are now producing existential problems that are rapidly getting worse Robert Costanza considers lessons from what works at the individual level to overcome addictions and applies them to a societal scale Costanza recognises that the first step to recovery is recognising the addiction and that it is leading to disaster however simply pointing out the dire consequences of our societal addiction is only the first step and can be counterproductive by itself in motivating change The key next step is creating a truly shared vision of the kind of world we all want and the book explores creative ways to implement this societal therapy The final step is using that shared vision to motivate the changes needed to achieve it including adaptive transformations of our economic systems property rights regimes and governance institutions An exciting contribution from a key thinker in the field this book will be a valuable resource to students and scholars of public policy and sustainability studies and anyone interested in understanding and overcoming our societal addiction to growth

Fair Economics Irene Schoene, 2015-09-10 Have you ever questioned our economic model Wondered how the financial crash was able to happen Thought about what we can do stop it happening again Modern economics bases its view of the world on assumptions Adam Smith made about nature and people nearly three hundred years ago in a time when people travelled by horse and carriage and wrote by the light of candles We now live in a globally connected post industrial world of digital communication and advanced technology and yet our economic model remains stuck in the past Taking a thorough look at economics including the history and how we reached our current way of thinking Irene Schoene puts forward an alternative economics that is not only relevant to our modern world of technology and industry but which also shows an awareness of environmental considerations Read this to be enlightened about how economics can be considerate of our environmental situation

Economics: a Crash Course David Boyle, Andrew Simms, 2019-07-30 Not long ago economic theories were generally based on a narrow set of principles Then the continuing boom bust cycle combined with the failure of the best economic minds to ensure that prosperity spreads down through the economy has left a series of very obvious question marks and the orthodoxy has been challenged from inside and outside the profession It now seems clear that human beings and the planet have to be brought into the analysis The first chapter goes right back to the debate about the purposes for which money was originally invented The Big Ideas chapter builds up a picture of the key ideas that have driven economic theories Economics and People derives insights into the way that money and economics works from the way that people actually behave Economics and the Planet covers some of the economic insights that have come from those whose expertise has been biological or environmental

Transitioning to a Post-Carbon Society Ernest Garcia, Mercedes Martinez-Iglesias, Peadar Kirby, 2016-12-27 This book deals with one of the most pressing social and environmental issues that we face today The transition to a post carbon society in which the consumption of fossil fuels decreases over time has become an inevitability due to the need to prevent catastrophic climate change the increasing cost and scarcity of energy and complex combinations of both of these factors As the authors point out this will not only

entail political adjustments and the replacement of some technologies by others but will be accompanied by social and cultural changes that bring about substantial modifications in our societies and ways of life This book examines whether the current conditions which date back to the crisis that began in 2007 favour a benign and smooth transition or will make it more difficult and prone to conflict It argues that even if this transformation is unavoidable the directions it will take and the resulting social forms are much less certain There will be many post carbon societies the authors conclude and any number of routes to social change Transitioning to a Post Carbon Society therefore represents a significant contribution to global debates on the environment and is vital reading for academics policymakers business leaders NGOs and the general public alike

Climate Change and Poverty Fitzpatrick, Tony, 2014-09-05 Available Open Access under CC BY NC licence Climate change is the main challenge facing developed countries in the 21st century To what extent does this agenda converge with issues of poverty and social exclusion Climate change and poverty offers a timely new perspective on the ecosocial understanding of the causes and symptoms of and solutions to poverty and applies this to recent developments across a number of areas including fuel poverty food poverty housing transport and air pollution Unlike any other publication the book therefore establishes a new agenda for both environmental and social policies which has cross national relevance It will appeal to students in social policy public policy applied social studies and politics and will also be of interest to those studying international development economics and geography

British Think Tanks After the 2008 Global Financial Crisis Marcos González Hernando, 2019-06-14 This book examines the intellectual and institutional transformations of four British think tanks in the aftermath of the 2008 global financial crisis In the context of a crisis of expert authority Gonz lez Hernando demonstrates how these organisations modified their mode of public engagement to be seen as authoritative as possible by an ever more mistrustful public British Think Tanks After the 2008 Global Financial Crisis connects sociological thinking on knowledge with research on policy change and the economic debate through careful analysis of interviews public accounts and the products of think tanks themselves Gonz lez Hernando argues that demands for knowledge and advice that arose after the crisis energised the work of all four think tanks while also exposing internal tensions affecting their sources of funding transforming their institutional structure and shaping how they engage with their audiences It will appeal to students and scholars of sociology of knowledge political sociology policy studies economic history communication political economy organisational sociology and British politics

Managing and Preventing Pandemics Roberto De Vogli, 2024-09-10 Using an evidence based critical population health approach this book provides a comprehensive analysis of the key errors and most effective interventions to contain the COVID 19 pandemic It also examines the root determinants of pandemic risk on a global scale and addresses the policy changes to be implemented to prevent future health crises Part One of the book discusses the lethal errors in the management of the COVID 19 pandemic focusing particularly on those countries that failed to limit the death toll caused by the health crisis These mistakes include lack of preparation disinformation

medicalization adoption of a laissez faire the virus approach and inequity Part Two analyzes the vital actions that enabled virtuous countries to effectively limit the most deadly effects of the pandemic prevention immunization and support Part Three looks at what we should do to prevent the next pandemic This part examines the proximal social and environmental causes of pandemic risk e g deforestation industrialized animal farming and climate change as well as the causes of the causes which include our model of global economic development and its philosophical and ideological underpinnings
