Welsh, Steven N. Zane, Daniel P. Mears, 2024 An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good However the term evidence based is characterized by a great deal of rhetoric Indeed there remains a marked disjuncture between calls for evidence based policy and an understanding of what it means for policy to be evidence based The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and guide evidence based policy in juvenile justice criminal justice and alternatives to system responses and to identify strategies that can increase reliance on evidence based policy To meet these objectives each chapter is guided by several central questions What do we know about evidence based policy and practice in crime and justice How can we improve knowledge of evidence based policy and practice How can we promote more use of evidence based policy and practice Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions Beyond the Street Corner

desistance from it The author highlights key topics including the practice of drug dealing as deviant entrepreneurship the role of friendship networks in determining engagement in street gang related activities the allure of risk as a motivator for involvement and the participation of young women through relationships with young men associated with street gangs Ultimately the work offers fresh perspectives on both gang membership and non membership advocating for the development of homegrown interventions rooted in social capital through bridging and social mobility as viable strategies for addressing street gang involvement

Thinking in Cases Markus Asper, 2020-01-20 Who is afraid of case literature In an influential article Thinking in Cases 1996 John Forrester made a case for studying case literature more seriously exemplifying his points mostly with casuistic traditions of law Unlike in modern literatures case collections make up a significant portion of ancient literary traditions such as Mesopotamian Greek and Chinese mostly in medical and forensic contexts The genre of cases however has usually not been studied in its own right by modern scholars Due to its pervasiveness case literature lends itself to comparative studies to which this volume intends to make a contribution While cases often present truly fascinating epistemic puzzles in addition they offer aesthetically pleasing reading experiences due to their narrative character Therefore the case understood as a knowledge transmitting narrative about particulars allows for both epistemic and aesthetic approaches This volume presents seven substantial studies of cases and case literature Topics touched upon are ancient Greek medical forensic philosophical and mathematical cases medical cases from imperial China and 20th century American medical case writing The collection hopes to offer a pilot of what to do with and how to think about cases
