Endangered Species and Our Future Sabrina Adams, 2021-07-15 Scientists estimate that by the year 2050 almost half of Earth's species may be extinct. This frightening prospect would have devastating effects on the future of our planet. Your readers will study the issue of endangered species and the impact that human activity has on the plants and animals of the world. Using primary sources and helpful graphics to illustrate conservation efforts, the narrative encourages readers to take an active role in helping to save endangered species

The Construction of Ecological Civilization in China Kaizhong Yang, 2024-07-30 The book introduces China's ecological environmental protection in urban and rural areas. China's economic development and the achievements in alleviating poverty have been recognized by the international community. However, China's commitment in ecological and environmental protection has not gained equivalent attention. From a cultural and ideological perspective, the book presents the basic connotation and historical significance of ecological civilization construction advocated by China. It shows a tangible and multi-dimensional process and China's ecological civilization construction over recent years, combining analysis of the cases of China's ecological civilization construction

Hope for the Giant Panda Fuwen Wei, 2022-01-02 In this book, the author gathered together all the latest evidence and progress in the scientific studies of pandas' past, present and future, especially how he has introduced advanced scientific techniques such as population genomics, metagenomics and evolutionary genomics into the study of wild pandas. These scientific stories systematically unveiled the evolutionary history, adaptive strategy, cause of endangerment and evolutionary potential of the giant panda under environmental changes and anthropogenic pressure, highlighting its evolution in every aspect of its body and behavior to adapt the transition to a specialized bamboo diet. With illustrative examples and plentiful photographs taken in the wild, the secret life of pandas and the science behind are sure to satisfy readers' curiosity. Among the other things, this book gives answers to the frequently asked questions of whether the panda is an evolutionary cul de sac and whether there remains hope for them to survive and enjoy a brighter future. The giant panda is a well-known flagship species in the field of conservation science for its unique appeal and specialized

characteristics Besides it is also an ideal model for researchers to understand adaptive evolution Over the past thirty years the author and leading conservation scientist Dr Fuwen Wei has been focusing on the research and conservation of wild pandas in China
