## **Getting To Graduation The Completion Agenda In Higher Education:**

*Getting to Graduation* Andrew P. Kelly, Mark Schneider, 2012-09-01 What will it take to achieve President Obama's higher education completion agenda? The United States long considered to have the best higher education in the world now ranks eleventh in the proportion of 25 to 34 year olds with a college degree. As other countries have made dramatic gains in degree attainment the U.S. has improved more slowly. In response President Obama recently laid out a national completion agenda with the goal of making the U.S. the best educated nation in the world by the year 2020. *Getting to Graduation* explores the reforms that we must pursue to recover a position of international leadership in higher education as well as the obstacles to those reforms. This new completion agenda puts increased pressure on institutions to promote student success and improve institutional productivity in a time of declining public revenue. In this volume scholars of higher education and public policymakers describe promising directions for reform. They argue that it is essential to redefine postsecondary education and to consider a broader range of learning opportunities beyond the research university and traditional bachelor degree programs to include community colleges, occupational certificate programs and apprenticeships. The authors also emphasize the need to rethink policies governing financial aid, remediation and institutional funding to promote degree completion.

**The Struggle to Reform Our Colleges** Derek Bok, 2017-08-28 Why efforts to improve American higher educational attainment haven't worked and where to go from here During the first decade of this century many commentators predicted that

American higher education was about to undergo major changes that would be brought about under the stimulus of online learning and other technological advances. Toward the end of the decade the president of the United States declared that America would regain its historic lead in the education of its workforce within the next ten years through a huge increase in the number of students earning quality college degrees. Several years have elapsed since these pronouncements were made yet the rate of progress has increased very little if at all in the number of college graduates or the nature and quality of the education they receive. In *The Struggle to Reform Our Colleges* Derek Bok seeks to explain why so little change has occurred by analyzing the response of America's colleges, the influence of students, employers, foundations, accrediting organizations, and government officials, and the impact of market forces and technological innovation. In the last part of the book Bok identifies a number of initiatives that could improve the performance of colleges and universities. The final chapter examines the process of change itself and describes the strategy best calculated to quicken the pace of reform and enable colleges to meet the challenges that confront them.

Delaney, 2023-10-30 The severity of cuts and the unpredictability in state funding for higher education have garnered headlines across the nation since the turn of the present century In this context the authors in this new groundbreaking volume argue that too little attention is paid to the consequences of volatility in funding as most discussions focus on levels of funding Their research addresses an important blind spot in the academic literature since predictability matters to institutions students families and states In addition the risks of operating in an uncertain

financial environment have led to behaviors that are not always in the best interests of states institutions faculty students or the public good     *Building the Intentional University* Stephen M.
