Advances in Statistical Methods for the Genetic Dissection of Complex Traits in Plants Yuan-Ming Zhang,Zhenyu Jia,Shang-Qian Xie,Jia Wen,Shibo Wang,Ya-Wen Zhang,2024-01-26 Genome wide association studies GWAS have been widely used in the genetic dissection of complex traits However there are still limits in current GWAS statistics For example 1 almost all the existing methods do not estimate additive and dominance effects in quantitative trait nucleotide QTN detection 2 the methods for detecting QTN by environment interaction QEI are not straightforward and do not estimate additive and dominance effects as well as additive by environment and dominance by environment interaction effects leading to unreliable results and 3 no or too simple polygenic background controls have been employed in QTN by QTN interaction QQI detection As a result few studies of QEI and QQI for complex traits have been reported based on multiple environment experiments Recently new statistical tools including 3VmrMLM have been developed to address these needs in GWAS In 3VmrMLM all the trait associated effects including QTN QEI and QQI related effects are compressed into a single effect related vector while all the polygenic backgrounds are compressed into a single polygenic effect matrix These compressed parameters can be accurately and efficiently estimated through a unified mixed model analysis To further validate these new GWAS methods particularly 3VmrMLM they should be rigorously tested in real data of various plants and a wide range of other species

Breeding Climate Resilient and Future Ready Oilseed Crops Manish K. Pandey,M. G. Mallikarjuna,H. C. Lohithaswa,Muraleedhar S. Aski,Sanjeev Gupta,2025-01-31 This edited book covers the application of modern genomics tools for developing climate smart oilseed cultivars The book s prime focus is on utilizing available oilseed genomic resources and application of next generation genetics and breeding tools viz genome wise association mapping genomic selection genome editing and accelerated breeding pipelines and their efficacy for rapid development and delivery of stress resilient oilseeds cultivars Oilseeds are crucial for human and animal nutrition and cater to diverse industrial applications Besides oil content the oilseed meal possesses proteins and a higher proportion of essential amino acids which benefit human well being Additionally the contribution of oilseeds towards renewable energy mitigates the risk of climate change by reducing carbon footprint Hence it is imperative to enhance oilseeds production from the current 178 to 282 million tons by 2050 to meet the demands of both the population and the environment The current genomics era delivered various genomic resources in oilseed crops which resulted in the discovery of genes for several agronomic and stress resilience traits and resistance to pests and diseases Further the availability of next generation plant breeding tools such as genomic selection genome editing and speed breeding are being implemented along with traditional and marked assisted selection Thus the book is framed to compile the importance and utility of next generation breeding tools for enhancing stress resilience in oilseed crops in the

climate change era The book is exciting and valuable to national and international agricultural scientists scholars and graduate students associated with oilseed crops improvement in specific and field crops in generic The book also serves as reference in formulating various oilseed improvement programs for policymakers and research grant managers

Advances in Plant Breeding Strategies: Fruits Jameel Al-Khayri, Shri Mohan Jain, Dennis V. Johnson, 2018-07-20 This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding for the production of new crop varieties under the increasingly limiting environmental and cultivation factors to achieve sustainable agricultural production and enhanced food security Two volumes of Advances in Plant Breeding Strategies were published in 2015 and 2016 respectively Volume 1 Breeding Biotechnology and Molecular Tools and Volume 2 Agronomic Abiotic and Biotic Stress Traits This is Volume 3 Fruits which is focused on advances in breeding strategies for the improvement of individual fruit crops It consists of 23 chapters grouped into three parts according to distribution classification of fruit trees Part I Temperate Fruits Part II Subtropical Fruits and Part III Tropical Fruits Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience *Men's Health Equity* Derek M. Griffith, Marino A. Bruce, Roland J. Thorpe, Jr., 2019-04-25 Worldwide men have more opportunities privileges and power yet they also have shorter life expectancies than women Why is this Why are there stark differences in the burden of disease quality of life and length of life amongst men by race ethnicity disability status sexual orientation gender identity rurality and national context Why is this a largely unexplored area of research Men's Health Equity is the first volume to describe men's health equity as a field of study that emerged from gaps in and between research on men's health and health inequities This handbook provides a comprehensive review of foundations of the field summarizes the issues unique to different populations discusses key frameworks for studying and exploring issues that cut across populations in the United States Australia Canada the United Kingdom Central America and South America and offers strategies for improving the health of key population groups and achieving men's health equity overall This book systematically explores the underlying causes of these differences describes the specific challenges faced by particular groups of men and offers policy and programmatic strategies to improve the health and well being of men and pursue men's health equity Men's Health Equity will be the first collection to present the state of the science in this field its progress its breadth and its future This book is an invaluable resource for scholars researchers students and professionals interested in men's health equity men's health psychology of men's health gender studies public health and global health **Rational and Irrational Beliefs** Daniel David, Steven Jay Lynn, Albert Ellis, 2010 In Rational and Irrational Beliefs Research Theory and Clinical Practice leading scholars researchers and practitioners of rational emotive behavior therapy REBT and other cognitive behavioral therapies CBTs share their perspectives and empirical findings on the nature of rational and irrational beliefs the role of beliefs as mediators of functional and dysfunctional emotions and behaviors and clinical approaches to modifying irrational beliefs

enhancing rational beliefs and adaptive coping in the face of stressful life events Offering a comprehensive and cohesive approach to understanding REBT CBT and its central constructs of rational and irrational beliefs contributors review a steadily accumulating empirical literature indicating that irrational beliefs are associated with a wide range of problems in living and that exposure to rational self statements can decrease anxiety and other psychological symptoms and play a valuable role in health promotion and disease prevention Contributors also identify new frontiers of research and theory including the link between irrational beliefs and other cognitive processes such as memory psychophysiological responses and evolutionary and cultural determinants of rational and irrational beliefs A truly accessible state of the science summary of REBT CBT research and clinical applications Rational and Irrational Beliefs is an invaluable resource for psychotherapy practitioners of all theoretical orientations as well as instructors students and academic psychologists *Proceedings of the International Conference on Tropical Studies and Its Application (ICTROPS 2024)* Muhammad Rizqy Septyandy, Searphin Nugroho, Muhammad Labib Jundillah, Lucia Litha Respati, 2025-07-07 This is an open access book The International Conference on Tropical Studies and Its Application ICTROPS publishes research results covering the fields of Environmental Technology Environmental Science Environmental Socio Economy and Environmental Law and Policy ICTROPS is organized by the University of Mulawarman in collaboration with the Islamic Development Bank IsDB and the Ministry of Education and Culture of the Republic of Indonesia The research article submitted to this online journal will be double blind peer reviewed Both reviewer and author remain anonymous to each other at least 2 two reviewers The accepted research articles will be available online following the journal peer reviewing process Language used for full article in this journal is Bahasa Indonesia abstract in English and Bahasa Indonesia For checking Plagiarism ICTROPS will screen plagiarism manually offline and online database on the Title Abstract and Body Text of the manuscript and by using Turnitin plagiarism detection software If it is found a plagiarism indication editorial board will reject manuscript immediately Omics and its Integration: A Systems Biology Approach to Understanding Plant Physiology Kashif Ali, Milen I. Georgiev, 2023-11-27 Due to the complexity and interconnectivity of many biological processes an integrative systems biology approach is required to better understand them The integration of various omics data including genomics proteomics transcriptomics and metabolomics data will provide a holistic view that highlights the relationship among the various biomolecules and their functions in plant growth resistance quality and many other important traits Recent advances in analytical power and in the ability to process large data sets has enabled researchers to integrate multi omics data and have a much deeper knowledge of the cell tissue organ or even an entire organism being studied The goal of this Research Topic is not only to publish high quality and reliable omics data but also to answer the bigger question of how to integrate and correlate different data sets from multiple omics studies Can one omics data set be used as a primary data set for the design and execution of another omics study If so then how it can be done What are its pre requisites How can we plan research involving multi omics

approach to reach a meaningful conclusion These are the questions that need our attention and their answers are critical for the future of omics based research For this Research Topic we welcome contributors to submit manuscripts related to the following themes Studies on plant based genomics transcriptomics proteomics and metabolomics Development of new analytical methods for omics utilizing in plants Advancements in the current analytical methods for utilizing omics in plants Integration of multi omics data sets Development of new statistical methods for data analysis **Respiratory Care** George G. Burton,John Elliott Hodgkin,Jeffrey J. Ward,1991 Groundwater 2000 Poul L. Bjerg,Peter Engesgaard,Thomas D. Krom,2020-08-18 These proceedings with cd rom present a comprehensive overview of advances in groundwater research The five main topics covered are aquifers and contaminant distribution groundwater quality natural attenuation remediation technologies and groundwater protection Groundwater 2000 is a useful resource to both scientists and to those working in the field **Characterizing and Improving Traits for Resilient Crop Development** Rajib Roychowdhury,Carolina Ballen-Taborda,Palak Chaturvedi,2023-11-13 **World Guide to Abbreviations of Organizations** ,1984 Use of Barley and Wheat Reference Sequences: Downstream Applications in Breeding, Gene Isolation, GWAS and Evolution, Volume II Dragan Perovic,Hikmet Budak,Pierre Sourdille,Peter Michael Dracatos,2022-11-30 **World Guide to Abbreviations of Organizations** F.
