## **Gibbons In The Family Tree:**

**Gibbons in the Family Tree** Jeanne Ann Vanderhoef, 1996      *John Gibbon and His Heart-Lung Machine* Ada Romaine-Davis, 2016-11-11 John Heysham Gibbon Jr M D was the first researcher to develop a heart lung machine that could fully support an adult's cardiac and respiratory functions during surgical procedures to repair defects in the heart and lungs. The difficulty of such a task can be seen in the number of people who attempted it for over a century; the list is long. Gibbon succeeded on May 6, 1953, when he repaired an atrial septal defect with the patient supported entirely by the machine for 27 minutes. Ada Romaine Davis contends that few realize how long Gibbon worked to achieve this success. To rectify the situation, Romaine Davis here provides a thorough study of Gibbon and his accomplishment. She shows how Gibbon overcame discouragement from his peers and mentors and obtained crucial support from IBM Board Chairman Thomas Watson. She examines each of the models produced by Gibbon and puts his achievement into historical perspective. Gibbon himself chose not to pursue cardiac surgery; he remained a thoracic surgeon. Others went on to develop the knowledge and skills that today make open heart surgery as safe as other major surgical procedures. As Romaine Davis amply demonstrates, these pioneers stand on the shoulders of a stubborn, persevering, single-minded genius whose determination to leave a legacy to his profession resulted in the one thing essential for sustained progress in heart surgery: John Gibbon's heart lung machine. This meticulously researched study will make fascinating reading for physicians, especially surgeons, as well as for students and scholars of medical history and science and technology.      *Leaves from the Prescott Family Tree*, 1985 Descendants of James Prescott of Hampton, New Hampshire, bapt 1642-3 at Driby, Lincolnshire, Eng.      **The Rambo Family Tree, Volume 1** Ronald S. Whether you're 9 or 90, his unique exploration of the most destructive yet most creative force in nature makes top-level science fun. Can we make the Hainan gibbon a super survivor? It's one of our closest living relatives and among the most endangered animals on our planet. Can we change our role in the story of life from being super-careless to being super-savers and do what we can to help our most interesting, incredible, and important species from going extinct? The future depends on us. An absolutely fascinating read. Highly recommended. his complex relationship with religion Approaching the Decline and Fall from the context surrounding its conception Liebert shows how Gibbon adapted explanations of the Roman republic's rise to account for a new spiritual republic and subsequently the rise of modern Europe Taken together Liebert's analysis of this context including the nuance of Gibbon's relationship to Christianity and his readings of Gibbon's better and lesser known texts suggest a historian more eager to comprehend Christianity's worldly power than to sneer at or dismiss it Eminently readable and wholly accessible to anyone interested in or familiar with the Decline and Fall this groundbreaking reassessment of Gibbon's most famous work will appeal especially to scholars of eighteenth century studies
