Immunizations Administration for Vaccines/Tossids

Report vaccine immunization administration codes 90460, 90461, 90471-90474 in addition to the vaccine and tossid code(s) 90476-90479.
Report codes 90460 and 90461 only when the physician or qualified health care professional provides face-to-face counseling of the patient/family during the administration of a vaccine. For immunization administration of any vaccine that is not accompanied by face-to-face physician or qualified health care professional counseling to the patient/family or for administration of vaccines to patients over 18 years of age, report codes 90471-90474. (See

also Instructions for Use of the CPT Codebook for definition of reporting qualifications.)

If a significant separately identifiable Evaluation and Management service (eg, new or established patient office or other outpatient services [99201-99215], office or other outpatient consultations [99241-99245], emergency department services [99281-99285], preventive medicine services [99381-99429]) is performed, the appropriate E/M service code should be reported in addition to the vaccine and tossid administration codes.

A component refers to all antigens in a vaccine that prevent disease(s) caused by one organism (90460 and 90461). Multi-valent antigens or multiple serotypes of antigens against a single organism are considered a single component of vaccines. Combination vaccines are those vaccines that contain multiple vaccine components. Components or adjuvants contained in vaccines are not considered to be component parts of the vaccine as defined above.

Vaccines, Tossids

Codes 90476-90479 identify the vaccine product only. To report the administration of a vaccine/tossid, the vaccine/tossid product codes 90476-90479 must be used in addition to an immunization administration code(s) 90460, 90461, 90471, 90472, 90473, 90474. Modifier 51 should not be reported with vaccine/tossid codes 90476-90479, when reported in conjunction with administration codes 90460, 90461, 90471, 90472, 90473, 90474.

If a significantly separately identifiable Evaluation and Management (E/M) service (eg, office or other outpatient services, preventive medicine services) is performed, the appropriate E/M service code should be reported in addition to the vaccine and tossid administration codes.

Separate codes are available for combination vaccines (eg, DTaP-IPV, DTaP-IPV, Hib-IPV, Hib-IPV). It is inappropriate to code each component of a combination vaccine separately. If a specific vaccine code is not available, the unlisted procedure code should be reported, until a new code becomes available.
