Nail A Coding Interview Grace Huang, 2022-04-04 A tiny book about how candidates can outperform in coding interviews from the lenses of interviewers By now having practiced hundreds of coding questions on HackerRank and LeetCode for weeks you must feel quite confident about the upcoming interview After the interviewer gives the introduction and finally reveals the coding problem the sense of nervousness starts to creep in within you While you are internalizing the coding problem for a split second your mind gets lost Now you don't know where to start Suddenly you also notice the 45 minute clock has been ticking so your mind goes blank again A well prepared code interview has a bad start I have been there and I know that feeling I have interviewed hundreds of software engineer candidates while working for big tech companies and also hiring for my own company Roxy I have interviewed new grads industry veterans from Google Amazon Facebook quantitative engineers from Hedge Funds and indie entrepreneurs After analyzing hundreds of interviews I noticed that the same six steps forming a mental framework were often at work
